Open to Remote, Onsite and Hybrid Opportunities

PROFESSIONAL SUMMARY

Results-driven professional with 3+ years of experience analyzing clinical, financial, and operational data to support strategic planning, regulatory reporting, and business development. Proficient in SQL, Power BI, and data visualization to uncover trends and deliver actionable insights. Experienced in supporting HIPAA- and CMS-compliant analytics, competitive benchmarking, and executive reporting. Skilled at collaborating across teams to enhance workflow efficiency, data accuracy, and decision-making.

WORK EXPERIENCE

Healthcare Data Analyst-, Ventra Health	August 2024 – Present
- Designed and automated 25+ performance reports using Teradata and R, enabling operational leaders to track behavioral and medical claims KPIs, resulting in a 40% reduction in manual reporting efforts. - Built executive-level Power BI dashboards to visualize patient demographics, payer mix, and denial patterns across three regions, leading to a 15% increase in strategic decision accuracy and speed. - Automated EHR audit workflows across Epic and eClinicalWorks, ensuring compliance with HIPAA, CMS, and HIM regulations, which improved audit readiness and reduced compliance exceptions by 35%. - Applied Python-based trend analysis to identify reimbursement delays across top 10 payers, supporting finance teams in recovering \$400K in underpayments over two quarters. - Partnered with IT and compliance to implement HL7-compliant data integration standards, reducing data discrepancies in regulatory reports by 30% and improving cross-functional data consistency.	
Data Analyst, Cognizant	May 2021 – July 2022
- Engineered SAS-based ETL pipelines to process 5M+ EMR and claims records weekly, reducing payer deliverable turnaround time by 45% and ensuring data consistency across multiple states. - Analyzed prescription adherence trends across 7 PBM clients using SPSS and Excel, uncovering gaps that drove a 12% improvement in medication compliance through targeted interventions. - Supported NCQA and HEDIS reporting using RStudio and Tableau, achieving 98%+ accuracy across seasonal quality submissions for major U.S. payers. - Conducted exploratory studies using SQL queries on member engagement data, contributing to a predictive model that improved care coordination outcomes by 18% for chronic disease cohorts.	
Clinical Data Analyst, Apollo Hospitals	May 2020 – April 2021
- Extracted and analyzed daily census and inpatient flow data from MEDITECH and Cerner, improving operational forecasting accuracy by 20% and optimizing bed turnover across 250+ beds. - Audited over 1,200 patient records for ICD-10 and CPT coding accuracy using MATLAB, reducing billing denials by 15% and increasing coding quality for insurance claims. - Collaborated with physicians and nursing teams to resolve documentation gaps, leading to a 22% increase in complete and billable clinical entries across internal departments.	

EDUCATION

University of North Texas Denton, TX	May 2024
Master of Science – Health Informatics	
TKR College of Pharmacy Hyderabad, India	July 2021
Bachelor of Science – Pharmacy	

PROJECT EXPERIENCE

EHR Compliance & Readmission Risk Analysis	January 2023 – May 2023
Analyzed hospital readmission rates using SQL and Power BI on a dataset of 50,000+ patient records, identifying high-risk cohorts and reducing projected readmissions by 18% through targeted insights.	

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, HTML, CSS	
Software: SAS, Tableau, MATLAB, SPSS, Power BI, RStudio, Jupyter Notebooks, Pentaho	
Database Management: MySQL, Teradata Database, Microsoft Access	
Microsoft Office Suite & Collaboration: Excel, Outlook, PowerPoint, Project, Visio, Word, Workfront, JIRA, Agile	
Electronic Health Records (EHR) Systems: MEDITECH, Epic, eClinicalWorks, Cerner, ChartSwap	
Data Privacy Regulations: HIPAA, HL7, FHIR, CMS Guidelines, ICD-10, CPT	

CERTIFICATIONS

Building a HIPAA Compliance Program – LinkedIn Learning	April 2025
Introduction to Probability and Data with R – Coursera	November 2022
Programming for Everybody (Python) – Coursera	June 2021
Registered Pharmacist – Pharmacy Council of India
