OBJECTIVE

Overall, 5 years of professional experience in IT Industry delivering value to customers. Seeking responsible and challenging Scrum Master or Business Analyst role. Wish to achieve high career growth through a continuous learning process and prove to be an asset for the organization.

PROFESSIONAL SUMMARY

Over 5 years of experience in the IT industry as a **Certified Professional Scrum Master** and Agile Business Analyst.

Administered the role of Scrum Master and have expertise in conducting Backlog refinement, Sprint planning, Daily Stand-up meetings, Sprint Review meetings and Sprint Retrospect meetings when using Scrum Methodology.

Supervised 3 Scrum Teams at a time and ensured that team's success and progress are highly visible to Product Owner and Stakeholders.

Extensively used **JIRA** for maintaining User Story Hierarchy, Backlog Grooming, Updating Tasks and Planning Releases.

Responsible for providing estimation for the project deliverables and resource allocation.

Experience in applying the **Burn down/burnup charts** to visualize the team's progress, and to identify changes in scope and/or progress, by helping them to achieve the sprint goal.

Actively used the Velocity chart to track the amount of work the teams have completed from sprint to sprint, predicting a more realistic amount of work that can commit in future sprints.

Experience in coordinating and managing code release by working in tandem with other teams.

Experience in keeping team motivated and on track to achieve sprint goals, resolving bottle neck issues and publishing impediments to product owner stakeholders.

Experience in Conflict Resolution among Team members without compromising the Sprint Goals.

Experienced in all phases of the Software Development Life Cycle (SDLC) including requirements gathering, analysis, design, implementation, testing and deployment.

Superior team building abilities that help to unite, guide and lead team members towards individual and common work goals.

Good experience in facilitating the team's continuous delivery work of flow, allowing team members to see the state of every piece of work at any time.

Experience in helping the team to manage the Work In Progress (WIP) limits, keeping the development team focused on only a small amount of work at one time, pulling the new tasks into the cycle after completing the previous ones.

Facilitate/coach teams on the benefits of sprint grooming (backlog refinement), while maintaining a healthy backlog of stories ready for the next two sprints ahead.

Strong organizational skills & client orientation.

Experience working with QA team to develop the Test plans, Test scenarios, Test procedures, and Test cases to ensure adequate testing of software both before and after completion.

Experience working with query languages like **SQL**.

Fast Learner, hardworking and excellent interpersonal, oral and written communication skills and strong analytical abilities.
