

JAGADISH CHANDRA

Data Scientist (Healthcare)

San Francisco, CA Open for relocation to Seattle, WA | Plano, TX | Chicago, IL | New York, NY

jagadishtupakula95@gmail.com | (205) 566-2553 | <https://www.linkedin.com/in/jagadish-chandra-8748b9391/>

SUMMARY

Experienced Data Scientist with a 5 years strong background in healthcare analytics, machine learning, and cloud computing. Proven track record of driving AI-driven research and optimizing data pipelines to enhance clinical decision-making and operational efficiency. Skilled in leading cross-functional teams, delivering actionable insights, and ensuring compliance with healthcare regulations.

PROFESSIONAL EXPERIENCE

Pfizer

Jan 2025 - Present

Data Scientist (Associate Scientist)

La Jolla, CA

- Led AI-Driven Oncology Research: Spearheaded the development of machine learning models using Python and TensorFlow to predict patient responses to novel oncology therapies, enhancing personalized treatment strategies.
- Streamlined Data Pipelines: Implemented automated ETL processes with Apache Spark and SQL, reducing data processing time by 40% and ensuring timely delivery of insights to clinical teams.
- Enhanced Data Visualization: Designed interactive dashboards using Tableau and Power BI, translating complex clinical data into actionable insights for stakeholders, improving decision-making efficiency.
- Advanced Statistical Analysis: Applied statistical techniques such as regression analysis and survival modeling to interpret clinical trial data, supporting regulatory submissions and publications.
- Cloud Computing Proficiency: Utilized AWS and Google Cloud Platform for scalable data storage and processing, facilitating efficient management of large-scale oncology datasets.
- Collaborative Team Leadership: Led cross-functional teams of data scientists, clinicians, and biostatisticians, fostering a collaborative environment to achieve project milestones and objectives.
- Effective Communication: Presented complex data findings to non-technical stakeholders, ensuring clear understanding and alignment on project goals and outcomes.
- Ethical Data Practices: Ensured compliance with HIPAA and GDPR regulations, maintaining patient confidentiality and data integrity throughout all projects.
- Continuous Learning and Adaptability: Engaged in ongoing professional development through courses in AI and machine learning, staying current with industry trends and technologies.
- Problem-Solving and Critical Thinking: Identified and addressed data inconsistencies and anomalies, implementing solutions that improved data quality and analysis accuracy.

Johnson & Johnson

June 2024 – Dec 2024

Senior Healthcare Data Analyst

San Francisco, CA

- Led real-time surgical data integration, combining imaging, patient records, and OR sensor data, reducing surgical errors by 18%, using Python and SQL.
- Spearheaded AI-driven decision support tools deployment through the Polyphonic™ AI Fund for Surgery, improving clinical workflow efficiency by 22%, leveraging Tableau and Power BI.
- Collaborated on developing and testing real-time AI models for surgical diagnostics, enhancing accuracy for high-risk surgeries, using TensorFlow and PyTorch.
- Applied CNNs and reinforcement learning to analyze unstructured clinical data, improving surgical decision-making by providing predictive insights and AI-driven recommendations.
- Utilized Python, R, and Tableau to process and present complex healthcare data, enabling real-time surgical insights and improving clinical decision-making efficiency.
- Designed scalable data pipelines using AWS, Azure, GCP, Spark, and Hadoop to efficiently process and analyze large healthcare datasets for AI models.
- Managed cross-functional teams, communicated complex data findings to stakeholders, ensuring alignment between clinical, product, and engineering teams for successful project outcomes.
- Ensured HIPAA, GDPR, and FDA compliance in data usage and AI models, maintaining high standards of data privacy, security, and model integrity.
- Applied NLP and AI for analyzing medical texts and surgical reports, enhancing patient treatment personalization and improving clinical outcomes using spaCy and Hugging Face.
- Demonstrated leadership by mentoring junior analysts, optimizing data management processes, and leading AI model implementations to improve surgery outcomes and decision-making.

data analyst

India

- Analyzed and integrated data from newly acquired Radiant Hospitals (Sambalpur, Odisha), contributing to the successful addition of 125 beds and enhancing operational efficiency for the cancer care network.
- Monitored and reported on key performance metrics such as bed occupancy rates and patient throughput, leading to a 15% improvement in resource utilization across newly expanded facilities in Bengaluru and Ahmedabad.
- Collaborated with cross-functional teams to assess the impact of the network expansion on financial performance, providing data-driven insights that contributed to a 20% increase in revenue generation from new facilities.
- Expert in SQL and Python (Pandas, NumPy) for data wrangling and analysis, enabling accurate extraction and transformation of large-scale healthcare data for performance analysis.
- Created automated dashboards in Tableau and Power BI to visualize hospital metrics, improving data accessibility for stakeholders and reducing report generation time by 30%.
- Strong attention to detail in data cleaning and validation, ensuring 99% data accuracy, leading to reliable insights for strategic decision-making and regulatory compliance (HIPAA, GDPR).
- Developed ad-hoc reports on operational efficiency, presenting complex data insights to senior management and supporting critical decisions on patient care and hospital capacity planning.
- Collaborated effectively with project managers, IT teams, and healthcare professionals to integrate data systems and improve workflow efficiency across newly integrated cancer care centers.
- Proven ability to communicate data findings to non-technical stakeholders, translating complex analytics into actionable insights that drive operational improvements in healthcare services.
- Demonstrated problem-solving skills by identifying discrepancies in patient data and working with cross-functional teams to rectify issues, reducing reporting errors by 25%.

TECHNICAL SKILLS

Machine Learning & AI: TensorFlow, PyTorch, Scikit-learn, NLP (spaCy, Hugging Face), Reinforcement Learning, RAG (Retrieval-Augmented Generation), LLM Fine-tuning (Meta Llama 3.1/3.3)

Programming & Scripting: Python, R, SQL, JavaScript

Data Engineering: Apache Spark, Hadoop, ETL Automation, Data Pipeline Optimization, AWS EKS

Cloud Platforms: AWS, Google Cloud Platform (GCP), Microsoft Azure

Data Visualization & BI Tools: Tableau, Power BI, Matplotlib, Seaborn

Statistical & Analytical Techniques: Regression Analysis, Survival Modeling, Time-Series Forecasting, Hypothesis Testing

Databases: MySQL, PostgreSQL, Snowflake, BigQuery

Healthcare Analytics: Clinical Trial Data Analysis, Oncology Research, AI in Surgery, Real-Time Diagnostics, HIPAA/FDA/GDPR Compliance

Project Management & Collaboration: Agile/Scrum, Cross-Functional Team Leadership, Stakeholder Communication, Technical Documentation

Tools & Technologies: Git, Docker, Kubernetes, Jira, Excel (Advanced), Google Workspace

EDUCATION

University of Alabama at Birmingham

Master of Data Science
