SUMMARY

Results-driven Business Intelligence Analyst with 7+ years of experience in Business Intelligence, Data Analytics, Cloud Platforms and CRM/ERP systems. I am proficient in QlikSense, Qlikview, Qlik replicate, Power BI, Tableau, SQL, Python, and cloud technologies such as Azure and AWS. Skilled in end-to-end system implementations, data visualizations, stakeholder collaboration, and optimizing business processes through data-driven solutions.

EDUCATION

Master of Science in Information Technology (GPA – 3.7/4.0)

Jan 2024 – May 2025

University of Wisconsin, Milwaukee, WI, United States

Bachelor of Technology (GPA – 3.6/4.0)

May 2013-May 2017

Siddarth Institute of Engineering and Technology, Andhra Pradesh, India

WORK EXPERIENCE

University of Wisconsin Milwaukee – Business Analyst Project Intern

Jan 2024 – May 2025

- Designed and developed predictive traffic accident analysis using Python and Power BI, providing insights for road safety improvements.
- Led a large-scale Power BI implementation, combining complex data sources to **significantly improve decision-making speed** (40% increase).
- Championed a collaborative BI strategy across departments, resulting in much faster report creation by **50%**.
- Initiated data extraction from website using python API's, which saved by **1day** of resource.
- Conducted Implemented Microsoft Dynamics 365 Sales to streamline campus processes.
- Created CRM dashboards, reports, and user documentation.
- UAT conducted and supported data cleansing and integration tasks.
- Developed an Oracle database for a packaging company using SQL, implementing CRUD operations, normalization, data mapping, and entity relationships.
- Extracted and analyzed data from shopping websites using Power Automate and conducted trend analysis.
- Created business requirement documents (BRDs), functional requirement documents (FRDs), and process documents.

Cognizant Technology Services – Sr. Associate Projects-Business Intelligence & Cloud Administration Jun 2023 – Jan 2024

- Managed hospital data analytics using QlikSense, Power BI, and Azure Admin platforms.
- Automation of excel dashboards to Qlik reports which saved 2 days of time of an employee on every week.
- Conducted essential training on Qlik dashboards, empowering stakeholders to translate data into actionable business intelligence.
- Understanding of APLD datasets, Patient behavior, and Engagement/Customer Adoption pulse on drugs, which Streamlined business to take key decisions for further investments.
- A deep dive into key metrics like drug claim volume, treatment cost, insurance coverage percentages, claim rejection reasons, and approval rates provided valuable insights benefited 30 to 40 Stakeholders in saving their time.
- Based on the recommendation engine, integrated with a Qlik dashboard, empowered a business to select the right marketing platform, driving a 1.2% lift in global drug sales.
- Data Analysis on APLD and EMR Data to know metrics of patients attended clinical trials, Rx, NRx, TRx analysis by each physician on various brands by raising 0.2% Rx, NRx.
- Collaborate with stakeholders to gather business requirements and translate them into technical solutions.
- Configured Active Directory, security roles, and data connections for analytics platforms.
- Migrated applications from development to production, optimized system performance monitoring (CPU, Memory, Network Utilization), and handled patch upgrades.
- Automated report distribution via Mail & Deploy, improving efficiency.
- Monitored VMs, servers, and cloud storage, ensuring operational efficiency.
- Provided troubleshooting and monitoring support for BI platforms, ensuring smooth operation and issue resolution.
- Collaborated with business analysts and expert users to gather requirements and enhance data solutions.

- Designed and developed interactive dashboards using QlikSense, Power BI, and Tableau.
- Led QMC Handling, installation, upgrades, and security configurations for BI platforms.
- Conducted ETL processes using SQL, Python, and optimized data processing workflows.
- Migrated QlikView to Qlik Sense, improving dashboard performance by 20%.
- Managed Qlik Replicate pipelines and SAP to CRM data flows.
- Set up and maintained source/target endpoints including Oracle, SQL Server, Snowflake, and IBMi (AS/400).
- Designed and managed replication tasks (Full Load + CDC) ensuring low-latency, high-throughput data movement.
- Performed tuning of replication jobs by optimizing fetch size, commit rate, and parallel table loads.
- Monitored replication health using Enterprise Manager, automated alerts for latency/errors, and integrated monitoring with ServiceNow.
- Partnered with DBAs and data engineers to troubleshoot log-based replication errors, redo/transaction log issues, and endpoint connectivity failures.
- Implemented RBAC security model, managed user permissions, and ensured compliance with enterprise data security policies.
- Configured and maintained Azure Active Directory, Virtual Machines, and Storage Accounts.
- Created custom administrative dashboards to monitor server health, job queues, and license allocations.
- Provided 24x7 production support, resolving tickets via ServiceNow and managing system outages.
- Developed data governance frameworks, improving data quality and security compliance.
- Assisted in evaluating and implementing new BI and data analytics technologies to improve reporting capabilities.

PROFESSIONAL SKILLS

Business Intelligence Tools: QlikSense, Qlikview, Qlik Replicate, Nprinting, Mail and deploy, Qlik SAAS, Power BI and Tableau

CRM/ERP: Microsoft Dynamics 365 Sales, SAP Suit.

Programming languages: Python, HTML, CSS.

Cloud Platforms: Microsoft Azure (VMs, Storage, Active Directory), Azure Data Factory, AWS.

Database Technologies: PostgreSQL, MySQL, SQL, Oracle, PL/SQL.

Methodologies: Agile, Waterfall, SDLC, STLC (Unit Testing, Integration Testing), Microsoft 365, Object-Oriented Programming.

PROFESSIONAL CERTIFICATIONS

- QlikView Business Analyst
- QlikView Data Architect

EVIDENCE OF EXCELLENCE

- Awarded "Rising Star" at Capgemini for outstanding project performance.
- Recognized with "Top of the People" award for contributions to Grupo BIMBO project.
- Honored with "Top Performer of the College" award in Bachelor of Technology for exceptional academic achievements.

KEY ACHIEVEMENTS

- Improved Qlik Sense/Power BI dashboard performance by 20% by optimizing data models and queries.
- Automated reporting processes, reducing manual effort by 10+ hours per week.
- Led a 10+ member team, enhancing operational efficiency and issue resolution times by 30%.
- Migrated and optimized cloud-based analytics solutions, improving system uptime to 99.9%.
- Developed predictive analytics models, enhancing business decision-making in safety analytics.

SOFT SKILLS

- Strong analytical and problem-solving skills
- Excellent stakeholder collaboration and communication
- Effective leadership and mentoring abilities
- Proven ability to work in fast-paced environments
