

SHREENATH BARAL

JAVA DEVELOPER

📍 Eulesse, Texas, 76040

✉ shreenathbaral10@gmail.com

☎ (682)-244-0480

Professional Summary

- With over 5+ years of IT experience in Analysis, Architecture, Development, Implementation and Integration of Client – Server and standalone applications using Java. (Object Oriented Design and Methodologies).
- Professional Experience in all phases of Software Development Life Cycle (SDLC) that includes Requirements Gathering, Analysis, Design, Implementation and Maintenance and Testing using various methodologies using Java/J2EE.
- Extensive experience in Open-Source Java frameworks such as: Spring Boot, Spring Dependency Injection, Inversion of Control, Spring MVC, Spring Batch, Hibernate and Spring REST Technologies.
- Knowledge of application development for Cloud platforms using technologies like Spring Cloud, Microservices.
- Expert in developing core Java concepts such as Collections, Multithreading, Serialization, Exception handling etc.
- Implemented Agile Scrum Methodology to improve communications between Engineering, Product Management, and Business; to provide more transparency across the 3 departments; and to obtain great business value with short turnarounds.
- Experience with backend Database languages like Oracle, DB2, SQL server, MYSQL, SQL lite with SQL programming language like PL/SQL Database environments. Strong in-depth knowledge of various database systems.
- Experience in implementing web-based projects using Web/Application Servers such as Apache Tomcat and JBoss Application Server.
- Experience with AWS (Storage, S3, click house, Application Services, Deployment and Management).
- Expertise in Database Design, Creation and Management of Schemas, writing Stored Procedures, Functions DDL, DML and SQL queries.
- Experience with Git/SVN, Jira, docker, Kubernetes and JUnit.
- Experience on build tools such as Maven and Gradle.
- Worked with Junit in unit test using Mockito and power Mockito, Integration testing and log4J determining application functionality, Clear quest, Bug tracking tools such as JIRA.
- Team player with demonstrated ability to work fast paced, challenging environment with excellent debugging and problem-solving skills.
- Strong interpersonal skills, analytical ability, communication skills, writing skills, highly organized to meet the deadlines and ability to grasp and adapt to the rising technologies.

SHREENATH BARAL

JAVA DEVELOPER

📍 Euless , Texas , 76040

✉ shreenathbaral10@gmail.com

☎ (682)-244-0480

Technical Skills

- Programming Languages: Java 1.8, SQL
- Web Technologies: J2SE, J2EE
- Frameworks: SpringBoot, Spring MVC, Hibernate, Angular JS/4.
- Front-End Technologies: HTML, CSS, DHTML, JavaScript, AJAX, JSTL, Custom Tags.
- Databases: Oracle, MySQL, Mongo DB.
- Application/Web servers: Web Sphere, Web Logic, Apache Tomcat.
- Web Services: Restful
- IDE Tools: Eclipse, IntelliJ.
- Operating Systems: Windows, UNIX, LINUX.
- Version Controls: GIT, SVN
- SDLC Methods: Agile – SCRUM, TDD.

Work experience

First Bank Texas | Willow Park, TX

Java Developer (01/2023 - Present)

Responsibilities:

- Connected with the Business Analyst group amid necessity assembling and took an interest in standard group gatherings for legitimate correspondence and to determine the issues.
- Associated with different periods of SDLC (Software Development Life Cycle). Also, executed Agile Methodology and SCRUM.
- Created multi-layered web - application utilizing J2EE norms, design patterns, following SOLID principles.
- Used core java concepts including asynchronous programming, multithreading, collections, and design patterns.
- Implemented the caching mechanism in Hibernate to load data from Oracle database.
- Created REST/JSON based web administrations for utilization by a HTML5/JavaScript based front end.
- Characterized set of security approaches which helps in distinguishing ordering and ensuring the advantages on AWS, overseeing access to AWS asset utilizing records, clients, and gatherings.
- Made CI/CD pipelines and setup auto trigger, auto manufacture and auto sending with the assistance of the CI/CD apparatus like Jenkins.
- Implemented Spring boot microservices to process the messages into the Kafka cluster setup.

- Built up the automated unit test cases for the Microservices utilizing Junit, Mockito, and Sonar and sent them in the Jenkins pipeline.
- Executed determination layer utilizing Hibernate that utilization the POJOs to speak to the industriousness database. Arranged and altered logs utilizing Log4J and Used GIT as a form control apparatus.
- Involved in mapping of data representation from MVC model to Oracle Relational data model with a SQL-based schema using Hibernate, object/relational-mapping (ORM) solution.
- Used Spring-security component to provides role-based authorization authentication to add a declarative, role-based policy system control.
- Worked on AWS cloud watch for monitoring the application infrastructure and used AWS email services for notifying.
- Used JDBC Connection Pooling with Oracle Database.
- Worked on Analysis Design and Development, Testing and Production Support, conducting Code reviews for components developed by team members, implemented Apache Kafka.
- Developed system using Java, Tomcat application server, Spring, Hibernate, and database. Worked for developing, running, and testing J2EE applications by using the Eclipse IDE, JBoss Tools, and a Jboss Application Server.
- Utilized JIRA to dole out, track, report and review the issues in the application.
- Observed the mistake logs utilizing Log4j and settled the issue and Utilized GIT for Version control.
- Involved in Peer code review.

Environment: Agile, Java1.8, JIRA, Spring Boot, , Spring MVC, Hibernate, Kafka, Docker, Oracle, SQL, JMS, REST Web Services, AWS, Microservices, Log4j, Junit, ANT, GIT and Windows.

Abbot Laboratoriesl, Irvine, CA

Java Backend Developer (03/2021 - 12/2022)

Responsibilities:

- Participated in Agile SCRUM activities such as daily standup, sprint planning and retrospective meeting.
- Understand and translate business needs into technical requirements and implementations.
- Worked for Continuous Integration deployment, automating build, and tests using Jenkins, and Maven.
- Developed Spring Boot based Microservices & implemented Spring cloud/Netflix API architecture patterns (Eureka Service discovery, Configuration server).
- Used Spring ORM to integrate Spring Framework with hibernate.

SHREENATH BARAL

JAVA DEVELOPER

☎ (682)-244-0480

- Installed and configured JBOSS with MySQL/Oracle persistence. Extracted rules data from the database and decision tables.
- Implemented an Agile development work flow for continuous integration and testing of applications using Redmine, Jenkins and Subversion.
- Developed persistence layer integrating Hibernate with Spring ORM support, also used Spring JDBC for lightweight database operations.
- Used JPA Annotations for Mapping Objects to Tables, hibernate features such as Lazy Loading, Hibernate Query Language (HQL), Criteria and Pagination.
- Responsible for creating Class diagrams, Sequence diagrams, Use Case diagrams, Object Model diagrams, and deployment diagrams using Microsoft Visio.
- Worked within a massive multi-tiered system architecture comprised of a client layer, a delivery layer, an API layer, and a micro-services layer.
- Used Maven for building, deploying the application, creating JPA based entity objects and compiling GWT applications.
- Provided 24/7 production support for the production database and also to the code deployed in the production environment.

Environment: Java 1.8, Spring, Hibernate, REST, Oracle 11g, Hibernate, Git, Maven, Gradle, Web Services, JDBC, Spring Boot, JPA, Eclipse, IntelliJ.

Planet Earth Solution P. Ltd. | Kathmandu, Nepal

Java Backend Developer (05/2019 - 02/2021)

Responsibilities:

- Analyze the new enhancements and translate Business Requirements into Functional Requirements and prepare Design Documents. Involved in the system analysis, design, and development
- Involved in Project Plan, System & Integration documents
- Created Jenkins pipeline for CICD.
- Worked on Hibernate object/relational mapping according to database schema.
- Used Struts Tiles and Validator framework and JavaScript extensively in developing the applications.
- Configuring the Jboss server with the required property files which contain the principals, passwords and their roles.
- Developed the backend using Spring Boot, Spring, JPA query factory, Restful API.
- Developed SpringBoot based MicroServices & implemented Spring cloud/Netflix API architecture patterns (Eureka Service discovery, Configuration server).

SHREENATH BARAL

JAVA DEVELOPER

📍 Euless , Texas , 76040

✉ shreenathbaral10@gmail.com

☎ (682)-244-0480

- Developed and maintained Data Driven framework using Selenium Web driver, Java and TestNG
- Execute test strategies and analyze test results. Maintain strict adherence to client's prescribed testing guidelines, control processes and procedures.
- Preparing the design document based on requirements. And sending project status report on weekly basis. Developing the web applications using Core Java (Multithreading and Collection).
- Implementation of JUNITs for Unit and Integration Testing. Involved in preparation of Test plan and mapping test cases to requirements.
- Creating functional point estimation and responsible for designing backend api using swagger.

Environment: Java, SpringBoot, Web Services, TDD, hibernate (ORM Tool), SSL, Agile, JUnit, Mockito, Jboss, Maven3.x, Web sphere Application Server 6.0 and Oracle10g, Eclipse.

Sanima Bank Limited l Kathmandu, Nepal

Jr. Java Developer (06/2018 - 04/2019)

Responsibilities:

- Developed various helper classes needed following Core Java multi-threaded programming and Collection classes.
- Designed and developed third-party payment services, REST services to offer users convenient payment methods using various APIs provided by various third-party payment processors.
- Used Spring AOP Module to implement logging in the application to know the application status.
- Designed and developed the End Points (Controllers), Business Layer, DAO Layer using Hibernate/JDBC template, using Spring IOC (Dependency Injection).
- Developed Restful Micro Services using Spring Rest and MVC, for OSS services.
- Implemented the application using Spring IOC, Spring MVC Framework, Spring Batch, Spring Boot and handled the security using Spring Security.
- Developed REST architecture-based web services to facilitate communication between client and servers.
- Developed the persistence layer using Hibernate Framework, created the POJO objects and mapped using Hibernate annotations and Transaction Management.
- Implemented Web-Services to integrate between different applications components using Restful web services.
- Developing web services and integrating clients with services using SOAP and RESTful.
- Extensively used JSON to parse the data from server side to satisfy the business requirement.
- Extensively used JUnit for unit testing, integration testing and production testing, configured and customized logs using Log4J.
- Used JIRA to assign, track, report and audit the issues in the application.

- ☎ (682)-244-0480

- Used GIT to maintain the version of the files and took the responsibility to do the code merges and creating new branch when new feature implementation starts.
- Participated in Pair programming.

Environment: JDK 1.8, Spring, Hibernate, Oracle 10g, Spring Security, REST, Web Service, JUnit, Java Tomcat, log4J, Git Hub, JIRA, MyEclipse/Eclipse.

Education

Bachelor of Technology in Information Technology
