

Haseena Parveen Fazulullah Business Analyst

haseena@techcareermail.com | (475) 312-2999 | Texas, USA | [LinkedIn](#)

Summary

Business Analyst with 4 years of experience in requirements gathering, stakeholder collaboration, and process improvement. Skilled in data analysis, visualization tools like Power BI and Tableau, and SQL to deliver actionable insights. Proficient in creating clear documentation, wireframes, and process maps that align business objectives with technology solutions. Experienced in Agile methodologies, UAT, and risk management to ensure high-quality outcomes. Strong communication and training abilities support effective cross-functional teamwork and workflow optimization.

Technical skills

- **Business Analysis & Requirements Gathering:** Stakeholder Interviews, Workshops, Use Case Modeling, User Stories, BRDs, FRDs
- **Data Visualization & BI Tools:** Power BI (Advanced DAX), Tableau (LOD Expressions, Filters), Excel (VBA, PivotTables, Macros, VLOOKUP)
- **Data Management & Analysis:** SQL Queries, Root Cause Analysis (RCA), GAP Analysis, SWOT Analysis, Data Validation, Data Cleansing
- **Process Improvement & Documentation:** Process Mapping (Lucidchart, MS Visio), Workflow Optimization, AS-IS / TO-BE Analysis, SOPs
- **Project & Agile Methodologies:** Agile Scrum (Sprint Planning, Retrospectives, Reviews), JIRA, Confluence, MoSCoW Prioritization, Risk Management
- **Testing & Quality Assurance:** User Acceptance Testing (UAT), A/B Testing, Usability Testing, Defect Tracking
- **Communication & Collaboration:** Cross-functional Team Coordination, Stakeholder Communication, Presentation Development (PowerPoint), Training & User Guides
- **Tools & Technologies:** Figma (Wireframing & Mockups), Microsoft Office Suite (Word, Excel, PowerPoint), Collaboration Platforms

Professional Experience

Business Analyst, Roland Berger

02/2025 – Present | Remote, Chicago, USA

- Worked on the Financial Risk Management Reporting project, engaging key stakeholders through interviews and workshops to gather detailed requirements. Utilized Lucidchart and MS Visio to map and streamline risk assessment processes, identifying bottlenecks and enabling enhanced automation of reporting workflows globally.
- Created user-centric wireframes and mockups to support new reporting tools. Developed detailed functional specifications, user stories, and process maps in Confluence and Visio, aligning business objectives with IT development teams. Presented project updates and insights effectively using PowerPoint to senior leadership.
- Developed advanced Power BI dashboards incorporating sophisticated DAX formulas, SQL queries, and Excel functions such as pivot tables, VLOOKUP, and macros. Performed Root Cause Analysis (RCA) to ensure data accuracy and actionable intelligence for risk mitigation strategies.
- Conducted User Acceptance Testing (UAT) with A/B and usability testing, gathering user feedback and documenting results to refine dashboard usability. Delivered iterative improvements that boosted user adoption by 40%.
- Facilitated Agile sprint planning, retrospectives, and reviews to maintain project momentum. Created detailed training materials and user guides in PowerPoint and Excel, contributing to a 30% reduction in report turnaround time.

Business Analyst, Barclays

01/2021 – 04/2023 | Chennai, India

- Directed the “Client Onboarding & KYC Process Optimization Initiative” by conducting GAP analysis and using MoSCoW prioritization to streamline requirement gathering. Developed BRDs and FRDs that improved compliance accuracy and reduced KYC processing errors.
- Designed mockups and wireframes in Figma and Lucidchart using case modeling for the onboarding journey and KYC validation screens. Early stakeholder feedback reduced design revisions by 40% and accelerated UI/UX rollout timelines.
- Executed A/B testing on onboarding form layouts and data validation mechanisms. Documented outcomes and supported UAT activities, which led to a 50% increase in form completion rates and a 30% reduction in rework during onboarding audits.
- Built Tableau dashboards with LOD expressions and dynamic filters, integrating SQL-based datasets to track onboarding cycle times and compliance SLAs. Reporting accuracy improved by 45%, while manual tracking efforts across teams were reduced by 60%.
- Created AS-IS and TO-BE process maps in Lucidchart for end-to-end onboarding and KYC workflows. Applied Root Cause Analysis to eliminate redundancies, reducing onboarding time by 25% and enhancing regulatory traceability.
- Supported Agile delivery using JIRA and Confluence, maintaining sprint artifacts and applying SWOT analysis to evaluate proposed automation tools. This enhanced decision-making speed and improved cross-functional communication by 40%.

Associate Business Analyst, Standard Chartered Bank

06/2019 – 12/2020 | Chennai, India

- Worked on the Cross-Border Trade Finance Platform Upgrade by gathering and analyzing requirements. Engaged stakeholders through workshops, documented needs, and defined a RACI matrix to clarify roles, ensuring alignment across business and technology teams.
- Prepared BRDs, FSDs, data dictionaries, and workflow diagrams aligned with governance standards. Tracked requirement changes, managed version control, secured approvals, and ensured documentation remained auditable and compliant throughout the project lifecycle.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives. Managed JIRA backlog, wrote user stories, and collaborated with cross-functional teams to ensure timely, incremental delivery aligned with business priorities.
- Analyzed business data requirements and mapped them to system models. Collaborated with IT to validate data flows and ensure integration accuracy across platforms, reducing errors and supporting consistency in reporting and decision-making.
- Created UAT test plans and coordinated testing activities with users and QA teams. Logged defects, validated fixes, and ensured final outputs met functional requirements, business expectations, and compliance standards post-deployment.
- Identified operational risks, ensured project compliance with regulatory and internal policies, and escalated issues to governance forums. Maintained detailed records for audit readiness and supported controls throughout the project lifecycle.
- Collaborated across business, IT, compliance, and vendor teams. Acted as a liaison to bridge technical and business understanding, resolve blockers, and maintain alignment across all teams involved in project delivery.

Education	
Master of Science in Information Studies (MSIS) (Specialization in Data Analysis) Trine University, Michigan, USA	06/2023 –12/ 2024
Master of Business Administration (MBA) Alagappa University, Tamil Nadu, India	08/2021 –05/ 2023
Bachelor of Engineering in Computer Science (Specialization in Finance) Anna University, Tamil Nadu, India	08/2016 – 05/2020

Project

Customer Feedback Analysis System

- Led the development of a customer feedback analysis system, integrating SQL databases with Power BI dashboards to visualize trends, enabling data- driven improvements in customer satisfaction and reducing response time by 20%.

Workflow Automation Tool

- Designed and implemented a workflow automation tool using Excel VBA and process mapping in Lucidchart, streamlining internal reporting processes and cutting manual effort by 30%, enhancing team productivity and data accuracy.
