

HIMANSHU PRAJAPATI | Data Analyst | Business Intelligence | SQL & Tableau Expert

Tampa, FL | **Open to Relocate** | himanshuprajapatiwork@gmail.com | (656) 200-7826 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with **4 years of experience** in **Python, SQL, Tableau**, and AWS. Proven record of transforming large datasets into actionable insights to support strategic business decisions.

EDUCATION

MS, Artificial Intelligence & Business Analytics | GPA 3.8 | University of South Florida

Aug 2023 - May 2025

PROFESSIONAL EXPERIENCE

Data Analyst GA | University of South Florida | Tampa, FL

Aug 2024 - May 2025

- Crafted an interactive **Tableau** dashboard to track key performance indicators (**KPIs**), improving decision-making by 15% through real-time insights.
- Managed large datasets (100,000 records) using **Python, R, Pandas, and SQL** for data preparation and **statistical** analysis.
- Applied **Excel** functions and data governance practices to consolidate datasets and ensure data quality across reporting workflows.
- Used **Git**-based version control to manage Tableau workbook iterations and automate report delivery.

Data Analyst | Thomson Reuters | India

Jun 2021 - Jul 2023

- Automated **Python** coverage reporting for unit, integration, and XSLT tests on **GitHub**, reducing bug reporting time by 20%.
- Led a cross-functional team to optimize **SQL** queries and improve performance by 5%; used **data modeling** best practices for schema redesign.
- Automated recurring **Tableau** and SQL-based **reports** using scheduled scripts, reducing manual reporting time by 40% and ensuring on-time delivery.
- Built scalable **ETL** pipelines using AWS Glue, S3, and **Snowflake**, improving pipeline efficiency by 40% and lowering operational costs.
- Conducted **profitability analysis** across customer segments using Python and **Excel**, identifying key drivers impacting margins and revenue trends.
- Translated business requirements from cross-functional stakeholders into actionable insights, aligning dashboards and reports with decision-making needs.

Data Analyst | SKYTEK | India

May 2020 - May 2021

- Automated pipelines using Python (**NumPy, Scikit-learn**) and **SQL**; improved report accuracy by 15%.
- Developed 10+ interactive dashboards in **Power BI** and conducted predictive modeling for HR compensation analysis.
- Devised **statistical** analysis pipelines (descriptive, predictive, and causal) using Python and SQL to uncover workforce trends and drive **data-informed HR decisions**, improving compensation strategy accuracy by 25%.
- Scraped and analyzed COVID-19 trends using Selenium and BeautifulSoup; visualized findings with Matplotlib and Seaborn.
- Collaborated in an **Agile/Scrum** environment with weekly sprints and sprint retrospectives.
- Constructed Python-based web scraping pipelines using Selenium and BeautifulSoup to extract 10,000+ COVID-19 data records, followed by **data analysis** to identify and visualize states most impacted by the pandemic.

ACADEMIC PROJECT

Banking Data Analytics

- Imported and structured 50,000+ banking records from Excel into **MySQL**, handled data imputation for missing data.
- Performed **EDA** in Python to uncover customer risk factors and identify a 15% higher default rate among specific demographics.
- Designed an interactive **Power BI** dashboard tracking 10+ key risk indicators (**KPIs**), improving stakeholder visibility into risk trends and enabling timely, data-driven mitigation actions.

Global Child Labor Trends (Data Visualization)

- Analyzed child labor data from 100+ countries, uncovering that lower GDP per capita correlated with up to 45% higher child labor rates; designed interactive Tableau dashboards with slicers and calculated fields for insights.
- Created KPI-driven visualizations (heatmaps, trend graphs, correlation plots) that reduced manual data analysis by 30% and supported NGOs in prioritizing targeted intervention strategies.

SKILLS

Programming Languages:	Python, R, SQL, Shell Scripting, C, MATLAB, C#
Libraries/Frameworks:	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Selenium, BeautifulSoup
Cloud Platforms & Tools:	AWS (EC2, Lambda, Glue, S3, CloudFormation, Redshift, Athena), Snowflake, Azure (basics)
Databases:	Oracle DB, MySQL, PostgreSQL, BigQuery (basic exposure), pgAdmin
Cloud technologies & tools:	AWS Lambda, Auto Scaling, EC2, CloudWatch, etc.
Data Visualization Tools:	Tableau, Power BI, Tableau Public, Matplotlib, Seaborn, Business Intelligence
Other Tools & Concepts:	Git, CI/CD, Big Data, Data Modeling, Data Governance, Data Quality, Data Lineage
Methodologies:	Agile, Scrum, Cross-functional collaboration, Stakeholder Communication

CERTIFICATION

AWS Certified Associate Solutions Architect

Certified HL7 FHIR Foundational Implementer, V2.8 Control Specialist Certified
