

Himakar Gunaganti Business Analyst

himakar@workwebmail.com | 2603874615 | Fort Wayne, Indiana, USA | LinkedIn

Summary

Business Analyst with 4+ years of experience in optimizing e-commerce platforms and fraud detection processes across Agile and Kanban environments. Adept at requirements gathering, stakeholder management, and delivering actionable insights using tools like SQL, Tableau, Power BI, and Google Analytics. Proven expertise in reducing fraud detection latency by 25%, improving checkout conversion by 25%, and enhancing operational efficiency. Strong background in cost/benefit analysis, impact assessment, and documentation (FRD/BRD). Skilled in cloud integration, advanced Excel (Pivot Tables, Macros, VBA), and driving cross-functional collaboration for business success.

Technical Skills

- **Languages/Methodologies:** Python, SQL, R, Agile/Scrum, Kanban, Waterfall
- **Project Management Tools & Documentation:** MS Project, MS SharePoint, Trello, JIRA, Aha!, FRD, BRD, SRS, Confluence, Smart Sheet
- **Visualization & Analytical Tools:** Tableau, Power BI, Microsoft Excel (Pivot Tables, Macros, VBA), Figma, Balsamiq, Google Analytics, Lucidchart, Draw.io
- **Analysis Skills:** Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, Data Modeling, Predictive Modeling, Exploratory Data Analysis
- **Cloud Platforms & Technologies:** AWS, Microsoft Azure, Cloud-based reporting with AWS Redshift, Cloud integration for real-time pipelines
- **Other Tools & Skills:** Microsoft Dynamics CRM, ERP Systems, Celonis, MS Visio, Slack, LMS, SDLC, Time Management, Project Management, Documentation, Decision-Making, Stakeholder Communication, Customer Relationship Management

Professional Experience

Business Analyst, Fidelity Investments

01/2024 – Present | Remote, USA

- Collaborated with data scientists and IT teams to integrate fraud detection models, reducing false positives by 20% and improving model efficiency by 30%, tracked via KPIs such as fraud resolution and accuracy rates.
- Partnered with data engineering to implement real-time pipelines using Apache Kafka on AWS, reducing detection latency by 25% and improving alert response time and availability.
- Analyzed transactional datasets using SQL and Python to uncover hidden fraud patterns, increasing resolution accuracy by 15% and enabling proactive fraud detection strategies.
- Designed and deployed interactive Tableau dashboards for executive-level fraud monitoring and trend analysis, improving decision-making speed by 20%. Automated compliance reporting pipelines using AWS Redshift and S3, ensuring 100% adherence to regulations and reducing manual effort by 35%.
- Conducted GAP analysis and risk assessments to support integration of fraud models within legacy systems, ensuring compatibility and mitigating system disruption risks. Led cross-functional Agile ceremonies (sprint planning, standups, retrospectives) to align fraud prevention initiatives with business priorities.
- Created and maintained BRD, FRD, and process flow diagrams using Lucidchart and MS Visio for seamless communication between business and engineering teams. Collaborated with compliance officers to monitor and document fraud case resolutions, supporting audit-readiness and improved policy alignment.

Business Analyst, Spencer's Retail

05/2019 – 12/2022 | Remote, India

- Conducted customer behavior analysis using Google Analytics, identifying key pain points in the user journey and increasing checkout conversion by 25%. Partnered with marketing and sales teams to evaluate promotions and campaign performance, using data-driven insights to increase average order value by 12%.
- Gathered requirements and prepared BRDs/FRDs for e-commerce platform enhancement projects; ensured traceability using JIRA and Confluence. Collaborated with UX teams to design A/B testing frameworks, leading to a 20% increase in customer engagement across mobile and desktop interfaces.
- Utilized Power BI dashboards to track real-time business KPIs including cart abandonment, order fulfillment, and customer retention. Performed root cause analysis of high-bounce pages, leading to a 30% improvement in page load time and better mobile responsiveness.
- Conducted Cost/Benefit Analysis and Impact Assessments to prioritize initiatives in a resource-constrained environment, improving ROI on feature rollouts.
- Managed end-to-end SDLC for multiple initiatives, from requirements to deployment, ensuring stakeholder alignment at every phase. Coordinated with cloud infrastructure teams to move analytics workloads to AWS, enhancing data accessibility and system scalability.
- Acted as a liaison between business and IT, streamlining communications and reducing rework by 18% through early-stage clarification of requirements. Led post-implementation reviews and feedback sessions, achieving a 95% stakeholder satisfaction rate and improving iteration cycles through feedback loops.

Education

Master of Science, Lindsey Wilson College
Technology Management

2023 – 2024 | Columbia, USA

Bachelor of Business Administration, Kakatiya University
Computer Science Engineering

2015 – 2019 | Telangana, India
