

PROFESSIONAL SUMMARY

Business Analyst with strong expertise in data-driven decision making, business process improvement, and stakeholder collaboration. Skilled in translating business needs into analytical solutions using Python, SQL, Tableau, and Excel, delivering insights that drive measurable business outcomes across finance and e-commerce sectors.

EDUCATION

University of The Pacific, Stockton, CA

Expected Dec 2025

Master of Science in Business Analytics

- Built an end-to-end fraud detection pipeline on a 550K-transaction dataset using Python (Random Forest), achieving 97% accuracy and reducing false positives by 22%.
- Designed a SQL Server database for Stockton Symphony, improving data retrieval efficiency and enabling dynamic ticket pricing strategies, contributing to projected revenue growth of 15%.
- Conducted market segmentation on U.S. used car market (state-level), utilizing Grafana to visualize regional trends and preferences, supporting go-to-market decisions.
- Led a sentiment analysis project using BART & RoBERTa to summarize 3,700+ British Airways reviews; built a hybrid rules-based/NLP pipeline that improved processing speed by 40%.
- Team lead in emotion analysis app project: applied Python to process large-scale sentiment data, informing UX design and user engagement strategies.

National Taipei University of Business, Taipei, Taiwan
