

Hetkumar Patel

Data Analyst

Austin ,TX | (623) 276 6737 | patelhetkumar48@gmail.com | [LinkedIn](#) | Open for Relocation

SUMMARY

Data Analyst with 3+ years of experience transforming complex datasets into strategic business solutions. Skilled in statistical analysis, hypothesis testing, and automated ETL workflows using Python, SQL, and Tableau. Proven ability to deliver data-driven insights that reduce costs, increase efficiency, and accelerate revenue growth. Experienced across financial services, software, and transportation, with a strong track record of building predictive models, interactive dashboards, and cloud-based pipelines. Known for collaborating with stakeholders to translate raw data into actionable strategies.

SKILLS

Methodologies: SDLC,Scrum, Agile, Waterfall
Programming & Analytics: Python (Pandas, NumPy, SciPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn), SQL, R, SAS
Databases: PostgreSQL, SQL Server, MySQL, Oracle
Visualization & BI: Tableau, Power BI, Advanced Excel (VLOOKUP, Pivot Tables, Macros)
Statistical Analysis: A/B Testing, Hypothesis Testing, Regression, Predictive Analytics, Time Series Forecasting
ETL & Data Engineering: SSIS, Informatica, Alteryx, Talend, AWS Glue, Azure Data Factory
Cloud & Big Data: AWS (S3, Redshift, EC2, Lambda), Microsoft Azure, GCP (BigQuery, Dataflow), Databricks
Version Control & Tools: Git, GitHub, GitLab, JIRA, Confluence, Docker, Kubernetes
Soft Skills: Critical Thinking, Problem-Solving, Stakeholder Management, Communication, Team Collaboration

EXPERIENCE

Citi Bank, NY | Data Analyst *Jan 2024 - Present*

- Designed predictive models using Python (Scikit-learn, Pandas, NumPy) that improved risk assessment and decision-making efficiency by 30%.
- Built Tableau dashboards and Excel reports for KPI tracking, enabling leadership to monitor real-time business performance.
- Developed and optimized ETL pipelines on AWS and GCP, reducing data refresh cycles and processing time by 40%.
- Partnered with finance and compliance teams to automate monthly reporting, saving 10+ hours per analyst each cycle.
- Deployed machine learning models (TensorFlow) to detect revenue trends, contributing to 15% business growth.
- Introduced Git-based version control processes, reducing deployment errors by 20%.

Tungsten Automation Formerly Kofax, CA | Data Analyst *Jan 2023 - Dec 2023*

- Conducted exploratory data analysis (EDA) using SQL and Python (Pandas, Matplotlib), uncovering critical business insights that shaped strategy.
- Designed interactive Tableau and Power BI dashboards, improving executive decision-making speed by 35%.
- Managed and optimized large datasets hosted in AWS and GCP, cutting latency by 40%.
- Improved database performance by fine-tuning PostgreSQL queries and schema designs.
- Automated data cleansing and transformation routines, reducing reporting errors by 25%.
- Supported Agile delivery cycles, translating requirements into actionable analytics tasks.

Knight Transportation– Phoenix, AZ | Data Analyst *May 2022– Nov 2022*

- Designed and executed 50+ test cases for a C++-based financial application, ensuring data accuracy and software stability.
- Analyzed logistics performance metrics from load management tools, identifying improvements that boosted operational efficiency by 15%.
- Designed and executed 50+ SQL-based test cases for a financial application, ensuring accuracy and stability.
- Collaborated with software engineers, QA testers, and operations teams to resolve data issues before product release.
- Conducted root cause analysis of data discrepancies, strengthening reporting accuracy and system reliability.

EDUCATION

Master of Science in Computer Science Arizona State University,USA	Dec 2024
Bachelor of Science in Computer Science Arizona State University,USA	Dec 2023

PROJECTS

Streaming Operations and Supply chain: case study of Kalanikethan's merger with Reliance retail: Led post-merger integration analysis between Kalanikethan and Reliance Retail, processing 45,000+ data points across 17 regional markets. Engineered multi-variate algorithms, predictive models, heat maps, and statistical trend analysis revealing regional performance variations. Developed strategic frameworks balancing operational efficiency with traditional expertise preservation through targeted interventions.

Black Friday sales prediction: Led Black Friday analytics project analyzing 550,000+ UK retail transactions. Implemented Linear Regression, decision Tree, Random Forest, and XGBoost algorithms, achieving 665% performance improvement. Handled missing data challenges across product categories, developed visualization frameworks, and uncovered demographic purchasing patterns.
