Education

University of Colorado Boulder

Master of Science in Data Science GPA: 3.9/4

August 2023 – May 2025

Boulder, CO

Jawaharlal Nehru Technological University Kakinada

Bachelor of Technology in Computer Science and Engineering CGPA: 8.21/10

August 2017 – July 2021

Kakinada, AP

Experience

Tata Consultancy Services

Data Engineer - Developer

August 2021 – July 2023

Hyderabad, India

- Developed a Python script to automate database timezone conversion, reducing manual errors by **30%** and enhancing accuracy and efficiency.
- Increased data processing efficiency by **20%** by optimizing Teradata ETL processes with Kafka and JSON, aligning with business requirements.
- Achieved a **15%** reduction in data mismatches by leading Teradata data validation, ensuring integrity and consistency through strategic adjustments.
- Spearheaded SQL procedure migration to Snowflake with DAGs, improving efficiency and management by **25%**.
- Created Airflow and Kafka pipelines from Teradata to Snowflake, developing seamless data pipelines and achieving **99%** reliability.
- Introduced a Python script for post-migration validation, reducing manual efforts by **40%** and ensuring cross-platform consistency.
- Enhanced database management efficiency by developing a script to identify dependencies, increasing efficiency by **30%**.
- Ensured **100%** code integrity and streamlined deployment across environments by mastering Git for version control.
- Reduced manual workload by **20%** and was recognized for exceptional contributions and knowledge transfer, awarded for innovative scripting solution.

Projects

Machine Learning Project – Job Recommendation System | *Python, NLP, Word2Vec, spaCy* **Oct 2023 – Dec 2023**

- Developed a content-based job recommendation system using NLP techniques to analyze user resumes and job postings, effectively matching candidates to jobs based on skills and location preferences, enhancing job search precision.
- Achieved **82%** precision in job recommendations, significantly improving the job search experience by aligning opportunities with user skills and preferences, demonstrating the system's effectiveness.

Deep Learning Project – Text to Image Synthesis | *Python, Pytorch, Keras, GAN's* **March 2021 – May 2021**

- Led an innovative project to transform text descriptions into visual images, revolutionizing digital media interaction and fostering new avenues for visual creativity.
- Achieved a project milestone with an Inception Score of **4.86** and reduced the FID to **28.92**, demonstrating the model's superior capability in generating precise and realistic images from text.

Skills

Programming Languages: Python, R, C, C++/Cpp, Octave, Java.

Database Technologies: SQL, Teradata, Snowflake, PL/SQL, Oracle, RDBMS.

Key Skills: Data Science, Machine Learning(ML), Deep Learning(DL), Artificial Intelligence(AI), Natural Language Processing(NLP), Computer Vision(CV), Data Analysis, Data Visualization.

Software and Tools: Microsoft Office(Excel,Word,Powerpoint),Jupyter, Git,Docker,Airflow,Kafka, Power BI,Tableau.

Cloud Technologies: AWS (EC2, S3, Lambda, RDS, DynamoDB.)

Big Data Technologies: Apache Spark, Hadoop.

Frameworks & Libraries: PyTorch, Keras, TensorFlow, Scikit-Learn, Pandas, Numpy.

Web Technologies: HTML, CSS, JavaScript, PHP

Additional Skills: Data Structures and Algorithms(DSA), Mathematics, Statistics.

Soft Skills: Team player,Time management,Problem-solving,Self-motivated,Leadership,Multi-tasking,Easily adaptable,Collaborative teamwork.

Certifications

- Machine Learning : Stanford University via Coursera.
- IBM Data Science Professional Certificate
- Applied Natural Language Processing: IIT Madras via NPTEL.
