EXPERIENCE

Huntington Hospital, ED Medical Scribe

Huntington, NY, Mar 2022 – Jan 2024

- Streamlined patient documentation processes, capturing real-time data for over 50 patient encounters daily, improving data accuracy by 20%, and supporting faster decision-making by healthcare providers.
- Collaborated with cross-functional teams (IT, doctors, administrators) to improve the hospital's Electronic Medical Record (EMR) system, reducing data entry time by 15% and enhancing operational workflows.
- Played a key role in ensuring compliance with HIPAA data privacy standards, and aligning data management processes with regulatory requirements to secure accurate patient records.

Markata AI, Analyst Intern

Stony Brook, NY, Jan 2024 – May 2024

- Developed a product roadmap and go-to-market strategy for an early-stage AI-driven influencer marketing platform, aligning product features with user needs to enhance market reach and strengthen competitive positioning against top industry leaders.
- Secured investor interest for funding rounds, collaborating with cross-functional teams to pitch growth potential, leading to \$500K in projected early-stage investment to scale platform capabilities.
- Performed growth projections of 300 new users per month by 2026, translating to \$2M in annual revenue, which would increase market share by 25% and extend the company's runway by 18 months, ensuring long-term scalability and investor confidence.
- Developed comprehensive strategic frameworks to address challenges such as limited data, cash flow constraints, and network establishment, resulting in actionable insights for enhancing Markata's long-term growth.

Broadstreet, Analyst Intern

Remote, Oct 2023 – Dec 2023

- Analyzed 50,000+ healthcare records using SQL and Excel, identifying trends that streamlined workflows by 20%, optimized product features, and reduced hospital delays, enhancing patient care delivery.
- Developed and presented a real-time KPI dashboard using Tableau, which enabled senior leadership to track key hospital performance metrics, leading to improved patient throughput and an estimated 10% reduction in operational costs.
- Managed stakeholder communications and delivered data-driven insights to leadership, contributing to decisions on hospital optimization and business growth.

Orchid Imaging, Analyst Intern

Stony Brook, NY, Sep 2023 – Dec 2023

- Designed and implemented a study involving 30 volunteers using the Biocogent anti-aging product, capturing and analyzing weekly 3D images to measure subtle skin changes and validate product efficacy.
- Performed financial analysis and market projections, identifying a \$10M market opportunity and advising on a pricing model that improved projected margins by 18%.
- Developed a strategic partnership roadmap, targeting 50+ skincare and cosmetic companies, positioning Orchid Imaging's 3D imaging technology as a key differentiator for product validation, with the potential to increase B2B sales by 35% in the first year.
- Collaborated with marketing teams to create promotional materials that enhanced the product's visibility at trade shows, contributing to successful product launches.

PROJECT

Google Data Analytics - Bellabeat

Analyzed Fitbit data to identify trends in smart device usage, providing actionable insights and recommendations to guide Bellabeat's marketing strategy and drive growth.

- Analyzed Fitbit user data using R programming to identify trends in user engagement, employing clustering algorithms, regression analysis, and time series forecasting to uncover key user behavior patterns.
- Delivered strategic recommendations that guided Bellabeat's marketing strategy, focusing on targeted messaging, product feature enhancements, and promotional strategies aligned with user data insights.
- Collaborated with product teams to refine product features and align marketing efforts with data-driven consumer behavior patterns, enhancing Bellabeat's market positioning and growth potential.
