

Himabindu Kalluri

+1 (206) 483 8915 - himabindukalluri15@gmail.com - [LinkedIn](#) - Bothell, WA

ABOUT ME

- Aspiring software engineer with a strong foundation in computer science and hands-on experience in programming languages including Python, Java, JavaScript, and SQL. Skilled in designing and executing both academic and personal projects. A strong communicator and team player, enthusiastic about contributing innovative solutions within a collaborative environment. Seeking an entry-level software engineering position to leverage technical skills and make a positive impact.

EDUCATION

Jawaharlal Nehru Technological University - Kakinada

Bachelor of Science, Computer Science

GPA: 3.5 / 4.0

Aug 2013 - May 2017

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C, Pandas, HTML5, CSS, Bootstrap, CSharp, PowerBI DAX

Cloud Platforms: Azure

Database Management: SQL, Mango DB, MS SQL Server, MySQL, Postgres

Development Tools: Docker, Kubernetes, Git, Django, HTTP, RestApi, Jira, Azure Synapse, Apache Spark SQL, Kusto, PowerBI, Excel

WORK EXPERIENCE

Sutherland

Application Developer

India

Mar 2019 - Jun 2021

- Designed, developed, and maintained web scraping applications using Python to extract structured and unstructured data from CAQH websource, and exporting the results into structured CSV files for further processing and analysis.
- Design and implement PostgreSQL scripts to clean, transform, and standardize web-scraped data, ensuring it is accurate, consistent, and ready for consumption by upstream systems and services.

CERTIFICATIONS

- Data Camp Associate Data Analyst with Postgres SQL.

ACADEMIC / PERSONAL PROJECTS

Project: Gym Workout Tracker

Personal Project

Redmond, USA

Jan 2024 - May 2024

- Developed a web application to help users log and track gym workouts, including details on weights, repetitions, and sets, serving as a digital workout journal.
- Enabled users to view historical data and trends through visualizations, enhancing their ability to monitor progress over time.
- Built the application using the Django framework in Python and integrated MS SQL Server as the database backend for reliable data storage.
- Deployed the project on Microsoft Azure, ensuring secure access and seamless performance in a cloud-hosted environment.
- Designed a clean, user-friendly interface that encouraged regular use and made tracking workouts simple and intuitive.

Project: NYC Yellow Taxi Data Analysis

Personal Project

Redmond, USA

July 2024 - Oct 2024

- Analyzed the New York City Yellow Taxi dataset to gain insights into ride volume trends, including daily and monthly patterns, and identified high-demand areas across NYC boroughs like Queens and Manhattan.
- Utilized Azure Synapse Analytics for scalable data storage and processing, enabling efficient handling of large datasets.
- Leveraged Apache Spark SQL to perform complex queries and aggregations, such as calculating the number of rides by day, month, and borough, for data-driven insights.
- Conducted comparative analysis to identify peak usage times and high-demand zones, helping to illustrate the city's transportation patterns and potential areas for service optimization.
