SUMMARY

Junior Software Developer with experience in full-stack, mobile app, and game development. I am passionate about creating impactful solutions to address real-world problems and contributing to innovative software engineering projects.

WORK EXPERIENCE

Software Engineer Intern — WideSense, Berkeley, CA

Oct 2022 - Feb 2025

- Designed and implemented backend microservices using the **Flask** framework and **Postgres**, which streamlined weather and GTFS data collection and processing, ultimately improving electric vehicle fleet planning and enabling quicker geographic expansion for the company. Containerized microservices with **Docker**.
- Developed and optimized a vehicle state manager using **Redis** to cache real-time CANBus data updates, reducing vehicle state query response times for both backend and frontend services by 50%.
- Improved and implemented new frontend features using **Angular**, **Typescript**, and **Bootstrap**; increased user satisfaction and engagement by 30%.

Game Design Intern — See Change Now, Santa Cruz, CA

Jan 2024 - Jun 2024

- Designed and developed video game prototypes using the **Unity Game Engine**, which aimed to educate youth on environmental sustainability while fostering community activism through interactive gameplay.
- Facilitated regular SCRUM meetings to track progress, address blockers, and maintain **Agile** workflows, leveraging **Jira** for task management and sprint planning.
- Conducted several playtests in Santa Cruz, reaching over 100 testers and positive reviews.

PROJECTS

Detective Dollar

Sep 2024 - Dec 2024

- Collaborated with team to develop a money management app for college students using **Expo/React Native**, featuring expense tracking and data analytics for improved financial planning.
- Designed and optimized the backend, ensuring seamless app performance even with large datasets.

Self Driving Simulator

Apr 2024 - Jun 2024

- Implemented autonomous driving agent in **CARLA simulator** and trained **CNN**, **ResNet** and **Vision Transformer** machine learning models. Utilized **Python** and **PyTorch**.

CORE SKILLS

- **Languages:** Python, C#, JavaScript, TypeScript, HTML, CSS, SQL, C, C++, Haskell
- **Frameworks/Tools:** Flask, SQLAlchemy, PyTorch, PyTest, Scikit-learn, AngularJS, React, React Native, TailwindCSS, Bootstrap, Redis, Unity, Docker, PostgreSQL, SQLite, Expo Go, Jira, AWS, Microsoft Office

EDUCATION

University of California Santa Cruz

Bachelor of Science in Computer Science

Sep 2020 - Jun 2024

GPA: 3.78

Google Cybersecurity Certificate

By Google on Coursera

May 2025
