

# Sasank Rasetti

## JAVA DEVELOPER

Phone: +14097570521

E-Mail: sraasetti810@gmail.com

Location: TX

### EDUCATION

#### Master of Computer Engineering

Lamar University, Beaumont, TX

#### Bachelors in electrical & Electronics Engineering

North East Frontier Technical university

### SKILLS

#### Methodology:

SDLC, Agile

#### Languages:

Java, SQL

#### Frameworks:

Spring MVC, Spring Boot, JSF, Hibernate

#### IDEs:

NetBeans, IntelliJ IDEA

#### J2EE Technologies:

Servlets, JSP, JSTL, JavaBeans, JDBC, JPA

#### Web Technologies:

HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML & React

#### Application Server:

Apache Tomcat, Web Sphere, Web Logic, JBoss

#### Databases:

MySQL, PostgreSQL, Oracle

#### Cloud Tool:

Azure DevOps

#### Build /Other tools:

UML, MS Visio, Maven, Gradle,

#### Version Control Tools:

Git, GitHub, Bitbucket

#### Operating Systems:

Windows, Linux

### SUMMARY

- Around 2 years of experience in Java Developer, Testing, and Deploying of Object Oriented, and Web-based Applications using Java/J2EE technologies.
- Proficiency in using Software Development Life Cycle (SDLC), Agile, and Waterfall methodologies of the development process like requirement analysis and coding, testing, and implementation.
- Knowledge of Spring MVC and Spring Boot Framework for web-based applications.
- Capable of Integrated Development Environments (IDEs) tools like NetBeans and IntelliJ IDEA.
- Proficient in Java/J2EE technologies like Java, Servlets, JSP, JSTL, JDBC, multi-threading, MVC architecture, and Design Patterns.
- Well-Versed in system analysis, design, development, and implementation of web-based applications using HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, and XML.
- Proficiency in database designing with MySQL and PostgreSQL.
- Ability to Object Oriented Analysis and Object-Oriented Design using Unified Modeling Language (UML).
- Knowledge of Azure resources and Azure DevOps for managing Azure cloud storage.
- Strong hands-on expertise in diverse DevOps concepts/tools, especially on Azure DevOps, Pipelines, and GitHub.

### EXPERIENCE

#### Cognizant, India | July 2021 – Jan 2023 | Java Developer

- Responsible for implementing the business requirements using Spring MVC, and Spring Boot.
- Working on Integrated Development Environment (IDE) of Java including IntelliJ, and NetBeans.
- Design and develop Servlets to communicate between the presentation and business layer.
- Develop the using JSP, JavaScript, and HTML and did the client-side validation with the JavaScript.
- Utilize various JQUERY plug-ins to build a Rich Internet Application to make it look more intuitive.
- Working in an Azure DevOps environment (Git/GitHub, CI/CD Pipelines, Kubernetes, Docker, Azure).
- Create Azure DevOps pipeline for building images and deploying them as containers.
- Connect to various databases using JDBC and Hibernate configurations.
- Create several JSP custom tags for maximum user interface components' re-usability.
- Develop back-end PL/SQL procedures for implementing business processes.
- Created CI/CD Pipelines in Azure DevOps environments by providing their dependencies and tasks.
- Collaborate code with other developers using GitHub web-based repository.

#### Evalueserve, India | 2020 Dec – June 2021 | Java Developer

- Developed the project using Waterfall Methodology.
- Used Object Oriented Methodology for Java application design.
- Implemented business processes, database retrievals, and access to information using Java and Hibernate, Spring MVC.
- Designed and developed Servlets to communicate between the presentation and business layer.
- Experience in databases like MongoDB, DynamoDB, Oracle, SQL Server, etc.
- Experience in cloud-based platforms like Pivotal Cloud Foundry and Azure
- Developed a Java Application Framework which receives JSON data, modifies it accordingly, and is saved it onto a new database.
- Designed user interface and checked validations using JSP and JavaScript.
- Created automated CI and CD pipelines in Azure DevOps to move APIs between Development, Test, and Production environments.
- Worked closely with project analyst and implemented various database connections using JDBC.
- Documented existing code architecture with UML diagrams using reverse engineering.
- Maintained code version control using Azure DevOps.
- Worked with PL/SQL to implement SQL triggers to prevent invalid transactions and impose security authorization.
- Created automated CI and CD pipelines in Azure DevOps to move APIs between Development.
- Involved in configuring the Git repository and maintaining version control using Git.
