

Inchara Sathyanarayan

(303) 653-7725 | inchara.sathyanarayan@colorado.edu | <https://www.linkedin.com/in/inchara-sathyanarayan-512793294>

EDUCATION

University of Colorado Boulder (GPA - 3.8)

Boulder, CO

Master of Science in Data Science

May 2025

Relevant Coursework: Machine Learning, Natural Language Processing, Big Data Architecture, Cybersecurity, Statistical Methods, Computer Vision, Data Mining, Data Structures

PES University (GPA - 8.6)

Bangalore, India

Bachelor of Technology in Electronics and Communication

May 2023

Key Courses: Design and Analysis of Algorithms, Machine Learning, Digital Signal Processing, Operating Systems

EXPERIENCE

Data Scientist | *Holiday Channel* | Remote, US

June 2025 – Present

- Designed an AI-powered moodboard feature leveraging recommendation algorithms to surface relevant content, applying pattern detection methods transferable to trend and anomaly analysis
- Built a scalable MongoDB + PostgreSQL data model for multi-source data aggregation, improving query performance for analytics
- Developed data pipelines for real-time content and engagement monitoring, enabling faster identification of emerging trends.

Software Engineering Intern | *uniqin.ai* | Bangalore, India

May 2023 – Aug 2023

- Created real-time analytics pipelines to process high-volume e-commerce transactions, improving detection of unusual activity patterns.
- Integrated RESTful APIs to unify multi-source datasets into dashboards for operational decision-making.
- Enhanced front-end performance by 25%, allowing faster access to analytics insights.

Software Engineering Intern | *Morning Song Eldercare* | Bangalore, India

Jan 2023 – Apr 2023

- Built a secure web application prototype (React.js, Node.js) with privacy and accessibility safeguards.
- Led user testing sessions and analyzed feedback to refine UI/UX, successfully reducing user onboarding time by 30%.

PROJECTS

High Performance Stock Market Simulator (C++)

- Engineered a multithreaded simulator to replicate a real-time, latency-critical stock order matching engine, processing over 100,000 transactions with minimum delay.
- Implemented lock-free queues and custom memory management to maximize throughput, achieved a 5–8x speedup compared to a standard Python implementation

Restaurant Recommendation System – Geographic Trend Mapping

- Built and deployed a scalable recommendation service using Go to develop concurrent REST APIs, deployed on Google Cloud with GKE and Docker for containerization.
- Architected a CI/CD pipeline with GitHub actions for automated testing and deployment, improving team deployment efficiency and enabling real-time regional analysis with PostgreSQL.

ADHD Prediction using 3D CNN (TensorFlow, Python)

- Constructed and trained a 3D Convolution Neural Network (TensorFlow/Keras) to classify ADHD in pediatric MRI scans, achieving 92% accuracy.
- Implemented advanced data preprocessing and augmentation techniques using Python and OpenCV, reducing signal noise in neuroimaging data by 40% through Gaussian Filtering..

Brewery Review Sentiment Analysis (PyTorch, NLP)

- Applied BERT embeddings and PyTorch models to analyze sentiment trends from large-scale review datasets, improving Mean Squared Error (MSE) in sentiment prediction.
- Developed an interactive dashboard with Matplotlib and leveraged Hugging Face Transformers for robust sentiment classification and trend visualization.

TECHNICAL SKILLS

- Programming Languages:** Python (Proficient), C++, Go, SQL, R, JavaScript, Java, C
- Data Science & Machine Learning:** TensorFlow, PyTorch, Sci-kit learn, Pandas, NumPy, Keras, NLTK, OpenCV, SpaCy, Matplotlib, Seaborn, Hugging Face Transformers, LLMs, NLP
- Cloud & DevOps:** Google Cloud Platform, Docker, Kubernetes, Git, CI/CD(Github Actions), REST APIs
- Tools & Concepts:** Tableau, Alteryx, MLOps, Data Pipelines, Model Fine-Tuning, Responsible AI

CERTIFICATIONS

Microsoft Azure AI Fundamentals (In Progress), Cisco - Introduction to Cybersecurity, Coursera - ML Specialization
