

Indhu Varsha Veeramala

AI/ML and Python Developer | Generative AI | NLP Expertise

+1(817)-936-2320 @ indhuvarsha083@gmail.com linkedin.com/in/indhuvarsha 9 Arlington, Texas

SUMMARY

AI/ML and Python Developer with 6+ years of hands-on experience in designing and implementing Generative AI, NLP, and cloud-based solutions using Python, Azure, and AWS. Skilled in designing and optimizing prompts, building scalable AI workflows, and integrating large language models with enterprise systems. Strong background in cloud platforms, CI/CD, and cross-functional collaboration. Proven expertise in building end-to-end AI pipelines, fine-tuning LLMs, and developing intelligent applications using frameworks such as LangChain, Hugging Face, and OpenAI APIs. Strong background in Django, Flask, REST APIs, and data processing. Adept at leveraging cutting-edge technologies to deliver scalable, secure, and innovative AI-driven solutions.

EXPERIENCE

Python/GEN-AI Developer

Cigna

02/2025 - Present Austin, TX

Health service company providing medical, dental, disability, life and accident insurance and related products and services

- Enhanced chatbot accuracy using Private GPT, LangChain, RAG, and advanced Prompt Engineering.
- Developed frameworks for prompt optimization and reproducibility, improving response accuracy and governance tracking.
- Integrated AI agents with enterprise APIs, microservices, and internal data systems for automated analytics and reporting.
- Built Agentic AI pipelines in Google Agent Space, integrating LLMs (GPT-4, Falcon) for dynamic multi-turn responses.
- Upgraded REST APIs with Django REST Framework and deployed AI services on Azure Kubernetes Service (AKS).
- Created ETL pipelines with Azure Data Factory, automating model training and data refresh cycles.
- Leveraged Azure OpenAI Service, Cognitive Services, and Synapse Analytics for NLP and model analytics.
- Systematized CI/CD pipelines using Azure DevOps, Docker, Kubernetes, and GitHub Actions.
- Monitored workloads using AWS CloudWatch, managed data with S3 Buckets, and optimized queries in PostgreSQL.

Python Developer

Fifth Third Bank

08/2024 - 02/2025 Texas

Financial service company providing banking, advisory and wealth management services

- Expanded and upgraded Python scripts using Pandas, NumPy, and SQLAlchemy for large-scale financial data extraction and transformation.
- Built and maintained ETL pipelines to integrate data from various sources into structured formats for analytics.
- Automated AWS resource management and service configuration, improving deployment efficiency with Boto3 and Docker.
- Designed RESTful APIs using Flask and FastAPI for backend data integration with client-facing platforms.
- Implemented robust testing frameworks using PyTest, enhancing backend service reliability and performance.
- Applied and developed NLP models for document parsing and sentiment analysis in financial reports using SpaCy and Transformers.
- Collaborated on optimizing PostgreSQL queries and developing CI/CD pipelines, ensuring improved system performance and scalability.

Python Developer

Moveate

04/2020 - 07/2023 India

Digital transformation consultants

- Designed and developed high-performance Python applications for backend automation, data processing, and workflow optimization.
- Engineered low-latency, scalable Flask and Django REST APIs to serve ML/NLP models, enhancing microservices architecture.
- Built and maintained ETL pipelines for integrating data from multiple sources into structured formats for analytics and reporting.
- Optimized multithreading and multiprocessing for concurrent data ingestion and I/O-bound operations, increasing processing efficacy.
- Implemented advanced data manipulation pipelines with Pandas, NumPy, and Polars, improving performance for millions of records.
- Integrated SQLAlchemy and PostgreSQL for high-throughput transactional queries and dynamic ORM data models.
- Automated CI/CD pipelines using Jenkins, Docker, and Git, streamlining build and deployment cycles and enhancing code reliability.

SKILLS

Python, SQL, Django, Flask, FastAPI, LangChain, Hugging Face, TensorFlow, PyTorch, Keras, Scikit-learn, Pandas, NumPy, SpaCy, NLTK, Transformers, Regex, PySpark, HTML, BeautifulSoup, Docker, Kubernetes, Jenkins, Azure DevOps, AWS (EC2, S3, Lambda, CloudWatch), Azure (OpenAI, Synapse, Data Factory, AKS), GCP, Git, GitHub, PostgreSQL, MySQL, Snowflake, MongoDB, Airflow, Spark, Kafka, Hadoop, Hive, PyTest, Selenium, VS Code, Jupyter Notebook, Linux, Agile, CI/CD

EDUCATION

Master's

University of Texas, Arlington, Texas

08/2023 - 05/2025
