Education

George Mason University, Fairfax, VA.

Masters in Information Systems

Aug 2022 - May 2024

GPA: 3.78/4.0

Andhra University, India

Bachelor of Technology in Electronics and Communication Engineering

July 2017 - May 2021

GPA: 7.67/10

Technical Skills

Data Analysis: SQL (MySQL, PostgreSQL), Python (Pandas, NumPy), Excel (Advanced Functions, Pivot Tables, Power Query), Statistical Analysis (Hypothesis Testing, Regression), Data Cleaning, ETL Processes, A/B Testing

Visualization & BI Tools: Tableau, Power BI, Advanced Excel Charts, Dashboard Design, KPI Reporting.

Cloud & Technologies: Git, JIRA, Jenkins, ServiceNow, AWS (Certified Solutions Architect – Associate).

Experience

Data Analyst, Up Closets of NOVA – Herndon, VA

May 2025 - Present

- Improved inventory management efficiency by 20% by analyzing customer and operational data to identify trends and optimize stock levels.
- Reduced reporting time by 30% by creating automated dashboards using SQL and Excel to track key business metrics.
- Enhanced cross-team decision-making by translating business requirements into actionable data solutions and providing regular insights reports.

AI/ML Engineer Intern, Zyglia – Remote

Feb 2025 – July 2025

- Increased model accuracy by 15% by performing exploratory data analysis and refining predictive algorithms.
- Accelerated stakeholder reporting by 25% by creating and maintaining technical dashboards for project tracking.
- Strengthened system performance insights by collaborating with engineers to align data outputs with business objectives.

P3MO Intern, ePlus Technology, inc. – Herndon, VA

May 2023 - Aug 2023

- Reduced manual data processing by 25% by developing SQL queries and automating data pipelines for reporting.
- Enhanced project decision-making by analyzing ServiceNow workflows and identifying optimization opportunities.
- Improved KPI visibility by creating visual dashboards in Tableau and Power BI to present operational metrics effectively.

Data Analyst, WOW Life World – India

Jan 2020 – July 2022

- Increased team performance insight by analyzing large datasets on project outcomes and engagement metrics.
- Reduced reporting time by 20% by building dashboards and performing trend analyses to support decision-making.
- Strengthened operational efficiency by providing actionable insights through Excel, and Power BI visualizations.

Projects

YouTube Analytics Dashboard

March 2023 - May 2023

- Engineered ETL pipelines using Python to process YouTube API data, analyzing engagement metrics and viewer demographics.
- Created visualization tools that increased data-driven decision making by 40% and improved content strategy outcomes.
