

PROFESSIONAL SUMMARY

AWS DevOps Engineer with 5+ years of hands-on experience in DevOps, SRE, and Cloud Security across Banking and Healthcare domains. Skilled in AWS, Azure, Kubernetes, Docker, Terraform, Jenkins, GitHub Actions, Ansible, and CI/CD pipeline automation. Proficient in infrastructure as code, container orchestration, cloud migrations, monitoring/logging (CloudWatch, Prometheus, Grafana, ELK), and security compliance. And implementing cloud-native architectures with cost optimization and governance. Adept at collaborating with cross-functional Agile teams, reducing deployment times, increasing system reliability, and supporting enterprise-scale digital transformations.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, Lambda, EKS, RDS, CloudFormation, CloudWatch), Azure (AKS, ADO, Storage, Monitor)
 - **DevOps & CI/CD:** Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, Maven
 - **Containers & Orchestration:** Docker, Kubernetes, Helm, OpenShift
 - **Infrastructure as Code (IaC):** Terraform, Ansible, AWS CloudFormation, ARM Templates
 - **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, CloudWatch, Splunk, Nagios
 - **Scripting & Programming:** Python, Shell, Bash, YAML, Groovy
 - **Version Control:** Git, GitHub, GitLab, Bitbucket
 - **Security & Compliance:** IAM, RBAC, AWS Trusted Advisor, Azure Cost Management, Data Masking, Vulnerability Scanning
 - **Databases:** MySQL, PostgreSQL, MongoDB, SQL Server
 - **Other Tools:** SonarQube, JFrog Artifactory, Nexus, ServiceNow, Jira
 - **Agile & Project Management:** Agile/Scrum, Sprint Planning, Retrospectives
-

PROFESSIONAL EXPERIENCE

Project: Cloud Infrastructure Automation & Monitoring

AWS DevOps Engineer | Elevance Health | Atlanta, GA **June 2024 – Present**

- Designed and implemented **CI/CD pipelines** in **Jenkins and GitHub Actions**, reducing deployment time by **40%**.
- Automated **infrastructure provisioning with Terraform and Ansible**, ensuring consistent cloud environments.
- Deployed **containerized healthcare applications** on **Kubernetes (EKS/AKS)** using **Helm charts**.
- Configured **blue-green and canary deployments** for zero-downtime releases.
- Integrated **SonarQube + JFrog Artifactory** for secure artifact storage and quality validation.
- Enabled **cloud monitoring with CloudWatch, Prometheus, and Grafana**, improving MTTR by **30%**.
- Automated **log aggregation with ELK Stack**, improving root cause analysis.
- Secured workloads using **IAM, RBAC, and security groups**, ensuring HIPAA compliance.
- Optimized infrastructure costs with **AWS Trusted Advisor**, saving **15% cloud spend**.
- Migrated on-prem workloads to AWS Cloud with **backup automation via S3 + Glacier**.
- Collaborated with developers, QA, and operations teams in **Agile/Scrum**, delivering faster releases.
- Supported **audit readiness** by maintaining compliance documentation and monitoring logs.

Environment: AWS, Azure, Jenkins, GitHub Actions, Terraform, Ansible, Docker, Kubernetes, Helm, CloudWatch, Prometheus, Grafana, ELK, SonarQube, JFrog, SQL, Python, Linux, Agile/Scrum

Project: Healthcare Cloud Security & Deployment Automation

DevOps Engineer | Divis Labs | Hyd | India

Nov 2021 – Jul 2023

- Built and maintained **CI/CD pipelines** using **Azure DevOps + Jenkins**, streamlining deployments.
- Implemented **Terraform modules** for multi-environment infrastructure provisioning.
- Configured **Kubernetes clusters (AKS)** with Helm for microservices deployments.
- Deployed **Docker containers** and automated build/versioning pipelines.
- Integrated **SonarQube** into pipelines for static code analysis.
- Enabled **real-time monitoring with ELK + Azure Monitor**, reducing downtime incidents.
- Automated **patching and configuration management** with **Ansible**.
- Applied **RBAC and data masking** for compliance and security governance.
- Reduced ETL processing errors by integrating automated **SQL validation checks**.
- Built **Python scripts** for release automation and data validation.
- Conducted **disaster recovery testing** using backup/restore strategies.
- Actively participated in **Agile ceremonies**, ensuring sprint deliverables.

Environment: Azure DevOps, Jenkins, Terraform, Ansible, Kubernetes (AKS), Docker, ELK, Azure Monitor, SQL, Python, Helm, SonarQube, Git, Agile/Scrum

Project: Core Banking Cloud Migration

SQL Developer/DevOps Engineer | CMC | Hyd | India

May 2020 – Oct 2021

- Designed and optimized **SQL queries and stored procedures** for financial transactions.
- Migrated **on-prem banking applications** to AWS Cloud with **CloudFormation templates**.
- Built **Jenkins pipelines** for automated deployments and integration.
- Deployed **Docker containers** for API-based banking services.
- Developed **Terraform templates** for provisioning EC2, S3, and RDS instances.
- Configured **CloudWatch dashboards** for real-time transaction monitoring.
- Implemented **data masking and encryption policies** for sensitive banking data.
- Automated **backup/restore procedures** for compliance.
- Collaborated with **QA and Dev teams** for UAT and production cutovers.
- Integrated **Nexus** for artifact versioning and traceability.
- Participated in **Agile standups and sprint planning** with cross-functional teams.

Environment: AWS, SQL Server, Jenkins, Terraform, CloudFormation, Ansible, Docker, Kubernetes, CloudWatch, Nexus, Git, Python, Agile/Scrum

EDUCATION

- **Master of Science in Computer Science** – University of Central Missouri, MO | May 2025
- **Bachelor of Technology in Computer Science** – 2021

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Microsoft Certified: Azure Administrator Associate
- Certified Kubernetes Administrator (CKA)
- Terraform Associate – HashiCorp Certified
- Azure Fundamentals (AZ-900)
