Summary

In my current position I work on the development of a UI framework for Amazon's FireTV, which uses a custom version of Android OS. I develop primarily in Kotlin and occasionally in Java and React. In my previous position (at Nexient), I worked on the development and maintenance of a performance evaluation tool for healthcare providers. During my time at that position, I wrote front-end code for an Angular UI, and back-end code for C# and Node.js services. In August 2019 I graduated with an M.S. in Computer Science with a concentration in Software Development with a GPA of 3.64.

Technical Skills

Programming Languages

- Java
- Kotlin
- C#
- Python
- Javascript/Typescript
- HTML
- CSS
- Node.js
- SQL

Frameworks

- Angular
- Android
- React

Tools

- Microsoft Visual Studio
- Microsoft Visual Studio Code
- Android Studio
- Gradle
- Eclipse
- IntelliJ

Cloud Platforms

- Azure
- AWS

Misc

- Object-Oriented Design / Programming

Work Experience

Amazon – Sunnyvale, CA

Software Development Engineer: September 2021 – Present

Worked with stakeholders to gather requirements for, design, and implement UI components for framework for the FireTv.

- Developed with Kotlin on Android OS
- Developed with React Native

Nexient – Ann Arbor, MI

Software Developer II: November 2020 – September 2021

Software Developer I: October 2019 – November 2020

Worked on the development of an online performance tool for health care providers. I was working directly with clients to specify requirements, design and implement new types of reports to improve client evaluations.

- Full stack development
- Angular front-end using ngRx and primeng
- Node.js back-end used for interactions between the UI and cosmos DB
- C# backend-end used for generating reports

Intevac Inc. – Santa Clara, CA

Software Intern: August 2019 – October 2019

Worked with stakeholders to gather requirements for, design, and develop software applications for hardware testing.

- Developed a tool to test the infield update functionality of a new camera in development
 - Developed a GUI written in C# WPF and emulates a host system protocol over I2C interface
- Developed a tool to interact with a test board which operated multiple cameras
 - A C# WPF GUI controlled the test board using a UART interface

- The tool was used internally for the system testing and also by the external customer to assist with system integration

Course Work

Mobile Systems and Applications - Columbus State University

June 2019 – August 2019

Studied Mobile App Development in Java using Android Studio

- Book List Application
 - Used Google Books API to find information on a given book
 - Books persisted through Room Database
- Diary Application
 - Entries persisted through Room Database
 - Collected weather information through NOAA API
 - Used Google Map V2 API to display entry location
- Calculator Application
- Tic-Tac-Toe Game
- Multi-threaded Stopwatch Application

Java 8 Training

May 2019 – July 2019

Studied Core Java, Java 8, and Spring/Springboot

- Banking Application
 - Contained customer and employee views to allow various banking applications
 - Used MySQL Database
- XML Parser
 - Used multi-threading to watch a folder for the insertion of new XML files
 - XML files were parsed for their information which was saved in a database
- Loan Application
 - Created Loan Type Report Generator using Java Spring
 - Acquired data by accessing database using JDBCTemplate
 - Used Java Spring MVC, JSps, and Servlets to enter application search criteria and display report

Education

Columbus State University - M.S. in Computer Science, Concentration in Software Development

January 2018 – August 2019

UC Santa Cruz - B.S. Biochemistry and Molecular Biology

October 2014 - June 2017
