Education

Indiana University Bloomington

Masters of Science in Computer Science, GPA:3.71

August, 2023 – May 2025

Bloomington, Indiana

Amrita University Bengaluru

Bachelors of Technology in Computer Science and Engineering, GPA:8.55

August. 2017 – June 2021

Bengaluru, Karnataka, India

Relevant Coursework

- Data Structures
- Software Methodology
- Generative AI
- Database Management
- Machine Learning
- Web Development
- NLP
- Cloud Computing

Experience

Cisco Systems India Private Limited

Software Engineer

August 2021 – July 2023

Bengaluru, Karnataka, India

- Developed Flex Group in Tenant Manager microservices, enhancing management of GCP, AWS, and Azure for access, budgeting, and resource management, resulting in a 30% improvement in provisioning time and better billing visibility on the Multi-Cloud Management Platform (MCMP).
- Implemented Azure Management Group REST APIs to streamline subscription tracking processes; enhanced security and policy management, resulting in improved compliance metrics and a 40% reduction in policy violations across the platform.
- Enhanced testing cycles by developing regression scripts and Selenium automation, increasing defect fix coverage. Integrated these into the Jenkins Continuous Integration process, streamlining daily test suite reporting and boosting development pipeline efficiency by 40%.

Cisco Systems India Private Limited

Software Engineer Intern

February 2021 – July 2021

Bengaluru, Karnataka, India

- Engineered and deployed a suite of Selenium automation test scripts that eliminated 1,100 hours of manual testing annually; enhanced reliability through consistent execution, ensuring accurate results and reporting for stakeholders.
- Instituted a systematic API testing regimen using POSTMAN, revealing 20+ discrepancies in functionality prior to UI completion; this diligence resulted in higher product quality and contributed to a seamless SDLC.

Projects

SmartQuest: Document Insights & Q&A | *Python, Streamlit, Cohere API, TextBlob*

November 2024

- Innovated an application that efficiently extracts and analyzes text from various file formats (PDF, DOCX, TXT, Excel), providing users with accurate document summaries and sentiment analysis.
- Implemented interactive Q&A functionality using the Cohere API, allowing users to engage with document content through context-specific questions while ensuring data privacy by concealing sensitive information.

MovieMates: Booking Management System | *HTML, CSS, JavaScript, React, MongoDB, JIRA, NodeJS (MERN)*

April 2022

- Led a team of five as Scrum Master, ensuring smooth execution and adherence to Agile methods over four sprints.
- Implemented key features for the Movie Booking system, including movie search with filters, seat booking, food item selection, and automated email confirmations with QR codes.
- Designed and maintained UI and backend, enhancing user experience and system functionality.

Strength Training Activity Recognition | *Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*

April 2024

- Implemented wearable sensors like accelerometers and gyroscopes to classify human activities with smartwatches.
- Applied Feature Engineering strategies that transformed raw data into actionable insights, leading to the creation of 15 new predictive features that improved model performance metrics by 30% during validation stages.
- Explored machine learning algorithms (neural networks, random forests, decision trees, Naïve Bayes, KNN) with four feature sets. Enhanced exercise classification accuracy using accelerometers for repetition counting.

Certifications

- Databricks Generative AI Fundamentals
- MongoDB Certified Associate Data Modeler

Technical Skills

Languages: Python, Java, C, Golang, R Programming, HTML/CSS, JavaScript, SQL

Tools: VS Code, Git, Jenkins, Kibana, Docker, Postman, Android Studio, JIRA, Cohere AP

Frameworks: React, Selenium, Mocha/Chai, Hadoop,Streamlit
