

HEMANTH GOPI

Software Engineer

Email: hemanthkatla@gmail.com

☎Phone: +1(224) 6598-7344

PROFESSIONAL SUMMARY:

Results-driven Software Engineer with a Master's in Computer Science and hands-on experience in full-stack development, cloud technologies, and database management. Proficient in developing scalable Java applications, designing RESTful APIs, and building responsive front-end interfaces using Angular, React.js, and JavaScript. Adept at optimizing database performance with Oracle, PL/SQL, and MongoDB. Strong background in Agile methodologies, CI/CD pipeline implementation, and version control using Git. Proven track record of delivering high-quality, user-centric solutions and contributing to all stages of the SDLC in both team and independent environments. Proficient in Java, Python, and C++, with a passion for solving complex problems through clean, maintainable code. Seeking for an opportunity where I can apply my skills, contribute to impactful projects, and continue building my career and expertise along the way

EDUCATION:

Western Illinois University – Master's Degree

- **Related course Work:** During my Master's degree, I gained practical experience in Java programming, data structures, algorithms, and AI. I developed and optimized applications, designed and managed databases, and created simulations and computer graphics. This coursework provided me with a solid foundation in both technical knowledge and hands-on skills.

National Institute of Technology, Andhra Pradesh – Bachelor's Degree

- **Related course Work:** During my bachelor's degree in Electronics and Communication Engineering, I gained practical experience in circuit design, signal processing, and communication systems. I worked on hardware development, embedded systems, and electronic instrumentation. Additionally, I developed Proficiency in C++, MATLAB, C, Python, and data structures, applying object-oriented programming principles and various coding concepts to solve complex problems. My coursework also covered digital systems and communication protocols, providing a solid foundation in both electronic theory and practical coding skills.

COURSE WORK:

- **Java and Python (UnSchool, India):** Gained foundational skills in Java and Python programming, focusing on core concepts and practical application in software development.
- **Python (Coursera, India):** Advanced proficiency in Python, covering data manipulation, algorithms, and problem-solving techniques.
- **Data Science Foundations (Great Learning, India):** Developed a comprehensive understanding of data science principles, including data analysis, visualization, and machine learning fundamentals.

EXPERIENCE:

HS3 Technologies | Software Engineer

Jan 2024 - Present

Highlights:

- Developed **scalable Java applications** using **Eclipse IDE**, with a focus on **code optimization**, reviews, and **debugging** through the **Eclipse Debugger**.
- Designed and implemented complex **Oracle stored procedures**, functions, triggers, and **PL/SQL queries**, optimizing **database performance** through efficient query execution.
- Created and maintained **RESTful web services** using **Spring Boot** and **Node.js**, enhancing **system modularity** and streamlining **web service calls**.
- Built **MongoDB ORM models** in **Node.js** using **Mongoose**, enabling efficient **data operations** and interactions within applications.
- Developed **front-end interfaces** using **JavaScript**, **jQuery**, **Angular**, **HTML**, and **CSS** to deliver **responsive** and **user-friendly experiences**.
- Deployed **Docker images** on **AWS Kubernetes clusters** for **performance testing**, ensuring smooth scalability and functionality.
- Implemented **CI/CD pipelines**, automating the **deployment process** to reduce manual intervention and improve **deployment speed**.
- Applied **J2EE design patterns**, such as **Singleton**, to ensure **optimized architecture** and maintainable code.
- Collaborated in **Agile development teams**, following **Agile methodologies** throughout the **SDLC** to ensure efficient **development cycles**.
- Utilized **Git** for **version control**, ensuring consistent project collaboration and reliable codebase management.

Outcomes:

- Enhanced database performance and application responsiveness through query optimization and the implementation of efficient stored procedures.
- Achieved seamless **scalability** and reliable testing by deploying and running applications in **Kubernetes clusters** on **AWS**.
- Improved the **deployment process** through **CI/CD automation**, increasing **efficiency** and reducing downtime.
- Delivered **responsive, user-centric interfaces**, enhancing **user satisfaction** by implementing modern **front-end technologies**.
- Simplified **integration** and **scalability** by designing **REST APIs** and **Spring Boot microservices**, ensuring **modular development** and adaptability to system changes.

Web developer:

Jan 2022 - June 2022

- During my intern at Nykaa, I learned to effectively implement HTML, CSS, and JavaScript for web development and gained experience in responsive design using browser developer tools. I also became proficient in Git version control and enhanced my understanding of UI/UX principles through hands-on projects.

Highlights:

- Implemented and maintained HTML, CSS, and JavaScript for new product listings, shopping cart updates, and layout fixes.
- Collaborated on the integration of a new product search feature, participating in code reviews and providing UI feedback.

- Resolved responsiveness issues to ensure optimal display across mobile devices.
- Managed code effectively using Git version control, adhering to coding standards.

Outcome:

- Improved platform stability and user experience by delivering functional updates and ensuring high-quality code.
- Enhanced website responsiveness and usability, leading to a more engaging and reliable e-commerce experience for users.

PROJECTS:

Android Application:

- Develop an **Android Application** using **Eclipse** and **Android plug-in** to track and display the positions of users, with a database managing **checkpoints** and user notifications.
- Implemented an application that allows users to view the **locations** of others, track **checkpoints**, and receive notifications when approaching them.

Java:

- Developed a **Java-based chess game** using **data structures** to manage pieces and game state, ensuring efficient gameplay.
- Designed pieces as **objects with attributes** and implemented draw functions for smooth gameplay mechanics.
- Optimized performance and resolved challenges in **algorithm design** for handling complex game states.

Network Delay Simulator:

- Developed a **Java-based application** to simulate **transmission delay** versus **propagation delay** in **computer networking** with a **graphical interface** for user interaction.
- Enabled users to **simulate and visualize packet movement** from sender to receiver-based custom

Database:

- **Designed and implemented a comprehensive database** to manage critical information for security operations and personnel. Created and normalized tables, defined primary and foreign keys, and established relationships to ensure efficient data organization and retrieval.
- **Utilized SQL to implement and optimize database operations**, including creating indexes for faster queries, performing joins to link related data, and writing complex queries for data insertion, updates, deletions, and reporting, ensuring efficient and accurate data management.

Python Project:

- Created a **Python text adventure game** with interactive **decision-making**, **robust input validation**, and **replay** options.

SKILLS:

- **Programming Languages:** Java, Python, C#, C++
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Angular, Spring Boot, Django, Node.js, .NET
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL
- **API Development:** RESTful APIs, XML
- **Cloud:** AWS (IAM, S3, EC2, AMI, ELB)
- **Tools:** Git, GitHub, IntelliJ IDEA, PyCharm, Eclipse
- **Frameworks & Libraries:** Pandas, NumPy, Matplotlib, Spring, Swing X
- **Object-Oriented Programming:** Proficient in designing and implementing OOP concepts
- **Operating Systems:** Windows, Ubuntu Linux, macOS, Unix
- **Methodologies:** Agile (Scrum), Jira
- **MS OFFICE**

- **Problem Solving, Team Collaboration, Communication**
