Data Engineer

SUMMARY

IT professional with 5 years of experience in healthcare and consulting, specializing in analytics, database management and cloud. Seeking to apply expertise in a fast-paced, data driven environment to solve complex business challenges

SKILLS

Programming: SQL (Advanced queries, query optimization), Python (pandas), PySpark (Delta Lake, Z-ordering)

Cloud: Azure (Synapse, Data Factory, Data Lake), Databricks (Delta Lake, Unity Catalog), AWS (S3, Athena, Glue, Lambda)

Database: PostgreSQL (partitioning, indexing), SQL Server (T-SQL, performance tuning)

Data Modeling: Star schema, SCD Type 2, medallion architecture, dimensional modeling

Data Visualization: Tableau, Power BI

DevOps: CI/CD (Azure DevOps, Github Actions), Git, Docker, Terraform (IaC)

Collaboration: Jira (Agile), Confluence (documentation)

EDUCATION

Lewis University Romeoville, IL Master of Science in Data Science

CERTIFICATION

Databricks Certified Data Engineer Associate | Databricks Certified Associate Developer for Apache Spark 3.0 - Python
AWS Cloud Practitioner

Microsoft Certified Azure Data Engineer Associate | Microsoft Certified: Azure Database Administrator Associate

HashiCorp Certified: Terraform Associate

Tableau Desktop Specialist

PROFESSIONAL EXPERIENCE

Data Engineer | Capgemini | Chicago, IL

06/2024 - Present

- Designed and maintained scalable data pipelines in Databricks to support financial analytics and reporting, applying Delta Lake best practices including Z-ordering and partitioning, reducing job runtime by 15%.
- Implemented medallion architecture and automated data validation checks in PySpark for nightly ETL jobs, catching 20% more data quality issues before reaching downstream dashboards.
- Migrated a 500GB on-prem SQL server database to Azure Synapse, using Synapse Spark pools for transformations, improving query speed by 25%.
- Monitored performance of Azure SQL Database and Azure Blob Storage using Azure Monitor, achieving a 15% cost reduction through tuning and scaling.
- Integrated CI/CD pipelines with YAML and Azure DevOps for automated deployment of ETL workflows and dashboard refresh cycles. Developed and deployed infrastructure-as-code (IaC) with Terraform to provision Azure resources, cutting deployment time by 34%.

Data Analyst | BlueCross BlueShield | Chicago, IL

01/2022 - 06/2024

- Created materialized views and automated report generation, reducing delivery time from 2 hours to 45 minutes for actuarial and finance teams. Built a claims data mart in PostgreSQL using star schema. Implemented SCD Type 2 via PostgreSQL triggers enabling historical tracking of 100K+ claims.
- Identified \$50,000 in billing discrepancies through root cause analysis of focus audits and appeals following team processes.
- Updated system files to reflect new group business and benefit changes, performing quality audits on rate uploads and group paperwork, ensuring 98% accuracy across 200+ accounts.
- Developed Power BI dashboards with dynamic DAX calculations and row-level security, increasing secure access and usability for 200+ stakeholders.
- Ensured compliance with HIPAA, CMS, and ACA regulations, achieving 100% audit pass rates for two consecutive years.
- Collaborated with actuaries and business analysts to refine data models, improving claims adjudication accuracy by 15% through better data categorization.

Database Administrator | Medstrat | Downers Grove, IL

11/2019 - 12/2021

- Helped to manage a SQL Server database with 10,000+ patient records, including DICOM metadata and orthopedic procedure data, ensuring data integrity for surgical planning and billing.
- Provided system administration for Joints®/Echoes® PACS, supporting 5,000+ monthly DICOM image transfers with 99.9% uptime for 50+ medical staff.
- Assisted in setting up backup and recovery strategies (full and transaction log backups), reducing data recovery time from 4 hours to under 1 hour during system failures while maintaining HIPAA compliance.
- Assisted with database optimizations, adding indexes, partitioning tables, to improve query response times by 30%.
- Resolved 95% of day-to-day customer tickets within SLAs, addressing Linux server issues, network connectivity, DICOM image access, and Joints web/native app functionality.
- Utilized monitoring tools (sar, top, vmstat) to optimize server performance, reducing latency by 20% during peak usage.
