

HEMRAJ SINGH SAINI

Seguin, TX | [LinkedIn](#) | (857)-316-8928 | Saini.h@northeastern.edu

SUMMARY

Senior Data Analyst with 3+ years of experience in SQL, Power BI, Tableau, and Python, specializing in building dashboards, ETL processes, and data modeling to drive informed decision-making. Skilled at translating complex data into actionable insights and mentoring teams on BI best practices. Strong communicator with proven ability to collaborate with stakeholders and deliver reliable, data-driven solutions.

SKILLS

Programing & Tools: Python(NumPy, Pandas), SQL(Advance) , R, MS Excel, JIRA, GitHub, MySQL, Confluence, GCP (BigQuery), AWS(S3,Athena, Glue, Lambda), Snowflake, Jupyter Notebook

Data Science & Analytics: Predictive Modeling, Statistical Analysis, Hypothesis Testing, A/B Testing, Causal Inference

Data Visualization & BI: Tableau, PowerBI, Looker

EDUCATION

Northeastern University, D'Amore – McKim School of Business

Master of Science in Business Analytics

Boston, MA

Dec 2024

VIT University, Vellore Institute of Technology

Bachelor of Technology, Computer science and Engineering

Vellore, India

Jul 2020

PROFESSIONAL EXPERIENCE

Info Edge (Naukri.com)

Senior Data Analyst

Noida, India

Feb 2022 – Aug 2023

- Performed **exploratory and scenario analysis** on large-scale user interaction data using **Google BigQuery and SQL**, uncovering friction points and delivering targeted recommendations that boosted job applications by **30%**.
- Designed and automated **Power BI self-service dashboards** across **5+** teams, reducing manual reporting effort by **40%** and enabling stakeholders to monitor operational KPIs in real time.
- Applied **customer journey and behavioral trend analysis** to identify high-risk users, increasing active job seekers by **20%** and improving recruiter satisfaction through refined retention strategies.
- Presented insights through **data storytelling and CX dashboards**, reducing time-to-hire by **25%** by helping stakeholders optimize search efficiency.

Oye Rickshaw

Data Analyst

Gurgaon, India

June 2021 – Feb 2022

- Conducted **A/B testing, statistical modeling, and causal inference analysis** in Python to identify drivers of customer behavior, improving conversion rates by **20%** through optimized promotional strategies and UI enhancements.
- Analyzed ride demand patterns across high-traffic areas using SQL and identified peak demand zones, enabling optimized driver deployment to better match rider demand, **reducing average wait times by 18%**.
- Led a cost-benefit analysis by extracting and analyzing operational data using SQL, **identifying inefficiencies that led to \$500K in annual cost savings** without compromising service quality.
- Collaborated with stakeholders to deliver regional insights using Power BI, driving a **\$5M revenue increase** in two quarters and **contributing to a reduction in churn rate by 15%** through targeted engagement strategies.

Cognizant

Programmer Data Analyst

Coimbatore, India

Aug 2020 – June 2021

- Streamlined and improved the monthly sales report by consolidating data from multiple sources in Excel for a client, **reducing the error rate by 5%**, and later enhanced the process by automating visuals through a Tableau.
- Administered business performance analysis using Tableau on key KPIs such as revenue growth and profit margins, **improving data accuracy and reporting efficiency by 30%**.
- Implemented ETL processes using Tableau Prep to extract and transform data from master tables and relational databases, **reducing data preparation time by 25%**.
- Optimized sprint planning and backlog management in JIRA by refining requirement documentation, **reducing last-minute changes by 40%** and accelerating project delivery timelines.

PROJECTS

Credit Card Fraud Detection (Python, Machine Learning)

- Built a fraud detection model in Python, **achieving 98.7% precision and 79.6% recall** in identifying fraudulent transactions using machine learning and data analysis tools, improving security and minimizing financial losses

E-commerce Data Analysis and Optimization (Google BigQuery, GCP, SQL, Python)

- Developed sales forecasting models for 700 SKUs, leveraging SARIMA forecasting, which enabled a **15% revenue increase** through better inventory planning.

Business Insights 360: Power BI Dashboard for Strategic Decision-Making (PowerBI, MySQL)

- Created a Power BI dashboard integrating finance, sales, and supply chain metrics, driving data-driven decisions that **increased potential net sales by 141%**.

CERTIFICATION

AWS Certification: Generative AI with Large Language Models

Aug 2024
