

Hymavathi Veeram

Data Analyst

+1 (901) 520-8886 | hymavathiveeram722@gmail.com | [LinkedIn](#) | Memphis, TN, 38111

SUMMARY

3+ years of experience in data analytics, including machine learning, data mining, and statistical analysis, with experience in all phases of SDLC, such as requirement analysis, implementation, and maintenance, and good experience with Agile and Waterfall. Experience with the entire Data Science process life cycle, including data acquisition, preparation, manipulation, validation, and visualization. Working knowledge of Python and R, including NumPy, Pandas, SciPy, Matplotlib, Seaborn, TensorFlow, Scikit-Learn, and libraries including ggplot2. Experience in gathering data from SQL/NoSQL data sources like MySQL, SQL Server, and MongoDB. Proficient in Data Analytics, Data Reporting, Ad-hoc Reporting, Graphs, Scales, PivotTables, and OLAP reporting.

EXPERIENCE

AVNET ELECTRONICS, USA **Jun 2024 – Present**

DATA ANALYST

- Implemented Agile methodologies within a cross-functional team, serving as a bridge between business stakeholders and technical teams to streamline development processes and enhance collaboration.
- Transformed and preprocessed complex, unstructured datasets by applying data wrangling and cleaning techniques in Python, ensuring improved data quality and consistency for analytics.
- Spearheaded a comprehensive data integrity initiative using Python and SQL, which detected and corrected 1,500+ data inconsistencies, improving data processing efficiency.
- Deployed a TensorFlow-based anomaly detection system on log data, flagging 500+ unusual events weekly and reducing incident response time by 40% through improved operational awareness.
- Applied advanced machine learning algorithms, including Linear Regression, Decision Trees, Neural Networks, and Random Forests, to extract meaningful patterns and improve data-driven strategies.
- Led data warehouses migration (5TB+), ETLs, and stored procedures to MySQL, optimizing DB performance & ensuring seamless interoperability, optimized complex MySQL queries, leveraging algorithmic efficiency to enhance data retrieval speed.
- Engineered and automated data pipelines using Apache Airflow, extracting data from 10+ sources, and slashing report generation time by 60%, thus enabling faster decision-making.
- Standardized data mart design using STAR schema principles, resulting in better data accessibility and a 25% increase in end-user satisfaction with business intelligence reporting tools.
- Conducted in-depth market research & competitor analysis, using diverse data sources to drive strategic insights & business growth.

HEXAWARE TECHNOLOGIES, IND

Jan 2020 – Jul 2022

JR. DATA ANALYST

- Developed 10+ comprehensive data models and workbooks with Excel, Oracle, and MySQL data imports, establishing data integrity and consistency protocols for advanced analytics applications.
- Incorporated Python, SQL, and Excel to process ad-hoc data requests, offering timely insights to support operational and strategic decision-making.
- Enhanced dashboard performance on both desktop and Tableau Server by utilizing performance recording techniques, identifying and resolving bottlenecks, which enhanced user experience and increased data accessibility for stakeholders.
- Collaborated with cross-functional teams to define data requirements for new system implementations, ensuring alignment with business needs and contributing to a 20% reduction in data-related project delays.
- Analyzed customer behavior data using SQL and Excel, pinpointing three critical areas for operational improvement that, when implemented, increased overall team efficiency by 15%.
- Collaborated closely with marketing and operations teams to create and analyze listener behavior reports, offering data-driven recommendations for over 3 initiatives aimed at enhancing user engagement and satisfaction.
- Engaged in all phases of data science projects, from data acquisition and cleaning to model development, validation, and visualization, delivering impactful data-driven solutions to address challenges.

SKILLS

Programming Languages:	Python, R, SQL
Packages:	NumPy, Pandas, Matplotlib, SciPy, ggplot2, Seaborn, Scikit-learn, TensorFlow
Database Management:	MySQL, PostgreSQL, MongoDB
Data Analytics & Science:	EDA, NLP, ML, SVMs, ETL, Neural Networks, Time-series analysis, XGBoost
Big Data Technologies:	Hadoop, Spark, Kafka, Hive
Cloud Platforms:	AWS (S3, EC2, Redshift, QuickSight), Azure (Blob Storage, Synapse Analytics)
Development Tools:	Git, GitHub, Docker, Jupyter Notebook, Google Colaboratory
Data Visualization Tools:	Tableau, Power BI (DAX, Power Query), Looker, QlikView, Advance Excel
Agile Methodologies:	SDLC, Jira, Scrum

EDUCATION

Masters in Management Information Systems

University of Memphis, Memphis, US
