SUMMARY

Data Analyst with 5+ years of experience turning complex healthcare and enterprise data into actionable insights that drive efficiency, cut costs, and improve key business metrics. Proficient in SQL, Python, Excel, Tableau, and Power BI, creating automated reports and dashboards that reduce reporting time by 50–60%. Experienced in ETL pipelines, data wrangling, and predictive modeling, delivering analytics solutions that boost program performance and ROI by up to 30%.

SKILLS

Programming: Python (Pandas, NumPy, PyTorch, scikit-learn), SQL, R (ggplot2), SAS

Data Visualization: Tableau, Power BI, Looker, R-Studio, MS Excel (VBA, Pivot Tables, Power Query), Matplotlib, Seaborn

Database: SQL Server, MySQL, PostgreSQL, PL/SQL, MongoDB

Machine Learning: Linear Regression, Decision Tree, Random Forest, SVM, Time Series (ARIMA, Prophet), CNN, TensorFlow, Keras

ETL & Cloud: Data Cleaning, Data Pipelines, ETL, Snowflake, DBT, Data Warehousing, Data Transformation, AWS (EC2, S3, Lambda)

Project Management: Agile/Scrum, Kanban, Waterfall, Monday.com

Web Scraping & Automation: UiPath, Selenium Webdriver, BeautifulSoup

Other Skills: JIRA, Jupyter Notebook, Google Colab, GitHub, VS Code, Postman

EXPERIENCE

Humana, United States

January 2024 – Present

Data Analyst

- Conducted in-depth analysis of patient engagement data using SQL and Tableau, uncovering behavioral patterns that helped care managers improve patient adherence by 14%.
- Designed and maintained ETL workflows in Snowflake + Python, integrating claims, EHR, and call center data; reduced data preparation time by 55% and ensured 99.8% data accuracy.
- Built interactive Tableau dashboards to track wellness program participation, provider performance, and claims cycle time; reduced executive reporting turnaround from 5 days to <1 day.
- Partnered with cross-functional teams to create SQL-driven KPIs for care quality measurement, leading to a 20% improvement in resource allocation efficiency.
- Automated recurring patient risk reports in Python + SQL, cutting analyst manual reporting workload by 30 hours per month.
- Performed A/B testing and statistical analysis on care outreach strategies, providing evidence-based recommendations that boosted program enrollment by 12%.
- Supported advanced analytics initiatives by preparing Python-based feature engineering pipelines for predictive models (e.g., churn, readmission risk), enabling data scientists to reduce preprocessing time by 25%.

Aimleap, India

March 2021 – July 2022

Data Analyst

- Led ad-hoc data analysis for strategic business decisions, translated client requirements into specific tasks, ensuring accurate data extraction, transformation, and reporting in alignment with project goals, resulting in a 15% increase in market engagement.
- Enhanced forecasting accuracy by 20% using ARIMA models in Python to predict real estate market trends, enabling data-driven pricing strategies and investment planning for clients.
- Automated ETL processes through Python and SQL scripts, reducing manual workload by 50% and improving pipeline efficiency.
- Developed Tableau dashboards to track KPIs like lead conversion, operational efficiency, and sales performance, resulting in a 20% increase in sales conversion and a 15% reduction in operational time per project.
- Promoted to Automation Lead; mentored and guided 10+ analysts and interns in automation best practices, resulting in the deployment of Python-based web scraping tools and a 40% reduction in manual effort.
- Automated data extraction processes using Selenium WebDriver and BeautifulSoup, reducing manual effort by 70%, increasing operational efficiency and boosting productivity by 20%.

Aspire Technolab, India

December 2018 – February 2021

Data Analyst

- Designed Excel & Power BI dashboards integrating MySQL data for churn, revenue, and sales trends, improving quarterly strategic planning efficiency by 35%.
- Automated ETL pipelines in Python (Pandas, NumPy) for 10M+ transactional records, ensuring 99% accuracy and cutting data preparation time by 60%.
- Conducted customer segmentation and sentiment analysis using SQL + Python (NLTK), providing insights that improved 14% campaign ROI.
- Built and maintained KPI reporting systems in SQL, reducing reporting turnaround from 3 days to less than 6 hours.
- Performed SQL-based customer segmentation analysis, improving marketing campaign ROI by 17% through more targeted outreach.
- Automated Excel reporting templates with VBA + SQL integration, reducing repetitive manual reporting by 50%.
- Designed lead scoring analytics with logistic regression (Python + SQL), improving marketing targeting efficiency by 18%.
- Supported QA and testing of ETL jobs by writing SQL validation queries, ensuring reliable data flow across warehouse tables and BI layers.

EDUCATION

DePaul University, Chicago, Illinois

September 2022 – June 2024

Master of Science in Computer Science

Maturi Venkata Subba Rao Engineering College, India

September 2014 – November 2018

Bachelor of Engineering in Computer Science and Engineering
