SUMMARY

Proficient in building Statistical Models and conducting Data Validation to derive actionable insights. Strong foundation in data analysis and machine learning, with proven ability to enhance data-driven decision-making processes.

WORK EXPERIENCE

AEM Developer-(Academic/Independent Experience)

Jan 2025 - May 2025

- Developed a scalable eCommerce platform utilizing Adobe Experience Manager (AEM) with customized components and templates.
- Managed digital assets and catalogs efficiently using JCR and Digital Asset Management (DAM).
- Integrated frontend components employing JSP, HTML, and JavaScript to enhance user experience.

Graduate Assistant – System-Level Programming

Aug 2024 - Dec 2024

- Guided students on the use of terminal-based tools and concepts, focusing on memory management and pointer operations.
- Supported laboratory sessions in C/C++ and Unix systems, providing assistance in debugging and low-level programming.
- Facilitated understanding of complex programming concepts, enabling students to develop practical skills in system-level programming.

Graduate Administrative Assistant – Data Management

Aug 2023 - Apr 2024

- Automated administrative workflows utilizing Excel macros and Adobe Forms, enhancing operational efficiency.
- Collaborated with Prof. Stephen Rosner to improve reporting accuracy and reduce processing time by 40%.
- Created templates and dashboards to streamline data management processes.

AICTE Eduskills

Remote

AWS Cloud Intern

Oct 2021 - Dec 2021

- Deployed and managed cloud applications using AWS services including EC2, S3, and Lambda.
- Utilized AWS tools to enhance the efficiency and scalability of cloud-based solutions.

Avishkar Tech Solutions

Hyderabad, India

Data Science Intern

Jan 2021 - Jul 2021

- Developed machine learning models and conducted data analysis utilizing Python libraries such as Pandas, NumPy, and scikit-learn.
- Applied analytical skills to interpret data and provide actionable insights for project initiatives.

EDUCATION

Georgia State University

Atlanta, GA

Master of Science, Computer Science

May 2025

SKILLS

Languages: Java, C, C++, JavaScript, Python • Web Technologies: HTML5, CSS3, JSP • Frameworks: Spring Boot, Angular, Flask, Power BI • Data: SQL, MySQL, Pandas, NumPy, Scikit-Learn • Technologies: Machine Learning, Data Analysis, Data Cleaning, Data Visualization • Data Assessment • Communication Skills • Team Collaboration
