PROFESSIONAL SUMMARY

Business Analytics graduate student with deep SAS-driven banking analytics experience, US Business Analyst role internship exposure and hands-on Agentic AI, LLM and RAG system development. Proven ability to define decision metrics, build Power BI dashboards, and translate complex data and AI workflows into compliant, decision-ready insights.

EDUCATION

The George Washington University

Washington, DC

Master of Science, Business Analytics **GPA: 3.33**

Aug 2024 - Dec 2025

Relevant course work: Time Series Forecasting, Data Management, Data Visualization, Data Wrangling, Data Mining, Machine learning, Agentic AI, Cloud Computing, Stochastics, Statistical Modeling, Data Integration, Optimization.

Anna University

Chennai, India

B.E, Electronics and Communication Engineering **GPA: 3.37**

Aug 2017 - Jun 2021

Relevant course work: Digital Signal Processing, Computer Programming, Statistics, Communication Systems & Information Theory, Linear Algebra, Probability & Random Processes, Computer Networks & Data Communications, Signals & Systems.

SKILLS

Advanced Analytics & Banking: SAS (Base, SQL, Macros), SAS Viya, Credit Card & Wealth Banking Analytics, Campaign Analytics, Compliance & Audit Pipelines

Data & BI: Python, SQL, R, Power BI, Tableau, Excel Automation, KPI Dashboards, Cohort & Funnel Analysis

Databases & Data Management: Relational Databases, MySQL, Structured Data

Quantitative & Analytical Methods: Applied Mathematics, Statistics, Quantitative Analysis, Business Problem Decomposition, Analytical Solution Design & Implementation

Agentic AI & GenAI: Agentic AI, RAG Pipelines, LLM Orchestration, Multi-Agent Workflows, OpenAI API, Ollama

Cloud & Data Engineering: AWS, Databricks, PySpark, REST APIs

EXPERIENCE

Business Analyst Intern, Market Maker CRE, Washington, DC

Oct 2025 - Dec 2025

- **Marketplace Evaluation Framework Design:** Designed buyer-seller trust and credibility metrics by studying matching models from three major platforms (Amazon, eBay, LinkedIn), resulting in a standardized evaluation framework applied across 50+ active marketplace listings.
- **Power BI Dashboarding & Data Consolidation:** Built Power BI dashboards consolidating 1,000+ unstructured deal notes and platform records into a single, comparable marketplace view used by leadership for decision-making.
- **Python Based Validation & Strategy Enablement:** Validated matching logic using Python analysis, enabling leadership to prioritize transaction-ready opportunities and inform future marketplace strategy.

Manager Data Analysis, Standard Chartered Modelling and Analytics Center, Bangalore, India

Mar 2023 - Sep 2023

- **Credit Cards Campaign Management:** Led Malaysia market acquisition and activation campaigns; built dashboards and cohort analyses in SAS, SQL and Excel within a technical business environment maintaining data pipelines and large-scale data infrastructure. Generated 1,500 leads and lifted activation.
- **CCPL campaign tracker:** Built and automated a monthly SAS to Excel pipeline (CTEs, window functions, pivots) for KPI reporting and forecasting, ensured sound integration, data, security, and business architecture design across all stages within the platform. Reduced campaign costs by 12% via results analysis driven budget reallocation.
- **Online & Offline CC Acquisition (Fulfillment):** Automated SAS checks for spend/tenure eligibility and on-time reward triggers; published an Excel KPI pack(cohorts, churn), achieving 100% payout accuracy and increased retention effectively.
- **Ad hoc reporting:** Delivered on-demand SAS/SQL/Excel analyses and executive ready summaries for cards initiatives, answering urgent business questions and informing budget/offer decisions.

Analyst, Standard Chartered Modelling and Analytics Center, Bangalore, India

Jun 2021 - Feb 2023

- **Campaign Management:** Led wealth-product campaigns and implemented a SAS to Excel lead-funnel pipeline, optimizing performance.
- **RSP cashback fulfillment:** Implemented SAS and SQL eligibility rules and an end-to-end audit trail for RSP cashback, ensuring 100% policy compliance and reducing manual reconciliation effort by 30%.
- **Performance trackers:** Automated SAS to Excel pipelines for WM holdings, UT analytics, and EB portfolio views, delivering weekly high-performer recommendations and reducing reporting turnaround time by 40%.
- **BAU MIS:** Delivered SAS and SQL-driven daily/weekly MIS variance-to-target analysis and executive summaries with zero defects, maintaining secure, large-scale data infrastructure and promoting technical process enhancements.

PROJECTS

Kitchen Compass AI

- Developed a GenAI decision assistant using LLMs, RAG, and Agentic AI (Python, SQL, VS Code, OpenAI API), integrating NYC open data and regulatory text to deliver insights, compliance guidance, and recommendations through a chat interface.
- Cleaned and preprocessed data, executed SQL queries, and built a frontend–backend pipeline with Ollama; now integrating datasets into the LLM for contextual, AI-driven reasoning.

EdgeCoach-AI Interview Intelligence Agent

- Developed an interview intelligence assistant using LLMs, RAG, and Agentic AI (Python, Streamlit, AWS Lambda, Amazon Bedrock – Claude, Web Scraping) to analyze real-world interview experiences and generate role- and company-specific interview preparation insights through an interactive interface.
- Built intent-classification and retrieval pipelines, integrated scraped interview data into the LLM workflow, and deployed a lightweight frontend–backend architecture to deliver structured interview strategies with transparent, source-grounded reasoning

TATA Online Retail Sales Analysis

- Cleaned and profiled transaction data; performed exploratory data analysis transaction data to map purchasing patterns and revenue drivers; built sales visuals and category KPIs using Python (Pandas, NumPy, Matplotlib).
- Built RFM segmentation (quantile scoring) and cohort views to prioritize high-value/reactivation segments; ran market basket analysis (association-rule mining) to surface cross-sell and bundle opportunities.
