Boston, MA | (339)-242-2610 | ishaan.bhutada@gmail.com | [linkedin.com/ishaan-bhutada](https://www.linkedin.com/ishaan-bhutada)

EDUCATION

Master of Science in Business Analytics

Carlson School of Management, University of Minnesota – Minneapolis, MN

Aug 2025

Bachelor of Technology in Computer Science Engineering

Savitribai Phule Pune University – Pune, India

May 2023

EXPERIENCE

CARLSON ANALYTICS LAB

Data Science Consultant

Minneapolis, MN

Sept 2024 – Present

- Built a multivariate regression model to forecast warehouse-level demand using grocery retail sales and market proximity, achieving RMSE under 10% of average demand, supporting resource planning and location decisions.
- Created an interactive Tableau dashboard with scenario simulation capabilities, enabling stakeholders to evaluate warehouse locations by adjusting weightage for cost, social impact, and market potential.
- Devised A/B testing experiment using stratified treatment/control groups based on Bayesian Performance Rating (BPR) and a proprietary HYPE metric; integrated opponent-adjusted metrics to isolate NIL policy effects, revealing a 7.4% decline in offensive efficiency adopted by UMN Basketball for strategic planning.

UBS BUSINESS SOLUTIONS

Software Development Engineer

Pune, India

Aug 2023 - May 2024

- Optimized trade data pipelines and ETL workflows across APIs, messaging systems, and databases using SQL and cross-functional collaboration, resulting in a 28% increase in data accuracy and a 32% reduction in reconciliation efforts.
- Analysed FX pricing API latency using SQL, system logs, and Python, delivering performance insights that helped reduce quote response time from 1.8s to under 300ms.
- Improved regulatory compliance by 34% and cut reporting delays by 40% through UPI assignment processes for FX derivatives, ensuring accurate submissions to CFTC/DTCC and reducing risk of penalties.

Software Development Intern

Jan 2023 - Jun 2023

- Partnered with operations and leadership teams to design a Tableau dashboard visualizing KPIs such as resolution time, SLA compliance, and team performance, enhancing stakeholder visibility and accelerating decision-making by 30%.
- Achieved 42% improvement in report performance and 58% reduction in manual reporting time by leading end-to-end migration of incident management dashboards from Tableau to Power BI, streamlining data workflows.

LOAD & ROAD INC

Business Intelligence Intern

Pune, India

Jan 2022 - Aug 2022

- Defined subscriber conversion funnel KPIs to analyse customer engagement trends, enabling data-driven marketing campaigns that contributed to a 22% increase in subscriber growth in Q2 2022.
- Developed an ETL pipeline using Python and advanced SQL, automating complex data transformations and reducing data processing time by 38%, improving data quality for downstream predictive analytics modelling.

DATA SCIENCE PROJECT

- Stock Auction Price Forecasting** | Tech: CatBoost, LSTM, Python
Developed stacked CatBoost-LSTM model to forecast NASDAQ auction closing prices in final 10 minutes; achieved MAE < \$0.25/share, enabling high-frequency trading and capturing short-term price trends.
- Sign Language Interpretation using Finger Motion Capture** | Tech: CNN, OpenCV, TensorFlow, Python
Achieved 99.3% gesture accuracy engineering a real-time ASL translation system using CNNs and hand tracking, advancing accessibility through deep learning and computer vision (published in iJRSET).
- Loan Default Risk & Anomaly Detection** | Tech: Python, XGBoost, Isolation Forest, SMOTE, SHAP, scikit-learn
Built a dual-model pipeline using XGBoost and Isolation Forest to predict loan defaults (93% AUC) and detect behavioural anomalies; optimized with SMOTE and SHAP to handle class imbalance enhancing model interpretability.
