Chicago, IL | 847-571-8455 | indraayushjav9@gmail.com | [Github](#) | [LinkedIn](#)

Summary

Data Analyst with expertise in SQL, Python, and advanced Excel, experienced in conducting complex data analysis and building automated reporting solutions. Skilled in identifying gaps, recommending process improvements, and collaborating with leadership to drive change. Background includes data analytics roles at Discover Financial Services, BP, and Illinois Student Assistance Commission, with proven ability to deliver insights that support business decisions.

Experience

Illinois Student Assistance Commission, Community Outreach Deerfield, IL | May 2024 - Present

- Collected and analyzed data from 500+ students, designing a data forum to identify key performance indicators that improved student outreach strategies and enhanced engagement
- Leveraged data collected from 7+ schools to refine workshop processes, boosting participation efficiency by 25%

Discover Financial Services, Data Analyst Riverwoods, IL | June 2023 - Aug 2023

- Analyzed 100+ email campaign performance to optimize product strategy and improve targeting decisions, directly supporting credit and marketing teams
- Automated anomaly detection workflows using Python, Airflow, and AWS reducing reporting errors by 75%
- Deployed Tableau dashboards to deliver actionable insights to nontechnical stakeholders, enabling faster decisions

BP, Data Analyst Chicago, IL | Dec 2022 - May 2023

- Profiled 3 years of emissions data using Python, improving dataset usability for compliance reporting
- Visualized key emission trends in Excel enabling leadership to track progress towards sustainability goals
- Collaborated in Agile teams across data, finance, and strategy to deliver business insights with measurable impact

Illinois Design Consulting, Design Lead Champaign, IL | Jan 2022 - Dec 2022

- Designed and deployed business intelligence dashboards (Tableau/Power BI), translating raw client data into actionable insights
- Conducted user research and requirements gathering to inform system design and drive iterative improvements
- Streamlined user flows, reducing key process steps and accelerating response by 40%

Education

University of Illinois at Urbana-Champaign - B.S. Information Sciences + Data Science

- Selected Coursework: Consulting for Information Professionals, Data Mgmt Curation, Data Visualization
- James Scholar Honors

Projects

Retail Sales Analysis - SQL [Link](#)

- Queried large retail dataset to analyze category-level sales, customer spending trends, and high-value transactions
- Cleaned data by identifying and removing null values to improve dataset accuracy and reliability
- Delivered insights on sales patterns and customer demographics that could inform pricing, promotions, and customer segmentation strategies

Wine Review System - Python (Predictive Analytics) [Link](#)

- Developed and tuned regression models (Lasso, Ridge, Random Forest) to predict wine quality based on review metadata, enhancing model accuracy and business relevance
- Extracted top predictors of consumer preference to inform segmentation and product positioning strategies

Skills

- Data Science: Python (scikit-learn, pandas, numpy, matplotlib, NLTK), SQL, AWS, ETL, Airflow, Java
- Data Analysis: Tableau, Snowflake, API, Power BI, Google Analytics, Advanced Excel (Pivot Tables, VLOOKUP, INDEX/MATCH, SUMIFS, Macros)
- Other: Git, Agile Methodology, Microsoft Office Suite, SAP, Figma, QuickBooks, Collaboration & Leadership
