

Ivneet Chatly

Data Scientist/ Data Analyst

VA | Mobile:- (571)363-5540

Email: ischatly@gmail.com

SUMMARY

- Accomplished Data Analyst and Business Analyst with 6 years of experience in the financial, healthcare, banking sectors and public sector, delivering data-driven insights and strategic solutions.
- Proficient in programming languages such as Python and SQL, with a strong foundation in data analysis and manipulation.
- Experienced in utilizing packages like NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, and TensorFlow to extract valuable insights from data.
- Skilled in data visualization using tools such as Tableau, Power BI, and Advanced Excel, with expertise in creating interactive dashboards and reports.

SKILLS

Programming Language:	Python, R, Scala
Packages:	NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow, ggplot
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook, Spyder
Database:	MySQL, PostgreSQL, SQL Server, Oracle
Project Management Tools:	Asana, Trello, Jira, Rally
Documentations:	FRD, BRD, SRS, Test Plan, User Guide
Cloud Computing	AWS (EC2, ENI, Load Balancing, Auto Scaling, Lambda, Beanstalk IAM, CloudFormation, S3, Sage maker, Redshift, Glue, Athena, Route 53, DynamoDB, RDS, CloudWatch), Microsoft Azure, Google Cloud Platform
Other Technical Skills:	ETL Tools, ServiceNow, Advance Analytics, Informatica, Data Mining, Data warehousing, Data transformation, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Agile Development, KPI, User Acceptance Testing(UAT), Alteryx, Business Analysis (Cost/benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis), Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, MS Office and Snowflake, Informatica, PowerCenter
Version Control Tools:	Git, GitHub
Operating Systems:	Windows, Linux, Mac OS

EXPERIENCE

Data Scientist/ Sr. Data Analyst | BLN 24 (Contractor United States Census Bureau)

Aug 2024- Present

- Designed and implemented ETL pipelines for 2020 Adobe Analytics historical data, extracting large zip files from S3 buckets using the Boto3 SDK. Optimized data mapping and cleansing processes, including standardizing date formats with Python scripts, which improved data accuracy by 20%. Successfully integrated the processed data into an existing WEB KPI Dashboard.
- Developed web KPI dashboard to display key metrics, such as site search views over time, top site search terms, and top site searches by page clicked, resulting in a 25% improvement in data visibility and a 30% reduction in time spent generating manual reports.
- Integrated Google Analytics with Census to provide detailed insights into website traffic, user behavior, and demographic trends, enabling data-driven marketing and product decisions.
- In support of the 2030 strategic goals, spearheaded the development of the Census Test 2026 dashboard for Partnership Engagement and Partner Profiles. This involved close collaboration with stakeholders and the data team to gather, refine, and document requirements, ultimately enhancing stakeholder satisfaction by 30%.
- Conducted data mapping, cleaning, and validation processes, ensuring data accuracy and consistency. Developed scripts to integrate 5 years of ACS data into the database and designed database tables, leading to a 20% improvement in data processing efficiency and a 25% reduction in data integration errors.
- Designed and developed the Partnership Engagement and Partnership Profiles dashboard, integrating neural network models to enhance key metrics such as Engagement Map, HUP Demographics, HUP Partnership Details, Outreach Activities, Partners by Geography, and Top Partners by Community Served. By applying advanced

machine learning techniques, the dashboard provided more accurate predictions and deeper insights, resulting in a 30% improvement in stakeholder decision-making efficiency and a 25% increase in data accessibility.

- Led the seamless transition from Tableau to Power BI by collaborating as a BI analyst to create comprehensive technical documentation. This included detailed screenshots, Python scripts, data sources, custom SQL queries, joins, tables, and filters for 10 critical dashboards, ensuring smooth adoption and continuity of business insights.
- Analyzed US census data for population segmentation using K Means Clustering and helped the business to create targeted marketing campaigns.
- Used SQL functions to clean data by handling missing values, correcting data types, and removing duplicates before loading.
- Utilized SQL and BI tools (e.g., Tableau, Power BI) to generate actionable insights and data visualizations for product teams and stakeholders.
- Trained CNN to analyze satellite images and predict the population density within a specific area, such as a census block.
- Used Neural Nets and analyzed satellite imagery to identify new construction sites, providing insights into potential population shifts.
- Used tableau to present complex demographic information in a clear and accessible manner using graphs and maps.
- Ensured the accuracy and quality of census data by applying statistical quality checks.
- Implemented data quality checks with SQL constraints to ensure data integrity during the loading process.

Data Analyst | Capital One, VA

Apr 2021 – April 2024

- Worked with Data Management team to analyze Reinsurance Data using tools like SQL, Access, Excel (Lookups, Pivot tables) and predicting any future impacts on business.
- Performed Exploratory Data Analysis (EDA), feature pivoting, and visualization on attributes data to identify trends and validate assumptions using Python Seaborn and Matplotlib.
- Familiarity with Jira add-ons like Grant Chart, Big Picture and etc.
- Integrated and upgraded Jira with other Atlassian Applications.
- Worked on Agile Methodology in Scrum Implementation using Jira.
- Used AWS EC2 console to launch cloud instance, chose Amazon Machine Image (AMI) to launch virtual machine, and configured the instance.
- Queried data using data warehouse infrastructure tool such as Hive to process structured data in Apache Hadoop.
- Collaborated with cross-functional teams to define product KPIs and track progress through A/B testing, user feedback, and engagement analytics.
- Streamlined ETL workflows by using Databricks notebooks to automate data transformation and cleaning processes in real-time.
- Integrated Kafka with various data lakes and real-time analytics platforms to facilitate seamless data flow and processing across multiple data sources.
- Created comprehensive financial forecasts using SAS, including budgeting models and revenue projections.
- Created Sage Maker Notebook instances using Cloud Formation Template.
- Performed production level test on snowflake using dbt.
- Created Functional Requirement Documents (FRDs) that provide functional specifications, user processes, and data models based on complicated business needs. This resulted in 30% less rework and increased clarity during the system development stages.
- Applied Unified Modeling Language (UML) methodologies to design Use Case Diagrams, Activity Diagrams, Sequence Diagram, ER diagrams & Data Mapping.

Data Analyst | Aetna, VA

Jan 2020 – Mar 2021

- Collected business requirements to set rules for proper data transfer from Data Source to Data Target in Data Mapping
- Responsible for interacting with the business analysts and the business partners to identify information needs for the business requirements for DAR.
- Involved in Facets System implementation, electronic claims and benefits configuration set-up testing, inbound/outbound interfaces and extensions, Load and Extraction programs involving HIPAA 835 and proprietary format files and reports development.
- Participated in various Healthcare presales initiatives for EHR applications, HIPAA 4010-HIPAA 5010 and ICD9 - ICD10 conversions.

- Worked with ETL specialists to migrate data into DWH & involved in data modeling.
- Defined functional test cases documented and executed test scripts in the Facets system.
- Created thorough Business Requirement Documents (BRDs) that included success criteria, stakeholder requirements, and business context. ensured a 25% reduction in ambiguity by ensuring consistency with industry best practices and regulatory compliance standards (e.g., GDPR, HIPAA).
- Worked on HIPAA transactions and code sets standards according to the test scenarios such as 837 health care claim transactions.
- Gathered requirements and modeled the data warehouse and the underlying transactional database & performed Gap analysis of the processes to identify and validate the requirements.

Data Analyst, Cognizant, VA

Mar 2019-Dec 2019

- Extracted and cleaned large datasets from diverse databases, employing Python scripts for updates, file manipulation, and SQL/Hive scripts for data quality.
- Utilized Python and Tableau for creating diverse visualizations, while ensuring data reporting consistency across regions and hierarchies.
- Implemented AWS Code Deploy for code deployment and managed AWS Cloud, enhancing efficiency through standardized ELT processes.
- Maintained Excel workbooks, developed pivot tables, and produced reports by exporting data from SQL databases, ensuring accurate and updated information.
- Provided daily, weekly, and monthly reports from databases, analyzing data to create dashboards and charts depicting key metric trends.
- Collaborated with managers and cross-departmental teams, collecting data requirements, and communicating results for informed decision-making in operations.

EDUCATION

Master of Commerce (Major Business Administration) - Panjab University, Ludhiana, Punjab, India

Bachelor of Education - Panjab University, Ludhiana, Punjab, India

Bachelor of Commerce (Major Business Administration) - Panjab University, Ludhiana, Punjab, India

CLEARANCE

Active Public Trust Clearance — eligible for roles requiring government security clearances
