EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering and Applied Science
Master's in Information Systems(Applied Data Science) *Expected May 2025*

Cumulative GPA: 3.85/4

Relevant Coursework: Python and Data Mining, Tools for Data Science, Database Systems, Data Analytics for security, Management of Systems, Applied Data Mining, Applied Machine Learning, Software Project Management.

Institute of Aeronautical Engineering

Bachelor of Technology in Electronics and Communication Engineering

2019-2023

Cumulative GPA: 3.5/4

TECHNICAL SKILLS

Languages: Python, C, SQL, Javascript.

Software and OS: VSCode, Git, Jupyter Notebook.

Data Management, Processing & Visualization : Data Preprocessing, Dataset Management, Data Pipelines, MongoDB, PostgreSQL, Excel, Tableau, Python (matplotlib, Seaborn), PowerBI.

Cloud Platforms: Amazon Web Services.

Machine Learning & AI: TensorFlow, PyTorch, Keras.

Certifications: Certificate in C & Data structures by SSSIT, SQL by TechLearn Solutions.

PROFESSIONAL EXPERIENCE

Properties9.com, Data Analyst Intern | Hyderabad, India

August 2022 – November 2022

- Processed and analyzed 500,000+ property records using Python and SQL, identifying key trends that improved decision-making efficiency by 40%. Applied data wrangling techniques to clean, transform, and optimize datasets for real estate market analysis.
- Developed 10+ interactive Power BI dashboards, enhancing real estate data visualization and increasing reporting efficiency.
- Extracted insights from 1M+ data points, leveraging statistical analysis to improve property valuation accuracy by 15%. Collaborated with cross-functional teams to refine data models, maintaining data accuracy, reliability and enhancing strategic planning in the real estate sector.

Pennant Technologies Pvt.Ltd, Data Analyst Intern | Hyderabad, India.

April 2022 – July 2022

- Executed operational reporting within Tableau, analyzing pivotal metrics to drive data visualization and strategic decision-making. Managed and maintained large datasets, ensuring 99% data accuracy through robust validation and cleansing techniques.
- Led the development of 10+ interactive reports and dashboards in Tableau, enhancing data transparency and reducing manual reporting time by 35%. Provided actionable insights that influenced executive-level strategies and key performance evaluations.
- Engaged with cross-departmental teams on large-scale data initiatives, actively contributing to data collection, validation, and management processes. Improved data integrity and project efficiency, leading to a 20% increase in reporting accuracy.

PROJECT EXPERIENCE

Student Registration System, Data Engineer | Group Project

- Developed and optimized PL/SQL procedures for managing student enrollment, course administration, and grade tracking, ensuring data integrity and high performance.
- Designed and implemented the data layer, integrating Oracle database with Spring Boot backend through JDBC for seamless data flow. Built RESTful APIs to enable CRUD operations and incorporated Spring Security for robust authentication and authorization mechanisms.

Web-based Quiz Application, Web-based | Group Project

- Led the successful launch of an interactive Quiz Application, employing Python and Django to develop a dual-layer architecture that streamlined user interactions and enhanced administrative controls for users.
- Admin Layer responsibilities encompass user and admin management, quiz creation, and question administration, ensuring robust control over quizzes and results. Implemented robust security measures, including user authentication and role-based rendering. Demonstrated expertise in full-stack web development, showcasing proficiency in Python, Django, PostgreSQL, and Bootstrap to deliver a responsive, visually appealing application.
