

Technical Skills

- SQL (Microsoft SQL Server, Google BigQuery)
 - Excel (VLOOKUP, INDEX-MATCH, Conditional Formatting, Pivot Tables, dynamic dashboards)
 - Python (Pandas, NumPy, Matplotlib)
 - Data Visualization & BI (Tableau for dashboard design, KPI tracking, and data storytelling)
- Data Modeling | Exploratory Data Analysis (EDA) | Data Cleaning & Transformation
 - Statistical Analysis (trend analysis, regression models)
 - Database Management (query optimization, ETL processes)
 - Agile Methodology

Projects

- Psychiatric Facility Readmission Analysis | Data Analytics Project

Aug 2025

 - Analyzed performance data from 1,451 psychiatric facilities using SQL (BigQuery) and Tableau to evaluate 30-day readmission rates, intervention compliance (SMD, SUB, TOB-3), and geographic performance disparities.
 - Developed SQL-based KPI calculations and percentile benchmarks, identifying the 93% mid-tier segment (15–25% readmission) as the largest opportunity for targeted improvement initiatives.
 - Delivered actionable recommendations that guided stakeholders in replicating best practices from top-performing facilities and addressing ownership and regional performance gaps.
- Sales & Revenue Optimization Project | Personal Project – Newton, NJ

May 2025

 - Built an end-to-end business intelligence solution using SQL Server, Excel, and Tableau to analyze multi-year retail sales data (2015–2018), uncovering trends in revenue growth, product performance, regional sales, and staff productivity.
 - Identified that the top 10 SKUs generated over 80% of total revenue, including one product contributing \$555K, enabling inventory prioritization, targeted marketing, and revenue optimization strategies.
 - Partnered technical SQL querying and visualization skills to produce data-driven insights on regional sales growth, average order value volatility, and staff productivity, informing strategic planning.
- Equity Valuation & Forecasting Analysis | Personal Project – Newton, NJ

July 2025

 - Cleaned and transformed 728,000+ records covering 7,990 tickers to isolate 2,017 highly liquid equities, enabling accurate analysis of growth, volatility, and dividend patterns using Python, SQL, and Tableau.
 - Designed forecasting models and scenario simulations to project 5-year growth under multiple CAGR assumptions, improving portfolio planning and risk assessment.
 - Uncovered key trends such as high growth in semiconductor and tech sectors and risk-adjusted stability leaders like MSFT and LLY, offering actionable insights for diversified investment strategies.

Experience

- Shoprite Supermarkets Front End Manager – Newton, NJ

October 2018 - Present

 - Collaborated with cross-functional teams to communicate priorities and coordinate workflows, contributing to smoother operations and improved customer experience.
 - Applied critical thinking and problem-solving skills to resolve operational challenges, improving daily efficiency and reducing service disruptions.
 - Built strong relationships with staff by fostering open communication, teamwork, and a positive environment, leading to measurable improvements in customer satisfaction and employee morale.
 - Adapted quickly to changing business needs by learning new tools and processes, ensuring consistent performance and reliable service during high-volume periods.

Education & Certifications

- ASSOCIATE’S OF INFORMATION SYSTEMS – Sussex County Community College – Newton, NJ

September 2021 - June 2023
- BACHELOR’S OF INFORMATION SYSTEMS (IN PROGRESS) – Montclair State University – Newton, NJ

September 2024 - June 2026(Expected)
- IBM DATA ANALYST CERTIFICATION <https://coursera.org/share/cad596f7f2d1f0b487945e4529714eab>

MAY 2025
