

Hrushikesh Thanikonda

Jersey City, NJ | +1 (551)-331-9712 | hrushidhar99@gmail.com | <https://www.linkedin.com/in/hrushikesht/>

OBJECTIVE

Results-driven Data Science professional with a strong foundation in computer science, machine learning, and data analysis. Experienced in developing and optimizing predictive models, conducting sentiment analysis, and implementing statistical methodologies to derive actionable insights. Adept at Python, SQL, and data visualization with a proven ability to solve complex analytical problems. Published research on sentiment analysis of cyberbullying tweets, demonstrating expertise in NLP and text classification techniques.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ

Master of Science in Data Science (Sept 2024 – Present)

- Relevant Courses: Foundational Mathematics for Data Science, Intro to Probability Theory, Applied Machine Learning, Statistics, Numerical Algebra for Big Data, Database Management System

Blekinge Institute of Technology, Sweden

Bachelor of Science in Computer Science and Engineering (May 2021 – Sept 2023)

- Conducted a research thesis on Sentiment Analysis of Cyberbullying Tweets
- Relevant Courses: Applied Programming in Python, UI/UX Design, Introduction to Cloud Computing

Sri Venkateshwara University College of Engineering, Tirupati

Bachelor of Technology in Computer Science and Engineering (June 2017 – May 2021)

- Relevant Courses: Java, SQL, Python, Discrete Mathematics, Probability Theory and Statistics, Database Management Systems, Design and Analysis of Algorithms, Software Design

EXPERIENCE

Data Science Project: Model Comparison on Cyberbullying Tweets | Sept 2024 – Dec 2024

- Led comparative and predictive analysis on 40,000+ tweets using Support Vector Machine (SVM), Decision Tree Classifier, and Random Forest Classifier and Integrated NLP techniques including tokenization, TF-IDF to assess their performance in classifying cyberbullying tweets.
- Implemented GridSearchCV for hyperparameter tuning, optimizing model performance and achieving accuracy rates of 84.06% (SVM), 80.27% (Decision Tree), and 86.53% (Random Forest).
- Led cross-functional collaboration, organizing structured meetings to enhance model development efficiency and ensure smooth execution.
- Utilized Python, Scikit-learn, and Pandas for data preprocessing, feature engineering, and model evaluation, leading to key insights on classifier effectiveness.

Research Thesis: Sentiment Analysis of Cyberbullying Tweets using SVM | May 2021 – Sept 2023

- Designed and implemented a Support Vector Machine (SVM) model to classify sentiment in 40,000+ tweets, achieving 84% accuracy on the testing dataset.
- Pre-processed raw text data, applying tokenization, lemmatization, stopword removal, and TF-IDF vectorization to optimize model performance.
- Developed compelling data visualizations using Matplotlib and Seaborn to identify patterns in cyberbullying content across various online platforms.
- Published findings in an academic journal, contributing to research in natural language processing (NLP) and cybersecurity awareness.

TECHNICAL SKILLS

- Programming:** Python, Java, SQL, AWS
- Data Science & Machine Learning:** Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn
- Tools & Platforms:** Jupyter Notebook, MATLAB, MS Excel, Power BI, Tableau, MS Office, AWS
- Soft Skills:** Analytical thinking, problem-solving, teamwork, research and development

CERTIFICATIONS

- IBM Data Science Professional Certificate (In Progress)
- Meta Database Engineer Professional Certificate (In Progress)
