

Himani Khatter

📍 Bothell, WA, US ✉ himanikhatter17@gmail.com ☎ (409)-867-8876

SUMMARY

Analytical professional with over 6 years of experience in statistical analysis, clinical trial design, and data management. Proven track record of enhancing decision-making through the development of advanced statistical models and the interpretation of complex datasets, contributing to multiple peer-reviewed publications. Skilled in collaborating with cross-functional teams to ensure regulatory compliance and optimize data quality, with a strong focus on leveraging data science and AI to drive innovation in medical research.

SKILLS

- Programming languages: Python, SAS, R, SQL, Java, JavaScript
 - Data manipulation and analysis: NumPy, pandas, Matplotlib, Seaborn, ggplot2, dplyr, tidyR
 - Machine learning: PyTorch, XGBoost, LightGBM, CatBoost
 - Database management: MySQL, SQL Server
 - Data visualization: Tableau, Power BI, Highcharts
 - Communication and collaboration: cross-functional teams, stakeholders, clients, remote teams
 - Research and writing: scientific conferences, journals, grants, proposals
 - Clinical trial design and analysis: Statistical Analysis Plans (SAPs), clinical trial protocols, Case Report Forms (CRFs), interim analyses, sample size calculations, data and safety monitoring board, regulatory requirements and industry standards
-

EXPERIENCE

Clinical Data Coordinator

InBios International Inc, Seattle, WA

Aug 2024- Present

- Managed full data lifecycle for clinical studies, including designing and maintaining eCRFs and study databases.
- Authored and finalized critical documentation, such as Statistical Analysis Plans (SAPs) and Data Management Plans, for COVID-Antigen OTC and COVID/Flu multiplex assay studies.
- Led the successful launch of Electronic Data Capture (EDC) systems through collaboration with CROs, overseeing testing and validation.
- Optimized data quality and management by meticulously reviewing, cleaning, and processing high-volume data sets for analysis.
- Developed and refined interactive data dashboards, significantly enhancing real-time data visibility and accessibility for stakeholders.
- Completed comprehensive data analysis and report preparation for FDA submission.
- Improved data security and accessibility by hosting study databases on the InBios server.
- Ensured strict regulatory compliance by reviewing study reports and maintaining adherence to industry standards.
- Collaborated cross-functionally with stakeholders and software development teams to resolve queries and build efficient clinical study databases.

Biostatistician

Christian Medical College and Hospital, Ludhiana

June 2017 - November 2022

- Led biostatistical efforts for major clinical trials across 30-40 sites in India, overseeing comprehensive data collection and analysis, and ensuring data accuracy through automated and manual queries, daily cleaning, and validation processes.
- Prepared and presented weekly data reports to principal investigators and stakeholders, effectively communicating project progress and key findings.

- Conducted interim analyses and generated project reports for the Data and Safety Monitoring Board, ensuring timely dissemination of critical insights.
- Executed annual analyses and authored detailed annual project reports for stakeholder submission, summarizing findings and strategic recommendations.
- Contributed to grant submissions and the preparation of clinical trial proposals for governing bodies, playing a key role in securing funding for research initiatives.
- Authored and submitted research articles to international journals, disseminating findings to the broader scientific community, and developed an innovative calculation method for assessing sweat area in thermoregulatory sweat tests, presented at the American Academy of Neurology Conference in 2020.
- Analyzed clinical trial data using advanced statistical techniques, leading to improved decision-making and strategic development, while designing and authoring Statistical Analysis Plans (SAPs) to ensure compliance with regulatory requirements.
- Utilized predictive analytics to forecast COVID-19 data trends, employing Time Series Analysis techniques to inform public health strategies, and established rigorous quality control procedures to ensure precision and reliability in statistical analyses.
- Interpreted data from a 3-year longitudinal study involving over 10,000 participants from 30 hospitals across India, providing insightful trend analyses that informed clinical practice guidelines and contributed to numerous peer-reviewed publications.

PROJECTS

Lead Biostatistician

- **INTRINSIC TRIAL - Indian Trial of Tranexamic Acid in Spontaneous Intracerebral Haemorrhage**
Indian Council of Medical Research: April 2021 - November 2022
- **Secondary Prevention by Structured Semi-Interactive Stroke Prevention Package in India (SPRINT INDIA)**
Indian Council of Medical Research: March 2020 - November 2022
- **Rehabilitation of Ischemic stroke Patients in India (RESTORE): A Randomized controlled trial**
Indian Council of Medical Research: March 2020 - November 2022
- **Establishment of normative data for Autonomic Function tests for Indian population**
Indian Council of Medical Research: June 2017 - March 2020

Co-Primary Investigator

- "Making Sense of Redundant COVID Testing Data" funded by Indian Council of Medical Research (ICMR, New Delhi).

EDUCATION

- | | |
|--|------------------|
| • Masters in Data Science and Artificial Intelligence
Campbellsville University Louisville, Kentucky, US | 2023-2025 |
| • Masters in Statistics
Kurukshetra University, Kurukshetra, India | 2014-2016 |
| • Bachelor's in Computer Science
Punjabi University, Patiala, India | 2011-2014 |

INTERNSHIP AND CONFERENCE

- Internship on medical statistics from National Institute of Medical Statistics (ICMR), New Delhi, India -2015
 - Field Training on various schemes under Field Operations Divisions from NSSO (FOD) Chandigarh, Ministry of Statistics and Program Implementation - 2016
 - Abstract presentation for "Establishment of Normative Data for Thermoregulatory sweat test in Indian Population" at American Academy of neurology Conference - 2020
-
