EDUCATION

Master of Science in Computer Science

University at Buffalo, The State University of New York

Aug 2023 – Jan 2025

Buffalo, NY

SKILLS

Languages: Python, Java, C#, JavaScript, SQL, Bash, Linux Shell Scripting, HTML, CSS

Web & Frameworks: Django, React, Node.js, .NET Core, ASP.NET MVC, jQuery, Tailwind CSS

Data & ML Libraries: PyTorch, TensorFlow, Scikit-Learn, OpenCV

Databases: PostgreSQL, MS SQL Server, MongoDB

Cloud & DevOps: AWS, Docker, Power Automate, Git

EXPERIENCE

Full Stack Developer

HeronAI

Apr 2025 – Oct 2025

Buffalo, NY

- Implemented full-stack features using **Django (Python)** and **React**, connecting internal dashboards with client data from **HubSpot**, **QuickBooks**, and **NetSuite** through the **Unified.to API**.
- Integrated caching with **Redis** to minimize duplicate API calls and enhance request throughput, improving average response time by 25%.
- Composed reusable **React components** and **Django templates** for finance and CRM dashboards, ensuring consistent layouts and responsive visualization.
- Explored cloud-based environments using **AWS EC2** during development and testing to verify API performance and compatibility across staging setups.
- Used **Git** for version control and participated in peer code reviews, maintaining consistent coding standards and smooth integration between backend and frontend systems.

Software Engineer

Cognizant Technology Solutions

Nov 2021 – Aug 2023

Bangalore, India

- Built and customized the **PepsiCo OneTouch store-management system** using **ASP.NET Core (C#)** and **Microsoft Dynamics CRM**, improving ticket routing and resolution efficiency across 2,000+ stores.
- Created **C# plugins and CRM workflows** to automate ticket escalation, prioritization, and notifications based on store zone and issue type, cutting manual triage time by 30%.
- Developed **Power Automate flows** connected to **Azure SQL** and **Dataverse** to detect duplicate tickets, trigger email alerts, and manage mail-queue limits, ensuring smooth daily operations.
- Added unit and integration tests for key **MVC controllers** using xUnit, increasing code coverage and preventing recurring production defects.

PROJECTS

YelpCamp - Full Stack Web Application

- Architected a campground management platform with **Node.js**, **Express.js**, **Vue.js**, and **MongoDB**, enabling full CRUD operations and secure role-based access for **100+ active users**.
- Integrated **MapTiler APIs** with Vue.js components to deliver interactive map visualizations and location search, enhancing user navigation and engagement.

Image Caption Generator

- Programmed a deep learning pipeline in **Python**, **PyTorch**, and **TensorFlow** using a **VGG16 CNN encoder** with an **LSTM decoder**, covering **98% of vocabulary** on the Flickr8k dataset.
- Refined training with a custom DataLoader and preprocessing steps, shortening training cycles and boosting BLEU score accuracy by **15%** over baseline.

Image Deblurring using GANs

- Implemented a **Generative Adversarial Network (GAN)** in **Python**, **TensorFlow**, and **OpenCV** to restore motion-blurred images, improving perceptual image quality by **30%** on benchmark datasets.
- Designed and trained a **U-Net-based generator** and **PatchGAN discriminator** with custom loss functions, optimizing convergence through learning-rate scheduling and data augmentation.
- Visualized training progress and results using **Matplotlib** and **OpenCV**, enabling qualitative analysis of restored images and easier model debugging.
