

HEMANTH THANAKANTI

hemanththanakanti@gmail.com | +1 (937) 867-6742 | Dayton, OH, USA

SUMMARY

Full Stack Java Developer with around 3 years of experience in designing, developing, and deploying scalable web applications. Started with core Java and front-end development, progressing to an advanced level of expertise in microservices architecture, cloud solutions, and DevOps practices. Experienced in building solutions across the entire technology stack using Java, Spring, and Angular in cloud environments.

EDUCATION

University of Dayton , Dayton, OH <i>Master of Science in Computer Science</i>	May 2024
Vellore Institute of Technology , TN <i>Bachelor of Technology in Computer Science</i>	May 2022

PROFESSIONAL EXPERIENCE

Cigna Group <i>Full Stack Java Developer</i>	Bloomfield, CT <i>May 2023 -Present</i>
- Spearheaded the adoption of Agile methodologies and optimized Jenkins CI pipelines, enhancing the efficiency of the development lifecycle by 30% and reducing deployment errors by 40%. - Progressed to a lead developer role in designing and developing microservices architecture using Node.js, Express.js, Kafka, and Docker to enhance scalability and performance of enterprise applications. - Led the development of cloud-native applications utilizing AWS services such as EC2, Lambda, S3, and RDS, improving system efficiency and reducing costs. - Architected secure authentication, authorization using OAuth 2.0, OIDC, ensuring compliance with industry standards. - Optimized database queries, introduced caching mechanisms to improve application performance by 15%. - Enhanced front-end features with Angular 8, React, and Bootstrap, improving responsiveness, while implementing end-to-end testing and real-time monitoring with Cucumber, Splunk, and Dynatrace. - Collaborated with cross-functional teams to integrate microservices and cloud solutions, improving system performance. Mentored junior developers on best practices in microservices and CI/CD pipelines.	
Foray <i>Junior Full Stack Java Developer</i>	Hyd, IN <i>Jan 2021- May 2022</i>
- Co-ordinated in the development of Java-based web applications using Spring MVC and Hibernate, gaining hands-on experience with back-end development. - Built and maintained front-end components using HTML, CSS, Bootstrap, and Angular 8. - Engaged in implementation of RESTful APIs, ensuring smooth integration between the front-end and back-end services. - Gained experience in writing unit tests with JUnit and performing debugging to resolve application issues. - Incorporated Git, GitLab for version control and collaborated with teams via JIRA to track tasks in an Agile environment. - Facilitated in the migration of legacy systems to modern web technologies using Spring Boot and Angular, enhancing system performance and maintainability by 10%.	

TECHNICAL SKILLS

Languages & Front-End Technologies: Java, Python, HTML, CSS, JSP, JavaScript, Angular 8, jQuery, Bootstrap, Redux
Frameworks & Tools: Node.js, Hibernate, Express.js, React, JUnit, Maven, Gradle, Jenkins, Git, GitLab, Kafka, JIRA, Karma, Jasmine, Cucumber, OAuth 2, OIDC
Databases: MySQL, PostgreSQL, Oracle, NoSQL (MongoDB)
Cloud Platforms: AWS (Lambda, SNS, SQS, S3, EC2, ALB), Azure, Oracle Cloud Infrastructure
Others: CloudFormation, Docker, Apache Tomcat
Web Services & Development Methodologies: RESTful, Amazon API Gateway, Agile (Scrum, Kanban), Test-Driven Development (TDD), Behavior-Driven Development (BDD)

PROJECTS

Blood bank management system
Developed a comprehensive Blood Bank Management web application with a user-friendly interface using HTML, CSS, Bootstrap, and JavaScript, and implemented a PHP back-end with SQL database integration for data management.
