SUMMARY

Data Analyst with 4+ years of experience turning **complex data into actionable insights** that drive smarter decisions in non-profit, healthcare and education. Proven track record in developing interactive dashboards, **building predictive models**, and **streamlining** reporting **workflows** using tools like **SQL, Python, Power BI**, and **Tableau**. Known for **collaborating closely with cross-functional teams** to align analytics with business objectives—consistently boosting accuracy, improving engagement, and **increasing operational efficiency and process improvements**.

SKILLS

- **Programming Languages:** Python, R, SQL, PL/SQL, DAX (Data Analysis Expressions), VBA
- **Statistical & Machine Learning Techniques:** Predictive Modeling, Time-Series Analysis, PCA, A/B Testing
- **Data Processing & Pipelines:** ETL, ELT, Data Cleaning, Exploratory Data Analysis (EDA), Data Wrangling, Apache Kafka, Hadoop, Databricks
- **Data Visualization & Dashboards:** Tableau, Power BI, Seaborn, Matplotlib, Excel (Macros, Pivot Tables, Solver)
- **Cloud Computing Platforms:** AWS (S3, Lambda, Redshift), GCP (Big Query, Vertex AI), Azure, Salesforce
- **Database Management:** SQL, PostgreSQL, MySQL
- **Version Control & Automation:** Git (Branches, Commits, Pull Requests), Docker, Jenkins, Power Automate

PROFESSIONAL EXPERIENCE

Data Analyst

Dare to Dream Inc | College Park, Maryland

Feb 2025 – Present

- Streamlined the use of **TLDV software** for meeting transcript categorization, reducing **data verification time by 40%**, which accelerated the analysis workflow and significantly boosted team productivity.
- Manufactured a **custom automation pipeline** using **Langchain agents** to convert over **200 meeting notes into JIRA tickets** weekly, eliminating manual input and improving both **task allocation speed** and overall team efficiency.
- Designed and deployed **interactive dashboards** in **Tableau** and **Looker** to monitor real-time **key performance indicators (KPIs)**, including a **20% increase in customer growth**, providing critical insights that shaped marketing strategies across the organization.

Data Analyst

Doublene | Austin, Texas

Jan 2024 - Jan 2025

- Built a **comprehensive Tableau dashboard** for pharmaceutical clients, integrating data from **15+ sources**, which improved insight accessibility and led to an increase of **150 active user sessions per month**.
- Created **predictive models** using **Python and Pandas** to analyze pharmaceutical datasets, improving **forecasting accuracy by 30%** and helping reduce stockouts— positively impacting **customer satisfaction**.
- Conducted **exploratory data analysis (EDA)** on a sales dataset of **500,000+ records**, uncovering trends that informed pricing strategies and resulted in a **5% revenue increase** in the first quarter.
- Led a team initiative to optimize **web scraping protocols**, cutting down task completion time by **60 minutes** and delivering structured datasets to **AWS S3** for efficiency.
- **Developed custom NLP pipelines** leveraging models like **BERT, GPT, and LSTM**, which reduced **climate data processing time by 15 hours per month**, significantly enhancing analytical efficiency.

Business Data Analyst

Learnispire | Hyderabad, India

Jul 2022 - Dec 2023

- Conducted **data analysis and visualization** using **Python, SQL, and MS Excel**, producing reports that enhanced decision-making speed by **30%**.
- Executed **data cleaning, extraction, and transformation processes**, leading to a **15% improvement in data accuracy** across various projects.
- Created interactive **dashboards and reports** in **Tableau**, delivering insights that contributed to a **10% increase in customer satisfaction metrics**.
- Collaborated with business stakeholders to uncover **data patterns and trends**, applying **statistical analysis and data mining** techniques to derive actionable insights.
- Contributed to **data warehousing and modeling efforts**, resulting in a **20% improvement** in data integrity and overall consistency.

Data Analyst

Techigai Private Limited | Hyderabad, India

Jan 2020 - Jun 2022

- Utilized **Python, SQL, and MS Excel** to perform **data analysis and visualization**, delivering reports that improved **decision-making efficiency by 30%**.
- Carried out **data cleaning, extraction, and transformation**, leading to a **15% enhancement in data accuracy** across multiple projects.
- Designed and built **dashboards and reports** using **Tableau**, providing insights that contributed to a **10% improvement in customer satisfaction**.

PROJECTS

Data Wrangling with Baltimore City 911 Report Data (Excel, Pandas, Seaborn, Dash)

- **Objective:** Enhanced data quality and accessibility for crime trend analysis by preprocessing and cleaning 911 report data.
- **Outcome:** Minimized data errors by 30%, enabling accurate temporal and trend analyses for better resource allocation.

Modeling Quality of Suggestions (Machine Learning, Tableau)

- **Objective:** Automated the review process for employee suggestions using machine learning models.
- **Outcome:** Increased review accuracy by 25% and reduced manual effort by 40%, optimizing decision-making.

EDUCATION

Master of Science in Information Systems

University of Maryland, Baltimore County

Jan 2023 – Dec 2024

Bachelor of Technology in Electronics and Communication Engineering

Geethanjali College of Engineering and Technology

Jun 2017 - Jul 2021
