PROFESSIONAL SUMMARY:

Detail-oriented Data Analyst with 3 years of industry experience and a master's in advanced data Analytics (May 2025). Proven skills in SQL, data lifecycle management, and regulatory reporting with a keen focus on healthcare analytics. Adept at performing root cause analysis, streamlining ETL workflows, and visualizing performance metrics via interactive dashboards. Experienced in working with large-scale datasets, encounter data submissions, and compliance tracking. Eager to contribute analytical expertise to support operational excellence and regulatory adherence as an Encounters Analyst at Cognizant.

SKILLS:

- **Languages & Tools:** SQL, Python, Power BI, Tableau, Excel, HTML, CSS, JavaScript, Streamlit
- **Databases & Cloud:** Snowflake, SQL Server, Azure Synapse, Azure Databricks (academic), SSIS/SSRS (basic)
- **Analytics & ML:** Scikit-learn, Regression, Classification, SHAP, EDA, Feature Engineering, SMOTE
- **Data Processing:** Pandas, NumPy, Data Cleaning, Standardization, One-hot Encoding, ANOVA
- **Reporting & Dashboards:** Tableau, Power BI, Streamlit, Matplotlib, Seaborn
- **Methodologies & Collaboration:** Agile, Git, Jira, UAT Testing, Process Documentation

EXPERIENCE:

AD Advertising – Web Technologies Intern (Full-Time – Remote) (MAY 2020- MAY 2023)

ACADEMIC PROJECTS:

Capstone Project – Data-Driven Approach to Predict Bag Arrival Times at American Airlines (AMERICAN AIRLINES)

University of North Texas | Jan 2025 – May 2025

Course: ADTA 5940 – Analytics Capstone Experience

- Objective: Predict the time for checked-in bags to reach the pier at DFW Airport to enhance airline logistics.
- Processed over 50 million time-stamped scan records from Snowflake to identify process bottlenecks.
- Applied stratified sampling and engineered temporal features such as “Time Since Check-In” and “Day of Week”.
- Conducted extensive EDA using Python visualizations to uncover peak operational hours.
- Trained and compared multiple models (Random Forest, Gradient Boosting, Linear Regression); best model achieved $R^2 = 0.76$, MAE = 30.12 minutes.
- Developed Power BI dashboards to display predictions and operational insights for real-time decision support.

Tools: Python, Scikit-learn, Snowflake, Power BI, Pandas, Jupyter Notebook, Matplotlib, Seaborn

Urban Safety Dashboard – NYC Motor Vehicle Collision Analysis

- Analyzed NYC DOT vehicle collision datasets (~1M+ rows) to identify accident hotspots and time-based patterns.

- Cleaned data for accuracy, then performed statistical analysis to uncover correlations by borough, vehicle type, and time of day.
- Developed interactive Tableau dashboards to display injuries, fatalities, collision types, and high-risk zones.
- Identified that peak collisions occurred between 3 PM to 6 PM on weekdays, suggesting the need for targeted interventions.

Tools: Python (Pandas, Seaborn, Matplotlib), Tableau, Excel, Data Cleaning

Healthcare Analytics – Cardiovascular Disease Prediction & Deployment

- Built a predictive tool using anonymized patient data (~70 features) to assess cardiovascular risk in real time.
- Cleaned data, applied feature scaling, addressed class imbalance using SMOTE, and trained Logistic Regression, Decision Tree, and Random Forest.
- Achieved 87% accuracy using Random Forest with proper cross-validation and hyperparameter tuning.
- Created a Streamlit-based healthcare application for clinicians to input data and receive instant risk assessments.
- Incorporated SHAP values to explain model predictions and promote transparency in clinical use.

Tools: Python, Scikit-learn, Streamlit, SHAP, Pandas, NumPy, Health Data Analytics

EDUCATION:

University of North Texas, Denton, Texas

August 2023 – May 2025

Master's degree in advanced data Analytics

GPA: 3.8/4

CMR Institute of Technology, Hyderabad

August 2018– July 2022

Bachelor of Technology in Mechanical Engineering

CERTIFICATIONS:

- Tata **Data Analytics** Program by Tata Group on Forage
- Data visualization with **Power BI**
- Introduction to Python Introduction to Python- Data Camp (Skills: **Data Analysis, Analytical Skills, Python** (Programming Language), **SQL**)
- Accenture Nordics developer Virtual Experience program Accenture Nordics developer virtual experience program – Accenture
