WORK EXPERIENCE

WNS Global Services Private Limited , Hyderabad, India - Data Analyst

Jan 2023 — Jul 2023

- **Stakeholder Engagement:** Collaborated closely with product managers to translate evolving analytics needs into scalable BI and SAP FICO reports, aligning insights with business goals and enterprise data requirements.
- **Data Pipeline Development:** Developed ETL pipelines in Databricks (PySpark) to process 1TB+ customer reviews weekly; improved reliability and cut processing time by 50%, supporting SAP BW ingestion and data transformation processes.
- **AI-Powered Automation:** Deployed GenAI-enabled review response bot using Mistral via Ollama, improving engagement without added overhead; insights integrated into SAP CRM for tracking.
- **Visualization & Executive Reporting:** Built Tableau dashboards to track sentiment KPIs; accelerated decisions by integrating data from SAP HANA, Salesforce, and feedback tools, viewed by 40+ stakeholders for informed decision making.
- **Agile Project Delivery:** Drove Agile practices in the analytics team using Jira and Confluence; increased sprint throughput by 40% by streamlining grooming, sprint planning, and coordination through effective issue management.
- **Excel Automation & Dashboards:** Created Excel-based dashboards with macros & formulas; automated SAP FI/CO financial reports, cutting manual time by 60% & improving accuracy during monthly close with technical design improvements.

CUTSO Foods LLP, India- Business Analyst

Jul 2022 — Dec 2022

- **Supply Chain Performance Analytics:** Optimized supply chain using SQL, Power BI, and Dynamics 365, cutting stockouts by 22%, saving \$48K quarterly, and accelerating fulfillment by 18 hours per order through enhanced data quality and management.
- **Inventory Optimization:** Built automated SKU-level dashboards across 3 warehouses, reducing 12K+ excess units and saving ~\$60K annually by enabling real-time inventory decisions and improving data integrity.
- **Demand Forecasting:** Leveraged historical sales data and seasonal trends to enhance demand forecasting accuracy by 30%, supporting more informed procurement and production planning cycles.
- **Executive Reporting:** Built SAP-integrated executive dashboards showcasing gross margin, category performance, and order cycle times, guiding quarterly pricing and vendor strategies with actionable insights for senior management.
- **Stakeholder Collaboration:** Facilitated SAP-driven process redesign workshops with sales, procurement, and ops teams, optimizing 5+ workflows and reducing lead time variability by 12% through streamlined data integration.
- **Data-Backed Strategic Initiatives:** Leveraged SAP FICO data to identify high-margin SKUs and recommend vendor restructuring, driving cost savings and operational efficiency with a focus on data governance principles.

EDUCATION

University of Texas at Arlington, Texas - *Master of Science , Computer Science*

SRM Institute of Science and Technology, India - *Bachelor of Science, Computer Science*

PROJECTS

News Classification using Machine Learning

- Applied Gaussian Naïve Bayes and Random Forest algorithms to classify news articles. Performed text preprocessing, feature extraction (TF-IDF), and model evaluation to accurately categorize content based on subject.

Next Word Prediction using LSTM

- Implemented a Long Short-Term Memory (LSTM) model to predict the next word in a sequence using deep learning. Demonstrated efficient memory management through sequential modeling, outperforming traditional neural networks for text data.

AML Credit Risk Modeling – American Express Dataset

- Processed a real-world credit dataset with 5.5M+ records and 191 features. Performed one-hot encoding, feature selection, & built an XGBoost model with grid search tuning. Achieved a high AUC score with reduced variance, aiding in credit risk decisions and enhancing data quality.

SKILLS

Programming	: Python, SQL, Java, VBA
Data Analysis	: Pandas, NumPy, Scikit-learn, XGBoost, TF-IDF, Regression, Forecasting
Business Intelligence	: Power BI, Tableau, Excel (Power Query, Macros), Google Data Studio
Databases & Querying	: MySQL, Microsoft SQL Server, SAP HANA, Databricks (PySpark)
ETL & Data Pipelines	: Azure Data Factory, Databricks, SAP BW, SAP FI/CO, Microsoft Dynamics 365
ML & Deep Learning	: Random Forest, Naïve Bayes, LSTM, XGBoost
Tools & Platforms	: SAP, Salesforce, Jira, Confluence, GitHub, Ollama (GenAI), Mistral
Cloud & DevOps	: AWS, Azure, Docker, CI/CD
Project Management	: Agile, Sprint Planning, Backlog Grooming, Cross-functional Collaboration
Relevant Skills	: Enterprise Data, Data Quality, Data Governance, Data Integrity, Business Analytics, Management Information Systems, Data Lineage, Decision-Making, Data Ingestion, Metadata
