Interested in Data Analyst Positions | Open to Relocate

EDUCATION

Masters in Data Analytics Engineering | *Northeastern University* | *Boston, MA*

Sep 2023 - Aug 2025

Relevant Courses: *Neural Networks & Deep Learning, Database Systems, Data Mining, Natural Language Processing*

Bachelors in Computer Engineering | *GHRCEM University* | *Pune, India*

Sep 2017 - May 2021

TECHNICAL SKILLS

Programming Languages	: Python, SQL, R, JavaScript, HTML, CSS, Rest API, Fast API
Database Technologies	: MySQL, Oracle, PostgreSQL, Mongo DB, Neo 4J
Visualization & BI Tools	: Tableau, Power BI, Looker, Qlik View, MS Excel
Data Libraries	: NumPy, Pandas, Keras, Scikit-learn, Matplotlib, Cuda, PySpark, TensorFlow
Cloud & Data Tools	: AWS, GCP, Azure, Jenkins, Docker, Kubernetes
Data Warehousing Tools	: Snowflake, AWS Redshift, Alteryx, Talend, Databricks, Azure Data Studio
Other Tools	: GitHub, Google Analytics, Apache Kafka, Hadoop, Linux

PROFESSIONAL EXPERIENCE

Alta Potentia | *Boston, MA*

AI/Data Intern

Jul 2024 – Dec 2024

- Optimized Llama-2 for support automation, handling 10K+ monthly queries with 89% accuracy and 55% faster responses.
- Built **Tableau** dashboards tracking 25+ KPIs, enabling executives to accelerate strategic decisions by 35%
- Engineered automated data pipelines in Airflow and BigQuery, reducing manual reporting workload by 40% and saving 120+ hours monthly
- Developed and optimized **Snowflake pipelines with SQL & Python**, integrating 5M+ healthcare-style records and ensuring **data governance, accuracy, and security**
- Directed cross-functional analytics projects using Python, R, and SQL, uncovering \$2.1M optimization opportunities across marketing operations
- Consolidated 5M+ transaction records into predictive models using scikit-learn, improving demand forecasting accuracy by 22%
- Analyzed **healthcare claims** and **patient admission** datasets with Python and SQL, uncovering patterns that reduced readmission risks by 14%
- Designed scalable **ETL** processes on **GCP BigQuery**, enhancing data reliability by 30% and cutting error rates significantly

Equations Work | *Pune, India*

Data Engineer

Jan 2019 - Jul 2023

- Formulated marketing data framework powering 20% of campaigns, enhancing targeting precision and driving 18% lift in conversions
- Automated analytics with **Alteryx workflows**, streamlining reporting for 200K+ records and reducing weekly manual review workload by 40%
- Automated inventory analytics with Python for 200K+ records and decreased team's weekly review time
- Developed **Tableau** dashboards consolidating **500GB** pipeline data from 12 sources, enhancing operational visibility and driving 35% faster decisions
- Applied **regression, ARIMA, and Prophet models** for demand forecasting, reducing overstock by 15% in healthcare supply chains
- Administered **PySpark** pipelines on **GCP Dataproc**, handling 120M+ records daily and reducing ETL runtime 40%
- Produced client-facing performance reports in Data Studio, driving 18% lift in campaign ROI through actionable recommendations
- Delivered **ad-hoc analytics** for **med-tech pricing data**, combining ERP and CRM feeds into Power BI dashboards that improved pricing strategy efficiency by 20%

PROJECTS

News Bias Detector and Topic Modeling | *NLP, BERT, Scikit-learn, Hugging Face, LIME*

Sep 2024 - Dec 2024

- Built pipeline with LDA topic modeling & TF-IDF cosine similarity to benchmark bias against labeled corpora
- Delivered interactive Streamlit app for real-time news ingestion and sentiment-polarity visualization
