

EDUCATIONAL CREDENTIALS

Hofstra University
Masters in Health Informatics

Dec 2024
Hempstead, NY

SKILLS

Programming: SQL, Python,

Data Visualization: Tableau, Power BI, Excel (Pivot Tables, Macros)

Data Processing & ETL: ETL Pipelines, Data Governance

Project Management: Agile Methodologies

Certifications:

FEMA (ICS-100 & IS-700) – Demonstrates understanding of organizational response to healthcare emergencies.

Introduction to AI by IBM – Foundation in applying AI/ML techniques, particularly in healthcare settings.

EXPERIENCE

STERLING UNIVERSAL GROUP

Sep 2023 – Jan 2025

Research Intern

Hicksville, New York

- Reduced manual data validation efforts by 50% by automating data quality checks using SQL and Python scripts.
- Optimized data processing efficiency by 40% by implementing AI-driven solutions to detect anomalies in real-time prescription data.
- Conducted data analysis and visualization on large-scale healthcare and financial datasets, improving decision-making for senior stakeholders.
- Developed Tableau dashboards to track real-time prescription trends, reducing off-label use by 30% and improving medication access for patients.
- Assisted in metadata consolidation for AI-based projects, ensuring consistent data governance across multiple sources.
- Enhanced data accuracy by 25% by identifying gaps in data assets and recommending improvements in data lineage tracking.
- Conducted root cause analysis for data inconsistencies, resolving 95% of identified data integrity issues within SLA timelines.
- Managed and updated project backlog in Jira, improving sprint efficiency by 20%.

PRISTEN IT

Nov 2021 – July 2022

Data Analyst

Hyderabad, India

- Decreased data quality issues by 40% through proactive monitoring, metadata management, and automating data cleansing processes.
- Increased data accuracy by 50% by redesigning data validation frameworks, ensuring clean data ingestion into reporting pipelines.
- Conducted end-to-end data analysis on large financial datasets to identify inconsistencies and optimize data workflows.
- Automated data reconciliation processes, reducing manual effort and improving audit accuracy by 30%.
- Created analytical dashboards in Tableau and Excel to provide real-time insights on data quality trends and business performance metrics.
- Assisted in translating business requirements into technical specifications, ensuring seamless implementation of data-driven solutions.

DIVIS LABORATORIES

Data Analyst

Oct 2020 –Sep 2021

Hyderabad, India

- Improved reporting efficiency by 35% by consolidating multiple fragmented reports into interactive Power BI dashboards, reducing manual effort and enhancing decision-making speed.
- Analyzed complex data flows and processing pipelines, identifying and resolving data issues affecting business and technology operations.
- Performed root cause analysis on financial transaction discrepancies, resolving 90% of detected anomalies within SLAs.
- Collaborated with business and technology teams, ensuring alignment on data-driven solutions, accelerating issue resolution by 30%.

ACADEMIC PROJECTS

Hofstra University

Tableau Dashboard for the Cancer Drugs

Dec - 2023

Hempstead, NY

- Analyzed and visualized cancer drug data, creating an interactive Tableau dashboard to track patient impact across different cancer types.
- Processed and cleaned 100,000+ patient records, ensuring data accuracy and consistency for clinical trial comparisons.
- Reduced data retrieval time by 30% by optimizing queries and structuring the dashboard for real-time updates.
- Compared clinical trial results, adverse reactions, and dosage administration of the top 10 cancer treatment drugs, providing actionable insights for healthcare professionals.
- Enhanced data-driven decision-making by integrating advanced visualizations that highlight treatment efficacy and patient outcomes.
- Improved report generation efficiency by 40%, enabling faster analysis for medical researchers.
