EDUCATION

The University of Texas at Dallas

M.S., Information Technology and Management

January 2023-December 2024

GPA 3.3

Saveetha School of Engineering, Chennai

Bachelor of Science, Computer Science and Engineering

August 2017- October 2021

GPA 3.6

CERTIFICATIONS & TECHNICAL SKILLS

Certifications : AWS Cloud practitioner, Microsoft Azure AZ 900 Fundamentals

Languages : Python, SQL, R programming, MySQL, PostgreSQL

Tools & Technologies: Tableau, Power BI, Jupyter notebook, R studio, MS Excel, PowerPoint, Microsoft SharePoint, Google Analytics, Git, JIRA, SDLC, Agile, Tableau Prep, Predictive and Prescriptive Analytics.

EXPERIENCE

Capgemini Technology Service Limited, Bangalore, India

June 2021- January 2023

Analyst-Full time

- Led a multinational data analysis initiative covering North America, East Asia, and the Pacific, achieving a remarkable 33% boost in sales and a 25% decrease in customer churn.
- Utilized Tableau to collect and analyze customer traffic patterns, uncovering a 10% rise in foot traffic and a 15% increase in average purchase value across diverse regions.
- Applied Python and RapidMiner to segment IKEA's customer base, revealing five distinct groups driving 80% of total sales.
- Utilized R to scrutinize historical sales data, identifying trends such as increased holiday season sales and higher sales among younger demographics, guiding strategic decision-making.

The Sparks Foundation, remote

August 2020-october 2020

Data analyst-internship

- Directed a project on Student Score Analysis and Prediction via machine learning in a supervised framework, employing Python and scikit-learn.
- Applied machine learning algorithms to analyze student scores, yielding actionable insights for educational planning.
- Collaborated with cross-functional teams to integrate predictive models into existing systems, bolstering data-driven decision-making processes.

ACADEMIC PROJECTS

Driver Drowsiness Detection using Deep Learning Algorithms (Major project)

March 2021- June 2021

- Developed a system for continuous monitoring of drivers and detecting potentially dangerous situations where the driver falls asleep while driving.
- The proposed system utilizes advanced machine learning techniques including Convolutional Neural Networks, Improved Ensemble methods, Gradient Boosting, and Dimensionality Reduction algorithms.
- Measured and compared the system's accuracy with previous studies in published research papers to demonstrate its effectiveness in detecting driver drowsiness accurately and achieved 93.55% accuracy.

CHATBOT USING IBM WATSON (Minor Project)

22 August 2019- 20 October 2019

- Implemented a Chatbot assistant with IBM Watson to facilitate small talk and general actions, effectively integrating it into various functions.

ORGANIZATION EXPERIENCE

Aegon, Team Member

September 2019 - February 2019

- Oversaw team members and facilitated multiple meetings to strategize the event.
- Enhanced networking and communication abilities through engaging with diverse individuals and linking them to the event.

ADDITIONAL INFORMATION

Soft Skills: Team work, Adaptability, Time management, Interpersonal.

Languages: English, Hindi, Telugu, Tamil.

Eligibility: VISA, Eligible to work in the U.S for internships and full-time employment for up to 36 months without sponsorship.
