About

Entry-level Data Analyst with dual internship experience in Excel, SQL, Tableau and Power BI. Developed dashboards and automated workflows to enhance reporting efficiency by 40% and deliver actionable insights. Advanced Oracle SQL skills support data-driven decision-making in fast-paced environments.

Education

Rasmussen University

Jun 2024

Bachelor's degree, Computer Science

- **GPA:** 3.72

Work Experience

IT Expert System, Inc

Feb 2025 - Present

Data Analytics Intern

Schaumburg, Illinois, United States

- Designed Excel dashboards with slicers, combo charts, and KPIs to visualize sales insights across 12+ product categories, supporting data-driven decision making.
- Automated reporting workflows using Power Query and VBA to reduce manual effort by 40%, streamlining data processing and reporting.
- Executed Oracle SQL queries with JOINS, filters, and aggregates on datasets exceeding 10,000 records to identify product trends and provide actionable insights.

Oeson Learning

Jan 2025 - Apr 2025

Data Analytics Intern

Madhya Pradesh, India

- Cleaned and analyzed over 5,000 rows of structured data using Python (Pandas) for exploratory data analysis, uncovering customer behavior patterns and seasonal trends.
- Built 3 Tableau dashboards featuring region-wise filters and KPIs to visualize customer performance across North, Central, and South India.
- Delivered comprehensive reports and dashboards with actionable insights and region-specific recommendations for stakeholder reviews.

Projects

E-Commerce Sales Dashboard & Forecasting Models

Built Excel

- Created 3 Excel dashboards using PivotTables and combo charts to forecast revenue across 10+ categories and analyze sales cycles.
- Automated What-If Analysis to project trends with $\pm 15\%$ margin, enabling monthly planning and ROI discussion.
- Delivered visual reports shared on LinkedIn and reviewed by internship mentor for stakeholder alignment.

Data Analyst Project - Business Insights from EV Dataset (Python, Pandas, Matplotlib)

Available on request

- Performed data analysis on structured EV data using Python (Pandas) and Matplotlib for visual reporting in Jupyter Notebook.

SQL Analysis Project - Business Insights & Reporting (RSVP Movies)

my LinkedIn-SQL Capstone

- Developed advanced SQL queries using JOINS, GROUP BY, HAVING, and subqueries to analyze global movie release trends.
- Analyzed release patterns to support global movie planning and regional segmentation strategies
- Packaged query outputs into business-ready reports for regional planning and stakeholder review.

Superstore Sales Performance Dashboard

my LinkedIn-Tableau Dashboard

- Designed Tableau dashboards to analyze sales performance by customer segment, region, and category.

Stock Market Analysis Using Excel & Statistics

my LinkedIn-Statistics Project

- Calculated descriptive statistics and regression for stock data
- Created scatter plots, trendlines, and regression models using Excel to visualize comparative volatility and return rate.
- Compiled dashboard report summarizing insights for mentor evaluation and LinkedIn showcase presentation.

Skills

- **Tools & Languages:** Excel, SQL, Python, Tableau, Power BI, AWS (Amazon Web Services), Jupyter Notebook
- **Libraries & Automation:** Pandas, Matplotlib, NumPy, Visual Basic for Applications (VBA), Pivot Tables
- **Analytics Concepts:** Exploratory Data Analysis, Descriptive Analysis, Regression Analysis, Forecasting, Hypothesis Testing, Data Cleaning

Certifications
