

Lowell, MA +1(978)-876-8434 harshithadodda06@gmail.com https://www.linkedin.com/in/harshithadodda/		
EDUCATION:		
Master's in Computer Science Engineering <i>University of Massachusetts Lowell, Massachusetts</i>	CGPA: 3.7/4.0	Jan 2022 - May 2024
Bachelor's in Computer Science Engineering <i>VIGNAN University (Deemed), Andhra Pradesh, INDIA.</i>		Aug2018 – May 2022

TECHNICAL SKILLS:

- **Databases:** My SQL, Microsoft SQL Server
- **Programming Languages:** SQL, Python, R, XML, HTML, CSS
- **Cloud Technologies:** AWS (EC2, VPC, S3, QuickSight, IAM, Glue, Lambda), VMware, Azure, Azure DataBricks
- **Visualization Tools:** Tableau, Power BI, Sigma
- **Data Analytics & Statistical Tools:** Microsoft Excel (VLOOKUP, pivot tables, advanced functions), R, Python
- **Project Methodologies:** Agile, Project Management
- **Soft Skills:** Excellent Verbal and Written Communication Skills, Presentation, Problem-solving, Highly Adaptable
- **Hard Skills:** Report writing, data management, self-service content design

WORK EXPERIENCE:

- | | |
|--|----------------------------|
| Data Analyst, INOVA Health, Virginia. | Jan 2023 – Jan 2025 |
| <ul style="list-style-type: none">• Analyzed exploratory data analysis (EDA) using SQL and Python to extract insights from large datasets, and created interactive dashboards in Tableau/Power BI to support business decision-making.• Applied advanced data modeling and DAX (Data Analysis Expressions) in Power BI to provide actionable insights, helping identify trends and anomalies in hospital performance and patient outcomes.• Apply strong analytical and problem-solving skills to interpret complex healthcare data, providing actionable recommendations that support executive decision-making.• Manage multiple projects under tight deadlines, collaborating effectively with cross-functional teams to ensure the timely delivery of critical data insights in a dynamic healthcare environment.• Partnered with stakeholders to analyze employer group reporting, provider payment methodology, and care management analytics.• Worked collaboratively in an Agile team environment to deliver high-quality analytic solutions. | |

- | | |
|--|----------------------------|
| Data Analyst, TuringMinds.ai, Hyderabad, India. | July 2021 – May2022 |
| <ul style="list-style-type: none">• Administered databases, ensured data accuracy, and implemented data cleaning and transformation process with a focus on maintaining data integrity rate over 95%.• Developed and optimized SQL queries and database indexing strategies, reducing query execution time by 30% and improving data retrieval efficiency.• Generated comprehensive reports and dashboards using Power BI in critical situations for effective communication with project stakeholders, aiming for a 20% improvement in data visualization efficiency. | |

PROJECTS:

SERVERLESS REAL-TIME DATA ANALYTICS ON AWS:

- Designed and developed a secure AWS network with VPCs and Transit Gateway, achieving a 50% reduction in network latency and 99% uptime.
- Implemented serverless data processing using AWS Lambda and API Gateway, reducing infrastructure management overhead by 70% and data processing latency by 60%.
- Optimized Big Data solutions using Amazon Redshift and EMR, improving query performance by 65% and reducing data processing time by 50%, while enhancing data security with AWS KMS and IAM.

BUSINESS INSIGHTS 360 :

- Learned how data transparency is brought to big organizations enabling users to make data informed decisions.
- Connected Power BI with MySQL, Excel to import ~4 million records. Implemented data transformation in Power Query.
- Built a dashboard in Power BI from scratch for finance, sales, marketing, supply chain and executives which will support the organization in gross margin improvement.

ZOMATO RESTAURANT DATA ANALYSIS:

- Downloaded restaurant data from zomato website for more than 10000 restaurants across india. Ingested this data in MySQL database and initiated ETL to remove outliers, clean up bad records, normalize revenue numbers to standard format using python, jupyter notebook and two standard deviation along with some other statistical techniques
- For analysis of hyderabad restaurants, used Excel, VBA macros and pivot tables. Figured out best restaurants for punjabi and south indian cuisine based on reviews.
- Used Tableau to build various BI dashboards that can show revenue growth in different restaurants based on cuisine, how people's preferences have changed over a period of 5 years

CERTIFICATIONS:

- Certified in Python for Everybody (Coursera, 2020).
- Certified in Python Data Structures under Coursera in 2020 .
- Certified with career edge course offered by TCS Ion.
