EDUCATION

University of St. Thomas

St. Paul, MN

Major: Bachelor's of Science in Data Science

Spring 2026

- Involved in the Data Science club, member of the National Society of Black Engineers, and Secretary for the Muslim Student Association

PROFESSIONAL EXPERIENCE

Extern

Remote

TruBridge Data Analyst

Aug 2025-Current

- Analyzed public healthcare datasets to uncover trends and improve patient outcomes
- Developed interactive dashboards to present insights for data-driven decisions
- Applied statistical and AI methods to track infections and predict outcomes
- Streamlined data cleaning and preparation to support efficient analysis

M&T Beauty Supply

Brooklyn Park, MN

Business Analyst

January 2025-Current

- Analyze inventory and sales data to identify high-performing products and seasonal trends
- Create visual dashboards to track key business KPIs (Key Performance Indicator)
- Assist with documenting in-store procedures and streamlining inventory restocking processes
- Provide weekly reports summarizing insights and performance metrics

Four Seasons

Minneapolis, MN

Valet Attendant

April 2023-Current

- Deliver exceptional service to ensure customer satisfaction.
- Demonstrate effective communication and problem-solving skills in a fast-paced environment.

Reve Academy

Minneapolis, MN

Entrepreneurship Intern

July 2023-August 2023

- Immersed in digital business, focusing on entrepreneurship, design, and technology.
- Participated in hands-on projects, entrepreneurial workshops, and business execution.
- Enhanced communication, teamwork, and problem-solving skills through mentorship.

PROJECTS

Hospital Triage Simulation (**Java**)

- Built a hospital simulation in Java using a priority queue to manage patient check-ins, prioritizing treatment based on urgency level.
- Applied object-oriented principles to model patient data, simulate real-time check-ins, and ensure efficient queue handling.

Recursive Factorial Calculator (**Java**)

- Designed and queried a relational database for a mock retail company to generate insights on sales trends, customer behavior, and inventory performance.
- Tested and debugged assembly code using simulation tools to ensure accuracy and proper memory management.

Personal Finance Tracker (**SQL**)

- Designed a relational database to manage transactions, categorize income and expenses, and track financial activity over time.
- Wrote SQL queries to calculate monthly spending, analyze savings trends, and visualize budgeting patterns.

SKILLS

- Technical Skills: Proficient in **Python** and **SQL**, **Excel**, **Power BI**, **MySQL**, **R**, and **Java**.
- Languages: Fluent in English (native); Learning Arabic proficient in reading.
- Certifications: **Data Scientist Associate Certification**.
- Relevant Coursework: **Database Design**, **Data Mining & Machine Learning**, **Calculus I**, Data Comm and Visualization, Python, Object Oriented Design & Prog, Multivariate Data Analysis, Applied Regression Analysis,
