

Professional Summary

Experienced warehouse operations leader transitioning to software developer, combining 18 years in distribution and inventory management with hands-on coding skills to deliver efficient, tech-driven solutions. Proven track record of developing in-house applications that streamlined processes within departments, improved data accuracy, and increased accountability. Recently completed a B.S. in Computer Science with a focus on software development and operating systems. Eager to leverage leadership expertise and technical proficiency in a software engineering role.

Skills

Programming: Python, SQL

Concepts: Object-Oriented Programming, Data Structures, Algorithms, Unit Testing, Asymptotic Analysis, Big O Notation

Tools: Bash, Visual Studio Code, Vim, Git

Systems: GNU/Linux, Windows, Windows Subsystem for Linux (WSL), MySQL Server

Professional Experience

Systems Analyst

Forever 21 Ecommerce — Los Angeles, CA
2014 – 2016

- Engineered in-house applications using Microsoft Access, VBA, and MySQL Server to automate and streamline ecommerce distribution tasks.
- Designed and implemented a cycle-count program, improving inventory accuracy by 60%, boosting efficiency by 40%, and adding employee accountability.
- Built a productivity reporting tool, eliminating manual data entry and saving an estimated 20 hours per week.
- Developed a cross-department personnel transfer tracking utility, increasing workflow visibility and operational efficiency for a 1200+ peak-season workforce.
- Trained leadership staff on application usage, resulting in 100% adoption within 3 months on average.

Distribution Specialist

Various Employers — California

1997 – 2013

- Led teams of up to 20 staff while overseeing order-fulfillment, shipping, receiving, and inventory processes, ensuring smooth operations and on-time delivery.
 - Created and deployed order fulfillment, inventory control, and cycle count applications using Microsoft Access and SQL to automate warehouse functions.
 - Maintained productive working relations with upper management by being quick to respond to their needs and requests.
-

Education

B.S. in Computer Science (Specialization: Software and Systems)

University of California, Irvine

2017 – 2023

Relevant Coursework: Data Structures, Algorithms, Software Engineering, SDLC

Interests

Software development as both profession and hobby — solving coding challenges, learning new technologies, and exploring machine learning and AI advancements.
