

# Mohammed Jahangir

mohammedjahangirm40@gmail.com | 551-375-9339

## PROFESSIONAL SUMMARY

---

- Results-driven Senior Data Analyst / Developer – Advanced with 7 + years of experience in data management, ETL design, and business analytics across financial and healthcare domains.
- Strong proficiency in SQL and Python for data access, transformation, automation, and statistical analysis.
- Experienced in building and validating data models, metadata frameworks, and ETL pipelines within Agile delivery environments.
- Hands-on expertise in analyzing and improving data sourcing processes across business areas to ensure data quality and governance.
- Proven ability to review requirements, develop estimates, and coordinate cross-functional deliverables from data ingestion to reporting.
- Knowledge of columnar database technologies such as Redshift and Vertica for scalable data analytics.
- Recognized for attention to detail, excellent communication, and a collaborative approach to continuous improvement.

## SKILLS

---

Data Analysis & Modeling: SQL (joins, CTEs, window functions), Data Profiling, Normalization, Star Schema Design, Metadata Management

Programming & ETL: Python (Pandas, NumPy, PySpark basics), ETL Automation, Data Wrangling, Excel Macros, Shell Scripting

Databases & Platforms: SQL Server, Oracle, PostgreSQL, Redshift, Vertica, Snowflake, Azure Data Factory, Databricks

Reporting & Visualization: Power BI, Tableau, Jupyter Notebooks, Data Studio, Ad-hoc Reporting / KPI Dashboards

Data Governance & Quality: Source-to-Target Mapping, Data Validation, Audit Checks, Documentation, Traceability Matrix

Project Delivery & Tools: Jira, Confluence, Agile Scrum, SDLC, Version Control (Git), Requirements Analysis, Peer Review

Soft Skills: Analytical Thinking, Communication, Presentation, Stakeholder Collaboration

## EMPLOYMENT HISTORY

---

### Trestellae Inc | *Senior Data Analyst* | Feb 2025 – Present | (USA-Remote)

- Reviewed business requirements and defined data delivery specifications for cross-departmental projects.
  - Designed and validated ETL workflows for data migration between legacy systems and cloud warehouses.
  - Wrote complex SQL queries for source-to-target comparisons and data quality assessments.
  - Automated data validation and reporting tasks using Python and Excel Macros, improving efficiency by 35 %.
  - Collaborated with business and engineering teams to refine data models and delivery criteria.
  - Prepared metadata documentation and ensured lineage compliance for audit reviews.
-

**Capital One | Data Engineer | May 2024 – Nov 2024 | (USA-Remote)**

- Participated in data requirement reviews and test case design for risk analytics and reporting systems.
- Developed ETL components in Python and SQL to ingest and transform financial datasets.
- Validated data flows across Redshift and Snowflake platforms to maintain accuracy and timeliness.
- Designed automated source-to-target reconciliation frameworks for regulatory data feeds.
- Partnered with Agile teams to plan sprints, prioritize data defects, and achieve UAT sign-off.
- Delivered presentations on data issues and recommendations to business stakeholders.

**Infosys Limited | Senior Data Analyst | Oct 2021 – Aug 2023 | (India)**

- Gathered and analyzed data requirements for enterprise data warehouse and reporting projects.
- Designed data mappings and ETL test plans for batch and incremental loads.
- Optimized SQL queries and views for faster data retrieval and report refresh times.
- Contributed to ETL automation through Python scripting and parameterized SQL jobs.
- Maintained metadata repositories and data catalogs to enable data traceability.
- Worked in Agile environment using Jira for story tracking and defect management.

**HCL Technologies | Data Analyst | Sep 2018 – Oct 2021 | (India)**

- Conducted ETL testing and data validation for data warehouse applications supporting insurance and retail domains.
- Created SQL scripts for data comparisons and reconciliation reports.
- Developed Python scripts for data profiling and error logging automation.
- Participated in requirements analysis and impact assessments for new data feeds.
- Ensured compliance with data governance and auditing policies.
- Supported Agile testing sprints and maintained traceability matrices for UAT.

**JSS Health Care | ETL Intern | May 2017 – Jun 2018 | (India)**

- Developed ETL workflows in Informatica PowerCenter for patient data processing, ensuring compliance with HIPAA and FHIR standards, integrating healthcare data for downstream reporting.
- Optimized data transfer and integration processes by leveraging secure protocols like SFTP and HTTPS, ensuring regulatory compliance and data integrity.

**EDUCATION**

---

- MASTERS IN DATA ANALYTICS, *Clark University, Worcester, USA*

*Dec 2024*

---
