EDUCATION

Master of Computer Science

University of California, Irvine, CA

GPA: 3.93/4.0

Dec 2025 (Expected)

Coursework: Data Structures, Database Management, Machine Learning and Data Mining, Operating Systems

Bachelor of Engineering in Information Technology

Sinhgad College of Engineering, Pune, India

GPA: 3.94/4.0

May 2022

Honors: Artificial Intelligence and Machine Learning

Coursework: Algorithms, Big Data, Compilers, Computer Architecture, Software Engineering, Cloud Computing

TECHNICAL SKILLS

Programming: HTML/CSS, JavaScript, Adobe ColdFusion, C++, Python, Java, TypeScript

Frameworks: Next.js, React, Angular, Node.js, React Native, Flutter, FastAPI

Technologies & Tools: Google Cloud BigQuery, Oracle DB, MySQL, MS SQL Server, GCP, Google APIs, Azure DevOps.

EXPERIENCE

SLB (Schlumberger)

Pune, India

Associate Support Analyst – Web Application Developer

Aug 2022 – Jul 2024

- As part of the core development team, maintained three legacy ColdFusion applications by resolving 25+ bugs and implemented 7–8 key features, reducing support tickets by 30% over six months.
- Led rebranding exercise by updating HTML/CSS for design compliance. Collaborated with design teams and analyzed brand guidelines to ensure UI consistency, earning runner-up recognition in the 'Leading in Rebranding' award.
- Removed manual user blocking during deployments by developing a role-based user blocking mechanism in JavaScript and ColdFusion, ensuring safe testing and rollout, while also reducing deployment time by ~40%.
- Refactored 12 API calls in JavaScript and ColdFusion to support transition from SOAP to REST, working closely with the upstream team to adapt to new data formats and ensure seamless integration.
- Eliminated manual transfer of project files by developing a web utility to transfer files for specified projects, enabling migration of 15,000+ project files and advancing the decommissioning deadline by one quarter.
- Decommissioned a project by replicating its web application view pages in BigQuery through 70+ custom queries, ensuring seamless data access while reducing server and licensing costs.
- Automated 4 repetitive workflows using Power Automate, improving efficiency and reducing team workload by 20%.

udChalo | upcurve

Pune, India

Full Stack Development Intern

Jan 2022 – Jun 2022

- Modified a vendor form page in Angular, HTML/CSS to comply with new business requirements, ensuring alignment with updated specifications.
- Constructed a reusable multi-select dropdown component in Angular to replace redundant code across multiple pages, improving code maintainability and eliminating redundancy.
- Introduced and implemented a new 'View-only' user role by modifying NodeJS APIs to provide read-only access while restricting write/edit permissions, enhancing role-based security and access control.

PROJECTS

Cirql (Website | Github)

July 2025

- Developed a full-stack web application for tracking and managing job applications. Built intuitive user interfaces using Next.js and Tailwind CSS. Implemented backend services with Supabase for authentication, database management, and file storage.
- Reduced onboarding friction by streamlining sign-up/login flows with OAuth (Google Sign-In) and session management using Supabase Auth.
- Built an AI-powered feature using Google Gemini API to match resumes with job descriptions, helping users optimize their applications with tailored feedback.

Pic2Plate (Github)

May 2025

- Developed a cross-platform mobile app that recommends recipes from fridge images, improving user meal planning speed, using Flutter and Dart.
- Engineered an AI-powered ingredient detection system using Google Gemini to analyze fridge and pantry images and extract grocery items with over 95% accuracy in real time.
- Deployed REST-based microservices to handle image upload, ingredient detection, and recipe retrieval, ensuring response latency <500ms per request.
- Leveraged the YouTube Data API to attach relevant video guides to recipes, improving user experience.
- Led a 3-member team through Agile sprints, presenting the app at the MCS Expo with a demo that received positive feedback from faculty and peers.
