

Jaideep Sanaka

Data Analyst

302-444-2765 | Chicago, IL | jaideepsnk@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

- Data Analyst with 4+ years of experience transforming large datasets into actionable insights across e-commerce analytics, risk operations, and supply chain analytics.
- Skilled in SQL, Python, Tableau, and Power BI, delivering measurable impact through dashboard automation, anomaly detection, and forecasting, improving reporting efficiency and decision speed by 20–40%.

TECHNICAL SKILLS

Programming & Analytics: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R, SAS, Statistical Analysis

Data Visualization & BI: Tableau, Power BI, Qlik Sense, Excel Dashboards, Data Storytelling, Predictive Analytics

Data Management & ETL: Data Cleaning, ETL Pipelines (SQL-based, Alteryx, Excel VBA automation)

Risk & Forecasting Analytics: Fraud Detection, Anomaly Scoring, Time-Series Forecasting

Cloud Platforms & Tools: AWS (S3, Redshift), Azure (SQL, Data Factory basics), Git, JIRA, Confluence

Certifications: Google Analytics (GA4), Alteryx Core Designer, Qlik Sense

Productivity & Advanced Excel: Pivot Tables, VLOOKUP, Macros, VBA Automation

WORK EXPERIENCE

Data Analyst | USAA | Texas USA

Dec 2024 - Present

Tech: [SQL], [QlikSense], [Excel], [Power BI], [Data Visualization]

- Consolidated claims, policy, and premium data using SQL and Qlik Sense to build a Claims & Premium Performance Dashboard tracking loss ratios, claim frequency, and earned premium trends across product lines.
- Developed SQL and Excel-based forecasting models to project claim reserves and premium income, improving quarterly financial planning accuracy by 10%.
- Automated recurring financial reporting and variance analysis tasks using SQL scripts and Tableau visualizations, reducing manual data preparation time by **30%**.
- Partnered with underwriting and finance teams to translate analytical insights into portfolio-level pricing strategies and operational performance improvements.

Data Analyst | Amazon | Hyderabad India

Oct 2022 - Aug 2023

Tech: [SQL], [Tableau], [Excel], [Fraud Detection], [Statistical Analysis]

- Queried and validated **500K+** monthly cross-border transactions using **SQL** across US and UK markets, establishing reliable data pipelines for fraud detection and compliance reporting, reducing false positives by **15%**.
- Engineered fraud detection queries and anomaly-tracking models, identifying behavioral patterns that improved detection accuracy by 75% and reduced false positives by 12% using statistical analysis.
- Built and optimized Tableau dashboards to monitor KPIs such as customer returns, investigation throughput, and claim resolution time, accelerating anomaly detection by 30%.
- Automated recurring fraud monitoring workflows using Excel macros, cutting manual review hours by 40% and ensuring scalable governance across global markets.

Supply Chain Data Analyst | Sri Sai Rocks | Chittoor India

Aug 2020 - Aug 2022

Tech: [Excel], [Tableau], [Supply Chain Analytics], [Python], [Data Visualization]

- Developed interactive dashboards and Excel Pivot Tables to track procurement, logistics, and inventory KPIs, supporting accurate demand forecasting and reducing overstock by 15%.
- Conducted cost variance and margin analysis with advanced Excel models, delivering insights that reduced supply chain costs by 18% and improved forecasting accuracy.
- Automated recurring reporting cycles using Excel VBA, reducing manual processing time by 50% and freeing up analyst hours for strategic work.
- Enhanced supply chain visibility through Tableau dashboards, improving collaboration across finance and operations teams and enabling process optimizations that reduced reporting time by 40%.

PROJECTS

Fraud Risk Modeling & Anomaly Scoring Prototype

Tech: [SQL], [Tableau], [Excel], [Fraud Analytics], [Data Visualization]

- Processed 500K+ monthly transaction records in SQL pipelines to build a prototype fraud scoring framework, enabling early-stage anomaly flagging through data cleaning and preparation.
- Applied time-series and clustering analysis on claims and returns datasets, uncovering behavioral anomalies with 70%+ precision in pilot testing.

Sales Intelligence & Trend Analysis Dashboard

Tech: [Power BI], [DAX], [Excel], [Data modelling], [Data Visualization]

- Designed a Power BI dashboard with custom DAX KPIs (Sales, Profit, Costs, MoM change) that revealed performance gaps and growth opportunities for leadership.
- Built a star-schema data model and visual indicators that accelerated decision-making by highlighting outliers and key operational insights.

EDUCATION

Master of Business Administration-Business Analytics |University of Delaware
Bachelor of Arts | KL University

Aug 2023 – May 2025
Jul 2016 – May 2020
